

Contents

1	Application of Plasma Technology for Remediating Environment—An Introduction	1
1.1	Introduction	1
1.2	Plasma Generation and Application	1
1.3	Plasma Technology in Environmental Protection	2
	References.	4
2	Remediation of Phenanthrene-Contaminated Soil Using Non-thermal Plasma Fluidized Bed	7
2.1	Introduction	7
2.2	Experimental Section	8
2.2.1	Experimental Setup	8
2.2.2	Materials and Analyses	9
2.3	Results and Discussions	11
2.3.1	Effect of the Solid Bed Location	11
2.3.2	Effect of the Input Energy Density	12
2.3.3	Effect of the Flow Rate of the Carrier Gas	13
2.3.4	Effect of the Soil Moisture Content	14
2.3.5	Role of Active Species	16
2.3.6	TOC Analysis	17
2.3.7	Proposed Pathway of the PHE Degradation	17
2.4	Conclusions	19
	References.	19
3	Degradation and Discoloration of Textile Dyes Using Gliding Arc Plasma Combined with Fenton Catalysis	21
3.1	Introduction	21
3.2	Experimental Section	22
3.2.1	Plasma Apparatus	22
3.2.2	Materials and Analytical Methods	23

3.3	Results and Discussions	24
3.3.1	Plasma Discoloration and Degradation of Single Dye	24
3.3.2	Treatment Results of Mixed Dye Wastewater	27
3.3.3	Discoloration and Degradation in the Presence of Zerovalent Iron (ZVI)	28
3.3.4	Comparison of Different Research Studies and Their Major Results	37
3.4	Conclusions	37
	References.	38
4	Reduction and Removal of Cr(VI) from Aqueous Solution by Microplasma.	41
4.1	Introduction	41
4.2	Experimental Details.	43
4.2.1	Discharge Apparatus and Materials	43
4.2.2	Analyses	44
4.3	Results	44
4.3.1	Effect of Gas Flow Rate on Cr(VI) Reduction	44
4.3.2	Effect of Initial pH on Cr(VI) Reduction.	45
4.3.3	Effect of Stirring on Cr(VI) Reduction	46
4.3.4	Effect of Initial Cr(VI) Concentration on Cr(VI) Reduction	46
4.3.5	Effect of Various Discharge Gas on Cr(VI) Reduction	46
4.3.6	Effect of Input Power on Cr(VI) Reduction	47
4.3.7	Effect of Ethanol on Cr(VI) Reduction and Removal	48
4.3.8	Effect of Initial PH on the Removal of Cr(VI) in the Presence of Ethanol	49
4.3.9	Characterization of the Sediment.	50
4.4	Discussion	52
4.5	Conclusions	56
	References.	57
5	Surface Sterilization by Atmospheric Pressure Non-thermal Plasma	61
5.1	Introduction	61
5.2	Experimental Section	62
5.3	Results and Discussions	64
5.3.1	Destruction of Bacteria by Atmospheric Pressure Non-Thermal Plasma.	64
5.3.2	Influence of Air Flow Rate on the Sterilization Efficiency	65
5.3.3	Influence of Gap Distance Between Agar Surfaces and Electrodes on the Sterilization Efficiency	66
5.3.4	Temperature Variations of Surface Sterilization Efficiency Under Different Contact Distances	67

5.3.5	Influence of the Total Number of Bacteria in the Surface on the Sterilization Efficiency.	68
5.3.6	Scanning Electron Microscopic Photomicrographs of <i>E. Coli</i> in the Treatment.	69
5.3.7	Mechanism of Bacteria Inactivation by Non-thermal Plasma.	70
5.4	Conclusions	71
	References.	71
6	Removal of Volatile Organic Compounds Using Plasma Fluidized Bed.	75
6.1	Introduction	75
6.2	Removal of Volatile Organic Compounds Using Plasma Fluidized Bed with Catalysis	76
6.2.1	Experimental Section	76
6.2.2	Results	77
6.3	Removal of Volatile Organic Compounds Using Plasma Fluidized Bed with Activated Carbon.	78
6.3.1	Experimental Section	78
6.3.2	Results	78
	Reference	79

Plasma Remediation Technology for Environmental
Protection

Du, C.; Yan, J.

2017, XI, 79 p. 50 illus., 19 illus. in color., Hardcover

ISBN: 978-981-10-3655-2
