

# Contents

<b>1</b>	<b>Introduction</b>	1
<b>2</b>	<b>Linear Models</b>	9
2.1	Simple Linear Regression Model	9
2.2	Multiple Regression Model	10
2.3	Estimation of Parameters	11
2.3.1	Method of Least Squares	12
2.3.2	Maximum Likelihood Estimation	15
2.4	Tests	16
2.5	Example	19
<b>3</b>	<b>Exponential Family of Distributions</b>	23
3.1	Exponential Family and Sufficiency	24
3.2	Some Important Properties	28
<b>4</b>	<b>Generalized Linear Models</b>	31
4.1	Introduction	31
4.2	Exponential Family and GLM	32
4.3	Expected Value and Variance	34
4.4	Components of a GLM	35
4.5	Multinomial Response Model	38
4.6	Estimating Equations	40
4.7	Deviance	43
4.8	Examples	47
<b>5</b>	<b>Covariate-Dependent Markov Models</b>	51
5.1	Introduction	51
5.2	First Order Markov Model	52
5.3	Conditional Model for Second Order Markov Chain with Covariate Dependence	54
5.4	Covariate Dependent Model for Markov Chain of Order $r$	57

5.5	Tests for the Model . . . . .	58
5.6	Examples . . . . .	60
<b>6</b>	<b>Modeling Bivariate Binary Data . . . . .</b>	<b>67</b>
6.1	Introduction . . . . .	67
6.2	Bivariate Bernoulli Distribution . . . . .	68
6.3	Bivariate Binary Model with Covariate Dependence. . . . .	69
6.3.1	Covariate-Dependent Model . . . . .	70
6.3.2	Likelihood Function and Estimating Equations . . . . .	71
6.4	Test for Dependence in Bivariate Binary Outcomes . . . . .	72
6.4.1	Measure of Dependence . . . . .	72
6.4.2	Test for the Model . . . . .	73
6.4.3	Test for Dependence . . . . .	75
6.5	Generalized Bivariate Bernoulli Model. . . . .	76
6.5.1	The Bivariate Bernoulli Model . . . . .	77
6.5.2	Estimating Equations. . . . .	79
6.5.3	Tests . . . . .	81
6.6	Some Alternative Binary Repeated Measures Models. . . . .	82
6.7	Examples . . . . .	84
<b>7</b>	<b>Bivariate Geometric Model. . . . .</b>	<b>87</b>
7.1	Introduction . . . . .	87
7.2	Univariate Geometric Distribution . . . . .	88
7.3	Bivariate Geometric Distribution: Marginal and Conditional Models . . . . .	88
7.4	Bivariate Geometric Distribution: Joint Model . . . . .	91
7.5	Examples . . . . .	93
<b>8</b>	<b>Models for Bivariate Count Data:</b>	
	<b>Bivariate Poisson Distribution . . . . .</b>	<b>97</b>
8.1	Introduction . . . . .	97
8.2	The Poisson–Poisson Distribution. . . . .	98
8.3	Bivariate GLM for Poisson–Poisson. . . . .	99
8.3.1	Model and Estimation. . . . .	99
8.3.2	Overdispersion in Count Data . . . . .	100
8.3.3	Tests for Goodness of Fit . . . . .	101
8.3.4	Simple Tests for Overdispersion With or Without Covariate Dependence. . . . .	102
8.4	Zero-Truncated Bivariate Poisson . . . . .	103
8.4.1	Zero-Truncated Poisson Distribution . . . . .	104
8.4.2	A Generalized Zero-Truncated BVP Linear Model . . . . .	105
8.4.3	Test for the Model . . . . .	107
8.4.4	Deviance and Goodness of Fit . . . . .	107

8.5	Right-Truncated Bivariate Poisson Model . . . . .	108
8.5.1	Bivariate Right-Truncated Poisson–Poisson Model . . . . .	108
8.5.2	Predicted Probabilities . . . . .	110
8.5.3	Test for Goodness of Fit . . . . .	112
8.6	Double Poisson Distribution . . . . .	114
8.6.1	Double Poisson Model . . . . .	114
8.6.2	Bivariate Double Poisson Model . . . . .	118
8.7	Applications . . . . .	121
<b>9</b>	<b>Bivariate Negative Binomial and Multinomial Models . . . . .</b>	<b>125</b>
9.1	Introduction . . . . .	125
9.2	Review of GLM for Multinomial . . . . .	126
9.3	Bivariate Multinomial . . . . .	128
9.4	Tests for Comparison of Models . . . . .	131
9.5	Negative Multinomial Distribution and Bivariate GLM . . . . .	133
9.5.1	GLM for Negative Multinomial . . . . .	134
9.6	Application of Negative Multinomial Model . . . . .	137
<b>10</b>	<b>Bivariate Exponential Model . . . . .</b>	<b>139</b>
10.1	Introduction . . . . .	139
10.2	Bivariate Exponential Distributions . . . . .	139
10.3	Bivariate Exponential Generalized Linear Model . . . . .	142
10.4	Bivariate Exponential GLM Proposed by Iwasaki and Tsubaki . . . . .	146
10.5	Example . . . . .	148
<b>11</b>	<b>Quasi-Likelihood Methods . . . . .</b>	<b>151</b>
11.1	Introduction . . . . .	151
11.2	Likelihood Function and GLM . . . . .	152
11.3	Quasi-likelihood Functions . . . . .	153
11.4	Estimation of Parameters . . . . .	155
11.5	Examples . . . . .	158
<b>12</b>	<b>Generalized Estimating Equation . . . . .</b>	<b>161</b>
12.1	Introduction . . . . .	161
12.2	Background . . . . .	161
12.3	Estimation of Parameters . . . . .	163
12.4	Steps in a GEE: Estimation and Test . . . . .	164
12.5	Examples . . . . .	166
<b>13</b>	<b>Generalized Linear Mixed Models . . . . .</b>	<b>169</b>
13.1	Introduction . . . . .	169
13.2	Generalized Linear Mixed Model . . . . .	169
13.3	Identity Link Function . . . . .	170
13.4	Logit Link Function . . . . .	170
13.5	Log Link Function . . . . .	171

13.6	Multinomial Data . . . . .	173
13.7	Examples . . . . .	175
<b>14</b>	<b>Generalized Multivariate Models . . . . .</b>	<b>177</b>
14.1	Introduction . . . . .	177
14.2	Multivariate Poisson Distribution . . . . .	179
14.3	Multivariate Negative Binomial Distribution. . . . .	181
14.4	Multivariate Geometric Distribution . . . . .	182
14.5	Multivariate Normal Distribution . . . . .	184
14.6	Examples . . . . .	187
<b>15</b>	<b>Multistate and Multistage Models . . . . .</b>	<b>191</b>
15.1	Introduction . . . . .	191
15.2	Some Basic Concepts . . . . .	192
15.3	Censoring: Construction of Likelihood Function . . . . .	196
15.4	Proportional Hazards Model . . . . .	197
15.5	Competing Risk Proportional Hazards Model. . . . .	199
15.6	Multistate Hazards Model . . . . .	200
15.7	Multistage Hazards Model . . . . .	203
15.8	Examples . . . . .	207
<b>16</b>	<b>Analysing Data Using R and SAS . . . . .</b>	<b>213</b>
16.1	Description . . . . .	213
	<b>References . . . . .</b>	<b>235</b>
	<b>Subject Index. . . . .</b>	<b>249</b>

Analysis of Repeated Measures Data

Islam, M.A.; CHOWDHURY, R.

2017, XIX, 250 p. 6 illus., Hardcover

ISBN: 978-981-10-3793-1
