

Contents

1	Introduction to KP Theory and KP Solitons	1
1.1	The Burgers Hierarchy	1
1.1.1	Shock Solution and Line-Soliton Solution	4
1.1.2	Confluence of Shocks: Resonant Interaction of Line-Solitons	7
1.2	The Multi-component Burgers Equation and the τ -Function	10
1.2.1	The Plücker Relations and the τ -Function	13
1.2.2	The Schur Polynomials and the τ -Function	16
	Problems	22
2	Lax-Sato Formulation of the KP Hierarchy	25
2.1	Lax Formulation of the KP Equation	25
2.2	The Dressing Transformation	27
2.3	Wave Function ϕ and the τ -Function	29
2.4	Bilinear Identity of the τ -Function	33
2.5	Hirota Perturbation Method for N -Soliton Solutions	36
	Problems	39
3	Two-Dimensional Solitons	41
3.1	The τ -Functions for Two-Dimensional Soliton Equations	41
3.2	Soliton Solutions	43
3.2.1	The KP Solitons	44
3.2.2	Two-Dimensional Toda Lattice Solitons	46
3.2.3	The Davey-Stewartson (DS) Solitons	48
	Problems	50
4	Introduction to the Real Grassmannian	52
4.1	Soliton Solutions and the Grassmannians	52
4.2	The Real Grassmannian	53
4.3	The Schubert Decomposition	55

4.3.1	Young Diagrams for a Parametrization of the Schubert Cells	55
4.3.2	Pipedreams and Permutations	60
	Problems	63
5	The Deodhar Decomposition for the Grassmannian and the Positivity	64
5.1	The Flag Variety	64
5.1.1	Deodhar Components in the Flag Variety	66
5.1.2	The Totally Nonnegative Part of the Flag Variety	68
5.2	The Deodhar Decomposition for the Grassmannian	69
5.2.1	The Go-Diagram	71
5.3	Plücker Coordinates for the Go-Diagram and the Positivity	73
5.3.1	Formulas for Plücker Coordinates	73
5.3.2	The Le-Diagrams and the Pipedreams	79
5.3.3	A Network Representation of the Element $g \in G_{v,w}$	83
5.3.4	The Chord Diagrams and Their Combinatorics	85
	Problems	88
6	Classification of KP Solitons	90
6.1	Soliton Graphs $\mathcal{C}_t(\mathcal{M}(A))$	90
6.1.1	Tropical Approximation of the Contour Plot	91
6.2	Classification Theorem	93
	Problems	101
7	KP Solitons on $Gr(N, 2N)_{\geq 0}$	103
7.1	Duality Between $Gr(N, M)_{\geq 0}$ and $Gr(M - N, M)_{\geq 0}$	103
7.1.1	Duality Between the Le-Diagrams	106
7.2	The N -Soliton Solutions	108
7.3	Combinatorics of N -Soliton Solutions	111
7.3.1	Linear Chord Diagrams for N -Soliton Solutions	111
7.3.2	Combinatorics of the Chord Diagrams Associated to N -Soliton Solutions	113
	Problems	118
8	Soliton Graphs	120
8.1	Soliton Graphs $\mathcal{C}_{\pm}(\mathcal{M}(A))$	120
8.2	Construction of the Soliton Graphs $\mathcal{C}_{\pm}(\mathcal{M}(A))$	125
8.2.1	The Soliton Graph $\mathcal{C}_{-}(\mathcal{M}(A))$	125
8.2.2	The Soliton Graph $\mathcal{C}_{+}(\mathcal{M}(A))$	128
	Problems	130
	References	133
