Part I Distributed Rendezvous Theory

1	Distributed Systems	3
1.1	What Is Distributed System?	3
1.2	Local Area Networks	4
1.3	Email	7
1.4	Wireless Sensor Networks	7
1.5	Cognitive Radio Networks	9
1.6	Telephone Networks	11
	References	12
2	Distributed Computing	15
2.1	What Is Distributed Computing?	15
2.2	Communication Model	17
2.3	Information Incompleteness	19
2.4	Timing and Synchrony	20
	References	22
3	Rendezvous Theory	23
3.1	What Is the Rendezvous Problem?	23
3.2	Rendezvous in Multichannel Wireless Networks	24
3.3	Rendezvous in Cognitive Radio Networks	25
3.4	Rendezvous in Distributed Systems	27
3.5	Distributed Rendezvous Algorithms	28
3.5.1	Distributed Telephone Coordination Algorithms	28
3.5.2	Distributed Rendezvous Algorithms for Multichannel Networks	30
3.5.3	Distributed Rendezvous Algorithms for Cognitive Radio Networks	32
	References	35

4	Rendezvous Categories	39
4.1	Symmetric and Asymmetric Algorithms	39
4.2	Synchronous and Asynchronous	40
4.3	Symmetric and Asymmetric Port Settings	43
4.4	Anonymous and Non-anonymous Entities	44
4.5	Oblivious and Non-oblivious Port Labeling	45
4.6	Rendezvous Categories	47
	References	50
 Part II Blind Rendezvous in Distributed Systems		
5	Blind Rendezvous Problem	53
5.1	System Model	54
5.2	Metrics	56
5.3	Problem Definition	57
5.4	Challenges	59
5.5	Chapter Summary	60
	References	60
6	Asymmetric Blind Rendezvous Algorithms	61
6.1	Synchronous and Port-Symmetric Rendezvous	61
6.1.1	Smallest Port Accessing Algorithm	62
6.1.2	Quorum-Based Channel Hopping	62
6.2	Asynchronous and Port-Symmetric Rendezvous	64
6.2.1	Asynchronous Quorum-Based Channel Hopping	64
6.2.2	Sequential Accessing Algorithm	66
6.3	Synchronous and Port-Asymmetric Rendezvous	67
6.3.1	Modified Sequential Accessing Algorithm	68
6.4	Asynchronous and Port-Asymmetric Rendezvous	68
6.4.1	Sequential Access and Temporary Wait for Rendezvous	69
6.5	Chapter Summary	70
	References	72
7	Synchronous Blind Rendezvous Algorithms	73
7.1	Expanded Sequential Accessing Algorithm	73
7.2	Chapter Summary	75
8	Asynchronous Blind Rendezvous Algorithms for Anonymous Users	77
8.1	Generated Orthogonal Sequence (GOS)	78
8.2	Deterministic Rendezvous Sequence (DRSEQ)	79
8.3	Channel Rendezvous Sequence (CRSEQ) Algorithm	80
8.4	Jump Stay Algorithm	81

8.5	Disjoint Relaxed Different Set (DRDS) Based Rendezvous Algorithm	83
8.5.1	Global Sequence (GS)	83
8.5.2	Disjoint Relaxed Difference Set (DRDS)	84
8.5.3	Equivalence of DRDS and Good GS	85
8.5.4	DRDS Construction	86
8.5.5	DRDS Based Rendezvous Algorithm	91
8.5.6	Improved DRDS Based Rendezvous Algorithm	93
8.6	Lower Bound for GS Based Rendezvous Algorithms	95
8.7	Chapter Summary	100
	References	101
9	Local Sequence (LS) Based Rendezvous Algorithms	103
9.1	Local Sequence (LS)	104
9.2	Ring Walk Algorithm	104
9.3	Alternate Hop-and-Wait (AHW) Algorithm	105
9.4	A Simple LS Based Rendezvous Algorithm	107
9.5	A Modified LS Based Rendezvous Algorithm	114
9.6	Chapter Summary	120
	References	121
10	Blind Rendezvous for Multi-users Multihop System	123
10.1	Algorithm Description	123
10.2	Correctness and Complexity	124
10.3	Discussions	125
10.4	Chapter Summary	126
	References	127
 Part III Oblivious Blind Rendezvous in Distributed Systems		
11	Oblivious Blind Rendezvous	131
11.1	System Model	132
11.2	Metrics	134
11.3	Problem Definition	134
11.4	Examples of Oblivious Blind Rendezvous	136
11.5	Chapter Summary	138
	References	139
12	Asymmetric Oblivious Blind Rendezvous Algorithms	141
12.1	Port-Symmetric Rendezvous	141
12.2	Synchronous and Port-Asymmetric Rendezvous	143
12.3	Asynchronous and Port-Asymmetric Rendezvous	146
12.4	Chapter Summary	148

13 Oblivious Blind Rendezvous for Non-anonymous Users	149
13.1 Synchronous Oblivious Blind Rendezvous	149
13.1.1 Synchronous Check and Hop Algorithm	150
13.1.2 Correctness and Complexity	152
13.2 Asynchronous Oblivious Blind Rendezvous	156
13.2.1 ID Hopping Algorithm	156
13.2.2 Multi-step Port Hopping Algorithm	160
13.3 Lower Bound for Oblivious Blind Rendezvous	165
13.3.1 Adversary Assignment Graph	166
13.3.2 A Loose Lower Bound	168
13.3.3 A Refined Lower Bound	170
13.4 Chapter Summary	172
Reference	173
14 Fully Distributed Rendezvous Algorithm for Non-anonymous Users	175
14.1 Conversion Based Hopping Algorithm	175
14.2 Correctness and Complexity	177
14.3 Chapter Summary	183
Reference	183
15 Oblivious Blind Rendezvous for Anonymous Users	185
15.1 Hardness of Anonymity	185
15.2 Port-Symmetric Rendezvous	187
15.2.1 Intuitive Ideas	188
15.2.2 Stay or Random Selection Algorithm	190
15.2.3 Synchronous Users Scenario	191
15.2.4 Asynchronous Users Scenario	195
15.3 Port-Asymmetric Rendezvous	204
15.3.1 Random Picking Algorithm	204
15.3.2 Random Prime Selection and Sequential Accessing Algorithm	206
15.4 Chapter Summary	207
References	208
16 Oblivious Blind Rendezvous for Multi-user Multihop CRN	209
16.1 Algorithm Description	209
16.2 Correctness and Complexity	210
16.3 Chapter Summary	211
References	211

Part IV Distributed Rendezvous Applications

17	Rendezvous in Heterogeneous Cognitive Radio Networks	215
17.1	Preliminaries	216
17.1.1	System Model	216
17.1.2	Problem Definition	218
17.1.3	Challenges	220
17.2	Rendezvous for Fully Available Spectrum	220
17.2.1	Rendezvous Scheme for Two Available Channels	221
17.2.2	Traversing Pointer Algorithm	225
17.2.3	Correctness and Complexity	226
17.3	Rendezvous for Partially Available Spectrum	228
17.3.1	Moving Traversing Pointer Algorithm	228
17.3.2	Correctness and Complexity	230
17.4	Chapter Summary	231
	References	231
18	Rendezvous Search in a Graph	233
18.1	Symmetry of Rendezvous Search	233
18.2	Rendezvous Search Along a Cycle	235
18.3	Rendezvous Search Algorithms	237
18.4	Chapter Summary	240
	Reference	241
19	Neighbor Discovery in Wireless Sensor Networks	243
19.1	Motivational Example	244
19.2	Problem Definition	245
19.3	Brute Force Algorithm	247
19.4	Relax Difference Set Based Algorithm	248
19.5	Co-Prime Algorithm	249
19.6	Chapter Summary	251

Part V Conclusions and Future Works

20	Conclusions and Future Works	255
20.1	Conclusions	255
20.2	Future Works	260
	References	262

Rendezvous in Distributed Systems

Theory, Algorithms and Applications

Gu, Z.; Wang, Y.; Hua, Q.-S.; Lau, F.

2017, XIX, 262 p. 99 illus., 22 illus. in color., Hardcover

ISBN: 978-981-10-3679-8
