

Contents

1	Introduction	1
1.1	Background	1
1.2	Collection of Roadside Video Data	2
1.2.1	Industry Data	2
1.2.2	Benchmark Data	7
1.3	Applications Using Roadside Video Data	10
1.4	Outline of the Book	11
	References	12
2	Roadside Video Data Analysis Framework	13
2.1	Overview	13
2.2	Methodology	14
2.2.1	Pre-processing of Roadside Video Data	14
2.2.2	Segmentation of Roadside Video Data into Objects	18
2.2.3	Feature Extraction from Objects	19
2.2.4	Classification of Roadside Objects	20
2.2.5	Applications of Classified Roadside Objects	21
2.3	Related Work	23
2.3.1	Vegetation Segmentation and Classification	24
2.3.2	Generic Object Segmentation and Classification	28
2.4	Matlab Code for Data Processing	32
	References	37
3	Non-deep Learning Techniques for Roadside Video Data Analysis	41
3.1	Neural Network Learning	41
3.1.1	Introduction	41
3.1.2	Neural Network Learning Approach	42
3.1.3	Experimental Results	45
3.1.4	Summary	48

3.2	Support Vector Machine Learning	49
3.2.1	Introduction	49
3.2.2	SVM Learning Approach	49
3.2.3	Experimental Results	53
3.2.4	Summary	56
3.3	Clustering Learning	56
3.3.1	Introduction	56
3.3.2	Clustering Learning Approach	57
3.3.3	Experimental Results	62
3.3.4	Summary	73
3.4	Fuzzy C-Means Learning	74
3.4.1	Introduction	74
3.4.2	Fuzzy C-Means Learning Approach	75
3.4.3	Experimental Results	78
3.4.4	Summary	80
3.5	Ensemble Learning	80
3.5.1	Introduction	80
3.5.2	Ensemble Learning Approach	80
3.5.3	Experimental Results	84
3.5.4	Summary	86
3.6	Majority Voting Based Hybrid Learning	86
3.6.1	Introduction	86
3.6.2	Majority Voting Approach	87
3.6.3	Experimental Results	90
3.6.4	Summary	94
3.7	Region Merging Learning	95
3.7.1	Introduction	95
3.7.2	Region Merging Approach	95
3.7.3	Components of Approach	100
3.7.4	Experimental Results	109
3.7.5	Summary	115
	References	116
4	Deep Learning Techniques for Roadside Video Data Analysis	119
4.1	Introduction	119
4.2	Related Work	120
4.3	Automatic Versus Manual Feature Extraction	122
4.3.1	Introduction	122
4.3.2	Comparison Framework	122
4.3.3	Experimental Results	124
4.3.4	Summary	125
4.4	Single Versus Ensemble Architectures	127
4.4.1	Introduction	127
4.4.2	Comparison Framework	128

4.4.3	Experimental Results	129
4.4.4	Summary	131
4.5	Deep Learning Network	131
4.5.1	Introduction	131
4.5.2	Deep Learning Network	133
4.5.3	Experimental Results	143
4.5.4	Discussions	152
4.5.5	Summary	154
	References	154
5	Case Study: Roadside Video Data Analysis for Fire Risk Assessment	159
5.1	Introduction	159
5.2	Related Work	160
5.3	Proposed VOCGP Approach	162
5.3.1	Problem Formulation and Motivations	162
5.3.2	Overview of Approach	163
5.3.3	Grass Region Segmentation	164
5.3.4	Gabor Filter Voting for Dominant Vertical Orientation Detection	165
5.3.5	Vertical Orientation Connectivity of Grass Pixels Calculation	167
5.4	Experimental Results	171
5.4.1	Roadside Data Collection	171
5.4.2	Experimental Settings	172
5.4.3	Performance of Estimating Grass Biomass	173
5.4.4	Performance of Predicting Grass Density	176
5.4.5	Fire-Prone Region Identification	177
5.5	Discussions	180
5.6	Summary	182
	References	182
6	Conclusion and Future Insight	185
6.1	Recommendations	185
6.2	New Challenges	187
6.3	New Opportunities and Applications	188

Roadside Video Data Analysis

Deep Learning

Verma, B.; Zhang, L.; Stockwell, D.

2017, XXV, 189 p. 79 illus., 68 illus. in color., Hardcover

ISBN: 978-981-10-4538-7
