Contents

1 Introduction 1
1.1 Background and Significance 1
1.2 Thin Films Composed of Assembled Ordered Nanowire Arrays . . . 2
1.2.1 Interface-Induced Nanowire Assembly 3
1.2.2 Nanowire Assemblies by Mechanical Force 12
1.2.3 Nanowire Assemblies Induced by External Nanostructures 14
1.2.4 Assembly of 1D Nanostructures by External Fields 14
1.2.5 Nanowire Assemblies by Microfluidic Flow 19
1.2.6 Nanowire Assemblies by Bubble Blowing Process 20
1.2.7 Nanowire Assemblies by Electrospinning 21
References 24

2 Synthesis of One-Dimensional Te Nanostructures 33
2.1 Introduction 33
2.2 Microwave-Assisted Synthesis of Te Nanowires 34
2.3 Solution-Based Synthesis of Te Nanostructure 35
References 36

3 Interface-Induced Macroscopic Nanowire Assemblies 39
3.1 Introduction 39
3.2 Interface-Induced Assembly of One-Dimensional Nanomaterials . . . 40
3.2.1 Langmuir–Blodgett Technology for Assembly of Nanowires 40
3.2.2 Assembly of Nanowires at Liquid–Liquid Interface 48
3.2.3 Shear Force-Induced Assembly of Silver and Tellurium Nanowires 50
References 52

4 Electron-Beam-Induced Nanowire Assemblies 57
4.1 Introduction 57
4.2 Fabrication of Carbon Films by In Situ Electron-Beam Irradiation 58
4.3 Fabrication of Carbon-Based Nanocomposites by In Situ Electron-Beam Irradiation 59
4.4 Conclusions 62
References 63

5 Applications of the Nanowire Assemblies 67
5.1 Introduction 67
5.2 Fabrication of Nanowire Stamper 68
5.3 Nanowire Selective Transmission 69
5.4 Nanowire Photoconductors 70
5.5 Nanowire Memory Device 73
5.6 Ordered Nanowire Films for Electrochromic Devices 74
5.7 Nanowire Films for Surface-Enhanced Raman Substrates 77
5.8 Flexible Transparent Electrodes Based on the Nanowire Assemblies 79
References 81
