

# Contents

<b>1</b>	<b>Introduction</b>	<b>1</b>
1.1	Parameters	3
1.1.1	Demand	3
1.1.2	Procurement Cost	5
1.1.3	Cycle Time	6
1.1.4	Ordering Cost	6
1.1.5	Inventory Carrying Cost	8
1.1.6	Inventory Stock	9
1.1.7	Stock Out Level	9
1.1.8	Stock Out Cost	10
1.2	Economic Lot Size	11
1.3	Interaction of Inventory Parameters	20
1.3.1	Basic Case Without Stock Outs	21
1.3.2	With Stock Out	22
<b>2</b>	<b>Demand</b>	<b>25</b>
2.1	Increase in Demand	27
2.2	Decrease in Demand	30
2.3	Stock Out Situation	32
2.3.1	Demand Increase	34
2.3.2	Demand Decrease	36
2.4	Demand Estimation for Variety of Products	40
2.4.1	FMCG	41
2.4.2	Pharmaceutical	41
2.4.3	Agricultural	42
2.4.4	Hi-Tech	43
<b>3</b>	<b>Ordering Cost</b>	<b>45</b>
3.1	Estimation of Ordering Cost	45
3.2	Ordering Cost Decrease	48
3.3	Ordering Cost Increase	51

3.4	Inclusion of Shortages . . . . .	54
3.4.1	Reduction in Ordering Cost . . . . .	54
3.4.2	Increase in Ordering Cost . . . . .	57
3.5	Interaction of Ordering Cost and Demand . . . . .	58
3.6	Ordering Cost Estimation for Variety of Products . . . . .	67
3.6.1	FMCG . . . . .	67
3.6.2	Pharmaceutical . . . . .	67
3.6.3	Food Products . . . . .	68
3.6.4	Hi-Tech . . . . .	69
<b>4</b>	<b>Inventory Carrying Cost . . . . .</b>	<b>71</b>
4.1	Carrying Cost Estimation . . . . .	71
4.2	Increase in Holding Cost . . . . .	73
4.3	Decrease in Holding Cost . . . . .	76
4.4	Backordering Scenario . . . . .	80
4.4.1	Carrying Cost Increase . . . . .	80
4.4.2	Carrying Cost Reduction . . . . .	82
4.5	Interaction of Holding Cost with Other Parameters . . . . .	83
4.6	Response with a Combination of Parameters . . . . .	97
4.6.1	Without Stock Outs . . . . .	97
4.6.2	With Stock Outs . . . . .	102
4.7	Carrying Cost Estimation for Various Products . . . . .	108
4.7.1	FMCG . . . . .	108
4.7.2	Pharmaceutical . . . . .	109
4.7.3	Food/Agricultural Products . . . . .	109
4.7.4	Hi-Tech . . . . .	110
<b>5</b>	<b>Procurement Cost . . . . .</b>	<b>111</b>
5.1	Procurement Cost Reduction . . . . .	112
5.2	Procurement Cost Increase . . . . .	115
5.3	Stock Out Inclusion . . . . .	119
5.3.1	Decreased Purchase Cost . . . . .	120
5.3.2	Increased Purchase Cost . . . . .	122
5.4	Interaction of Procurement Cost with Other Parameters . . . . .	124
<b>6</b>	<b>Cycle Time . . . . .</b>	<b>131</b>
6.1	Significance of Cycle Time . . . . .	131
6.2	Cycle Time Variation . . . . .	135
6.2.1	Reduced Cycle Time . . . . .	137
6.2.2	Increased Cycle Time . . . . .	139
6.3	Backlogging Situation . . . . .	142
6.3.1	Upward Variation in Cycle Time . . . . .	147
6.3.2	Downward Variation in Cycle Time . . . . .	151
6.4	Interaction of Parameters Without Stock Out . . . . .	155
6.4.1	Decreased Cycle Time . . . . .	155
6.4.2	Higher Cycle Time . . . . .	157

6.5	Interaction of Parameters with Stock Out. . . . .	161
6.5.1	Increased Cycle Time. . . . .	161
6.5.2	Lower Cycle Time . . . . .	171
<b>7</b>	<b>Stock Out . . . . .</b>	<b>187</b>
7.1	Stock Out Cost Estimation. . . . .	187
7.2	Shortage Cost Increase. . . . .	190
7.3	Shortage Cost Decrease . . . . .	193
7.4	Interaction with the Parameters . . . . .	197
7.4.1	Interaction with the Demand . . . . .	198
7.4.2	Interaction with the Ordering Cost . . . . .	201
7.4.3	Interaction with the Holding Cost. . . . .	205
7.5	Variation of $K$ Triggered by Change in Other Parameters . . . . .	209
7.5.1	Demand Variation . . . . .	209
7.5.2	Ordering Cost Variation . . . . .	211
7.5.3	Holding Cost Increase . . . . .	212
7.6	Response with a Combination of Parameters . . . . .	214
7.6.1	With an Aim of Similar Lot Size . . . . .	214
7.6.2	With an Aim of Similar Total Cost . . . . .	223
7.7	Stock Out Cost Estimation for Various Products . . . . .	232
7.7.1	FMCG . . . . .	233
7.7.2	Pharmaceutical . . . . .	233
7.7.3	Agricultural . . . . .	233
7.7.4	Hi-tech . . . . .	234
