1	Introduction	1
1.1	Brief History of Mathematical Marx's Political Economy in Japan	1
1.2	Plan of Chapters	3
1.3	Basic Framework of the Marx-Sraffa Model	5
2	Sraffa-Okishio-Nakatani's Fixed Capital Theory	7
2.1	Introduction	7
2.2	Reduction <i>à la</i> Sraffa-Okishio-Nakatani	7
2.2.1	Okishio-Nakatani Reduction	8
3	Renewal Dynamics of Fixed Capital	13
3.1	Introduction	13
3.2	Normal Depreciation	14
3.2.1	Yamada-Yamada and Markov Process	14
3.2.2	Stationary State	17
3.3	Accelerated Depreciation	17
3.4	Concluding Remarks	19
4	Profit and Growth in the SON Economy	21
4.1	Introduction	21
4.2	Framework of Analysis	21
4.2.1	The Reproduction Model with Only 1 Type of Fixed Capital	21
4.2.2	The Model of 4 Commodities from 2 Sectors	22
4.2.3	The Equilibrium of Production Prices and the Level of Activities	23
4.2.4	The Reduced Price System	24
4.2.5	Reduced Quantity System	26

4.3	The Cambridge Equation in SON.....	27
4.3.1	Some Preparations.....	27
4.3.2	The Cambridge Equation of the SON Economy.....	28
4.4	Concluding Remarks.....	30
5	Economic Durability and Hardening Effects of Fixed Capital.....	33
5.1	Introduction.....	33
5.2	The Model.....	33
5.3	Simulation of the Determination of Economic Durability.....	35
5.3.1	The Numerical Value Settings.....	35
5.3.2	The Standard Maximum Problem and Production Price Ratios.....	35
5.3.3	The Activity Level of Production Processes.....	36
5.4	Simulation of the Hardening Effect of Fixed Capital.....	37
5.4.1	Numerical Settings.....	37
5.4.2	Production Prices and Activity Levels of the Production Process.....	38
5.5	Simulation with Physical Durability.....	40
5.6	Concluding Remarks.....	42
5.6.1	On the Endogenous Determination of Economic Durability.....	42
5.6.2	On the Hardening Effect of Fixed Capital.....	43
5.6.3	Comparison with Physical Durability.....	44
5.6.4	Theoretical Implication.....	46
6	Marx-Sraffa Equilibria as Eigensystems.....	47
6.1	Mathematical Preliminaries.....	47
6.1.1	Marx-Sraffa Equilibria.....	49
6.2	Possibility of Unstable Marx-Sraffa Equilibrium.....	53
6.2.1	A Basis of Numerical Computation.....	53
6.2.2	Marx-Sraffa Price Equilibrium.....	54
6.2.3	Marx-Sraffa Activity Equilibrium.....	55
6.2.4	The Equilibrium Quantity of the Marx-Sraffa Model.....	56
6.2.5	The Dynamics of the Production Price System.....	56
6.2.6	The Dynamics of the Activity and the Quantity Systems.....	57
6.3	Concluding Remarks.....	58
7	Fixed Capital and China's Economy 1995–2000.....	59
7.1	Introduction.....	59
7.2	Estimation of Marginal Fixed Capital Coefficients.....	60
7.2.1	Basic Framework.....	60
7.2.2	Sraffa-Fujimori Method.....	61
7.2.3	Notes on Data.....	64

7.3	Wage-Profit Curves <i>à la</i> von Neumann-Leontief	65
7.3.1	Basic Concept	65
7.3.2	Computation Procedure with Respect to Input-Output Data	67
7.3.3	Computation Results	69
7.4	Concluding Remarks	74
8	Marx's Labour Values in China's Economy	75
8.1	Introduction	75
8.2	Value System and Production Price System	76
8.2.1	Notations and Preliminary Notes	76
8.2.2	Values	76
8.2.3	Production Prices	77
8.2.4	Rate of Surplus Value	77
8.3	Organic Composition of Capital, Fixed Capital-Labour Ratio and Rate of Surplus Value	79
8.3.1	Organic Composition of Capital	79
8.3.2	Fixed Capital-Labour Ratios	79
8.4	Spearman's Rank Correlation Coefficients	80
8.5	Concluding Remarks	80
9	Turnpike Paths for China's Economy 1995–2000	83
9.1	Introduction	83
9.2	Kantorovich's Long-Term Planning Model	83
9.2.1	DOSSO's Model	85
9.2.2	Similarity and Difference Between DOSSO and Kantorovich Model	85
9.3	Long-Term Planning Theory and China's Economy	87
9.3.1	Kantorovich's Output Path	87
9.3.2	The Additional Restrictions on Fixed Capital	89
9.3.3	The Long-Term Plan with a Labour Resource Constraint	90
9.4	Concluding Remarks	93
10	Concluding Remarks	95
	Appendix A: Input-Output Tables and Marx's 2-Sector Model	97
	References	117
	Index	121

Linear Theory of Fixed Capital and China's Economy

Marx, Sraffa and Okishio

Bangxi, L.

2017, XIV, 122 p. 27 illus., 7 illus. in color., Hardcover

ISBN: 978-981-10-4064-1
