

Contents

1	Introduction	1
1.1	Single-Molecule Junctions	1
1.2	Dependence of Electron Transport on the Metal and Molecule Species	3
1.3	Role of the Interface in the Electron Transport of Single-Molecule Junctions	3
1.4	Anchoring Groups and Direct- π -Binding Technique	5
1.5	Purpose of This Thesis	6
	References	7
2	Theoretical Background	11
2.1	Electric States in One-Dimensional Conductor	11
2.2	Electron Transport in Nano-Sized Conductor	13
2.3	Landauer–Büttiker Formula	14
2.4	Electron Transport in a Single-Molecule Junction	17
2.5	Coupling Between Electron Transport and Vibration	20
2.5.1	Inelastic Electron Tunneling Spectroscopy	20
2.5.2	Point-Contact Spectroscopy	21
2.5.3	d^2I/dV^2 Spectrum Behavior	21
	References	23
3	Experimental Concepts and Techniques	25
3.1	Fabrication of a Single-Molecule Junction	25
3.2	Breakdown and Reformation of the Metal Nano-Contact	26
3.3	Experimental Setup	29
3.3.1	MCBJ Setup	29
3.3.2	Two-Terminal Conductance Measurements	29
3.3.3	dI/dV Measurements	30
	References	31

4	Design of the Metal–Molecule Interaction at the Benzene	
	Single-Molecule Junction	33
4.1	Introduction	33
4.2	Experiments	34
4.3	Results and Discussion	34
4.3.1	Conductance Value and Configuration	34
4.3.2	High, Well-Defined Conductance Value	36
4.4	Conclusions	37
	References.	38
5	Design of the Interface Structure of a Single-Molecule Junction	
	Utilizing Spherical Endohedral Ce@C₈₂ Metallofullerenes.	39
5.1	Introduction	39
5.2	Experiments	40
5.3	Results and Discussion	41
5.3.1	Conductance of the Fullerene Molecule	41
5.3.2	Formation Process.	46
5.4	Conclusions	47
	References.	48
6	Anchoring Groups Enclosed in the π-Conjugated System	
	in N₂ Molecules	51
6.1	Introduction	51
6.2	Experiments	52
6.3	Results and Discussion	53
6.3.1	Conductance	53
6.3.2	Geometry of the Pt/N ₂ /Pt Junction	53
6.3.3	High Conductivity in Pt/N ₂ /Pt Junction.	56
6.3.4	Shape of the dI/dV and d^2I/dV^2 Spectra of the Pt/N ₂ /Pt Junction	56
6.3.5	Linear Cu Atomic Chain Formation in the Presence of N ₂	58
6.4	Conclusions	60
	References.	60
7	Controlling the Electrical Property of Highly Conductive	
	Pyrazine Single-Molecule Junction.	63
7.1	Introduction	63
7.2	Experiments	65
7.3	Results and Discussion	66
7.3.1	Two Conductance States in Pt/Pyrazine/Pt Junction	66
7.3.2	Assignment of the Structures to the Two Conductance States	68
7.3.3	Electronic States of the Bi-Stable States	71

Contents	xiii
7.4 Control of the Electrical Conductance	74
7.5 Conclusions and Outlook	75
References.	76
8 General Conclusions	79
Curriculum Vitae	83

Design and Control of Highly Conductive
Single-Molecule Junctions

A Focus on the Metal-Molecule Interface

Kaneko, S.

2017, XIII, 84 p. 40 illus., 38 illus. in color., Hardcover

ISBN: 978-981-10-4411-3
