

Contents

1	The Fundamentals of the Theory of Integrability of Differential Systems	1
1.1	Existence and Properties of the First Integrals	1
1.1.1	Characterization and Properties of the First Integrals	3
1.1.2	Existence of First Integrals Near a Regular Point	7
1.2	First Integrals of Differential Systems in Canonical Regions	10
1.3	Applications of Integrability Theory to Partial Differential Equations	20
1.3.1	First-Order Linear Homogeneous Partial Differential Equations	21
1.3.2	First-Order Quasilinear Partial Differential Equations	23
1.4	Lax Pairs and Integrability	26
2	Jacobian and Inverse Jacobian Multipliers	35
2.1	Jacobian Multipliers, First Integrals and Integrability	35
2.2	Inverse Jacobian Multipliers and Their Vanishing Sets	45
2.3	Inverse Jacobian Multipliers and the Center-Focus Problem	59
2.3.1	The Center-Focus Problem via Inverse Integrating Factors or Inverse Jacobian Multipliers	61
2.3.2	Hopf Bifurcation via Inverse Jacobian Multipliers	73
2.4	Inverse Jacobian Multipliers via Lie Groups	79
3	Darboux and Liouvillian Integrability	89
3.1	The Classical Darboux Theory of Integrability	89
3.1.1	The Existence of Darboux First Integrals	90
3.1.2	The Darboux–Jouanolou Integrability Theorem	94
3.2	Generalization of the Classical Darboux Theory of Integrability	98
3.2.1	Taking into Account Independent Singularities	98
3.2.2	Taking into Account Algebraic Multiplicities	100

3.2.3	Taking into Account the Multiplicity of the Hyperplane at Infinity	113
3.2.4	On Nonautonomous Differential Systems via the Wronskian Matrix	115
3.2.5	Differential Systems in the Sparse Case	122
3.2.6	Other Extensions.	125
3.3	Liouville and Elementary First Integrals	126
3.3.1	Background on Differential Field Extensions	126
3.3.2	The Prelle and Singer Integrability Theorems	131
3.4	Liouvillian Integrability Versus Darboux Polynomials	145
4	Existence and Degree of Darboux Polynomials	149
4.1	The Degree of Invariant Algebraic Curves	149
4.1.1	Examples of Invariant Algebraic Curves of Arbitrary Degree.	150
4.1.2	Invariant Algebraic Curves in the Projective Plane	152
4.1.3	The Degree of Invariant Algebraic Curves in the Nodal and Nondicritical Cases	156
4.2	Existence of Darboux Polynomials	163
4.2.1	Polynomial Vector Fields Without Darboux Polynomials	164
4.2.2	Liénard Differential Systems: Invariant Algebraic Curves.	167
4.2.3	Lorenz Systems: Invariant Algebraic Surfaces.	177
4.3	Other Results on Darboux Polynomials	192
5	Algebraic, Analytic and Meromorphic Integrability	197
5.1	Algebraic First Integrals	197
5.1.1	Algebraic and Rational Integrability: Their Equivalence.	197
5.1.2	Kirchoff Equations: Polynomial and Rational First Integrals	200
5.1.3	Euler Equations on the Lie Algebra $\mathfrak{so}(4)$: Polynomial First Integrals	211
5.1.4	The 5-Dimensional Lorenz Systems: Darboux and Analytic Integrability.	216
5.2	Natural Hamiltonian Systems: Polynomial and Rational Integrability	221
5.2.1	Hamiltonian Systems in the Canonical Form	221
5.2.2	Hamiltonian Systems in a Generalized Form.	225
5.3	Hamiltonian Systems: Integrability via the Differential Galois Group	227
5.3.1	Hamiltonian Systems Having Homogeneous Potentials.	228
5.3.2	Hamiltonian Systems: Integrability via Other Extensions.	236

5.3.3	Extension of the Morales–Ramis Theory to General Systems.	239
5.4	Calculations of Rational First Integrals and Darboux Polynomials of Planar Polynomial Vector Fields	240
6	Applications of the Darboux Theory of Integrability	253
6.1	The Center Problem via the Darboux Theory of Integrability.	253
6.2	Algebraic Limit Cycles: Existence and Uniqueness	258
6.2.1	The Existence of Rational First Integrals via Intersection Numbers.	259
6.2.2	Quadratic Differential Systems: Algebraic Limit Cycles	265
6.3	Hilbert’s 16th Problem: A Weak Version on Algebraic Limit Cycles.	269
6.4	Applications to Concrete Models	276
6.4.1	Concrete Two-Dimensional Models in Applications	276
6.4.2	Concrete Three-Dimensional Models in Applications	277
6.4.3	Concrete Higher-Dimensional Models in Applications	282
6.4.4	Abel Equations and Foliations	283
7	Local Integrability of Differential Systems.	287
7.1	The Foundations of Poincaré Normal Form Theory	289
7.2	Local Analytic and Formal First Integrals.	295
7.2.1	Local Integrability via Partial Nonresonances	296
7.2.2	Local Integrability via Resonances	301
7.3	Local (Formal) Meromorphic First Integrals.	307
7.3.1	The Equivalence Between Algebraic and Functional Independence	308
7.3.2	The Lowest Order Parts of Functionally Independent First Integrals	309
7.3.3	Proof of the Results on Functionally Independent First Integrals	312
7.4	The Local Theory of Darboux Integrability	314
7.4.1	Local Darboux First Integrals	315
7.4.2	Applications of the Local Theory of Darboux Integrability.	318
7.5	Analytic Normalization of Analytic Integrable Systems	320
7.5.1	Equivalent Characterization of Analytic Integrable Systems.	320
7.5.2	Integrable Discrete Dynamical Systems and Embedding Flows.	329
7.6	Varieties and Normalization of Partially Integrable Systems.	334
7.6.1	Varieties of Partially Integrable Systems.	334
7.6.2	Analytic Normalization of Partially Integrable Systems.	341

7.6.3	Generic Divergence of Normalizations of Partially Integrable Systems	343
7.7	Other Results on Local Integrability	347
References	353
Index	373

Integrability of Dynamical Systems: Algebra and Analysis

Zhang, X.

2017, XV, 380 p. 6 illus., 1 illus. in color., Hardcover

ISBN: 978-981-10-4225-6
