

Contents

Part I Introduction and Motivation

1 Introduction	3
1.1 Challenges and Motivation	5
1.2 Research Questions	5
1.3 Thesis Outline	6

Part II Background

2 Background and Related Work	9
2.1 Mobile Human-Computer Interaction	9
2.1.1 Limitation of Attention	9
2.1.2 Information Processing	10
2.2 Technical Background	12
2.2.1 Permission Models on Smartphones: Accessing Protected Resources	13
2.2.2 Mechanisms for Notifications on Smartphones	14
2.3 Research Methodology	17
2.3.1 Leveraging Mobile Application Stores	18
2.3.2 Methodically Related Studies	21
2.3.3 Methodically Related Frameworks	23
2.3.4 Ethics	24
2.4 Related Work	26
2.4.1 General Usage of Mobile Phones and Smartphones	26
2.4.2 Warnings and Permission Requests	29
2.4.3 Adaptation of Settings on Smartphones	32
2.4.4 Notifications and Interruptions	33
2.5 Summary	38

Part III Technical Framework

3 Framework and Testbed for Tracing Mobile

Application Usage	43
3.1 Introduction	43
3.2 Prerequisites	44
3.3 Mobile Applications: Native, Web, and Hybrid Solutions	45
3.3.1 Native Applications	45
3.3.2 Mobile Web Applications	45
3.3.3 Hybrid Applications	46
3.3.4 Design Decision: Constraints and Requirements	46
3.4 Conceptual Framework	46
3.4.1 Tracing Mobile Application Usage	47
3.4.2 Gathering User Feedback	50
3.4.3 Recording Interaction with Notifications on a System-Wide Level	52
3.4.4 Summary	53
3.5 Domain-Specific Mobile Applications	54
3.5.1 Sense4En	54
3.5.2 QUe	56
3.5.3 Klügste Nacht	58
3.6 Summary	59

Part IV Studies

4 Global Analysis of User Behavior in the Field	63
4.1 Introduction	63
4.2 Methodology	63
4.2.1 Participants	63
4.2.2 Procedure	64
4.3 General Application Usage	67
4.4 Notification Handling	69
4.4.1 Factors Influencing Seen Time	70
4.4.2 Factors Influencing Notification Handling	72
4.4.3 The Role of Notification Presentation	73
4.4.4 Annoying Notifications & Stress	73
4.4.5 The Influence of Notifications on Application Usage	76
4.5 Discussion	77
4.6 Conclusion	78
5 Permission Requests and Notification Settings	81
5.1 Introduction	81
5.2 Study B: Notification Settings Across Categories	82
5.2.1 Introduction	82
5.2.2 Methodology	82

5.2.3	Results	86
5.2.4	Discussion	88
5.2.5	Limitations	88
5.3	Design Concept for Permission Requests	89
5.4	Study C: Permission Request Characteristics	91
5.4.1	Introduction	91
5.4.2	Methodology	91
5.4.3	Results	93
5.4.4	Discussion	95
5.5	Study D: Trust and Privacy	96
5.5.1	Introduction	96
5.5.2	Methodology	97
5.5.3	Results	98
5.5.4	Discussion	100
5.6	Conclusion	102
6	Receptivity to Notifications	103
6.1	Introduction	103
6.2	Study E: Modality, Actionability, and Perceived Importance	104
6.2.1	Introduction	104
6.2.2	Methodology	104
6.2.3	Results	106
6.2.4	Discussion	108
6.3	Study F: Content and Frequency	109
6.3.1	Introduction	109
6.3.2	Pre-study	109
6.3.3	Field Study	112
6.3.4	Discussion	114
6.4	Study G: Context Factor Time	115
6.4.1	Introduction	115
6.4.2	Methodology	115
6.4.3	Results	117
6.4.4	Discussion	119
6.5	Conclusion	120
Part V Conclusion		
7	General Conclusions	125
7.1	Summary	125
7.2	Conclusion	126
7.3	Limitations	129

7.4 Future Work 130

7.4.1 From Short-Term to Long-Term Studies 130

7.4.2 From Smartphone to Other Smart Devices 130

7.4.3 From Tool to Assistant 130

7.4.4 From System-Initiated to User-Initiated 131

Appendix A: Technostress Questionnaire 133

Bibliography 135

User Acceptance of Mobile Notifications

Westermann, T.

2017, XVI, 144 p. 39 illus., 20 illus. in color., Hardcover
