

# Contents

<b>1</b>	<b>Introduction</b>	1
1.1	Introduction on Train Operation Problem in Emergencies	1
1.1.1	Statement of the Problem	1
1.1.2	Systems on Railway Train Operation Dispatching	2
1.1.3	Future Railway Operation Dispatching Mode	3
1.1.4	Significance and Necessity of This Research	4
1.2	Related Works Review and Analysis	5
1.2.1	Related Works on This Problem	5
1.2.2	Analysis on the Publications	11
1.3	Structure of This Book	12
	References	13
<b>2</b>	<b>Theories on Train Operation in Emergencies</b>	19
2.1	Introduction on Emergencies	19
2.1.1	Definition and Classification of Railway Emergency Events	20
2.1.2	Characteristics of Railway Emergency Events	23
2.2	Railway Transport System in Emergencies	25
2.2.1	System Type of Railway Transportation System	25
2.2.2	System Composition	26
2.2.3	Boundary of the System	27
2.2.4	Function and Behavior of the System	27
2.2.5	Evolution and Reconstruction of the System	28
2.3	Macroscopic Model of Railway Transport Organization in Emergencies	29
2.3.1	General Principles and Methods of Emergency Handling in Emergencies	29
2.3.2	Macroscopic Model of Railway Transport Organization in Emergencies	31
2.4	Difference Between Train Operation Organization and Normal Condition in Emergencies	34

2.4.1	Different Goals of Transport Organization . . . . .	34
2.4.2	Different Orders of Operation Plan . . . . .	36
2.5	Train Operation Organization Strategy in Emergencies. . . . .	36
2.5.1	Connotation of Train Operation Organization in Emergencies . . . . .	36
2.5.2	Basic View of Train Operation Organization in Emergencies . . . . .	38
2.5.3	Basic Method of Train Operation Organization in Emergencies . . . . .	39
2.5.4	Principles and Measures of Train Operation Organization in Emergencies . . . . .	40
	References. . . . .	41
<b>3</b>	<b>Transport Organization Mode in Emergencies . . . . .</b>	<b>43</b>
3.1	Transportation Organization Modes . . . . .	43
3.1.1	Different Transportation Organization Modes of High-Speed Railway of Several Representative Countries and Regions . . . . .	43
3.1.2	Analysis of Different Kinds of Transportation Modes . . . . .	47
3.2	Transport Organization Modes in Emergencies. . . . .	48
3.2.1	The Necessity of Adjusting Transportation Organization Mode in Emergencies . . . . .	48
3.2.2	The Feasibility of Adjusting the Transportation Organization Mode in Emergencies. . . . .	49
3.2.3	The Model of Transportation Organization Mode Selection in Emergencies . . . . .	50
	Reference . . . . .	52
<b>4</b>	<b>Calculation of Railway Transport Capacity in an Emergency Based on Markov Process. . . . .</b>	<b>53</b>
4.1	Introduction . . . . .	53
4.2	The Effect of an Emergency on Section Capacity. . . . .	54
4.3	The Transport Capacity Calculating Strategy in an Emergency . . . . .	54
4.4	Calculating Algorithm . . . . .	55
4.4.1	Brief Summary . . . . .	57
	References. . . . .	57
<b>5</b>	<b>Line Planning in Emergencies for Railway Network . . . . .</b>	<b>59</b>
5.1	Introduction to Line Planning in Emergencies . . . . .	59
5.2	Related Works to Transportation Capacity Calculation. . . . .	60
5.3	Modeling for Line Planning in Emergencies. . . . .	61
5.3.1	Basics of the Model . . . . .	62
5.3.2	Building Line Plan Generating Model. . . . .	63
5.4	Solving the Line Plan Generating Model Under Condition of Accident . . . . .	64

5.4.1	Determining the Frequency of the Different Types of Trains. . . . .	65
5.4.2	Designing the Stops of the Trains. . . . .	65
5.5	Simulation Example . . . . .	68
5.5.1	Assumption of the Case . . . . .	68
5.5.2	Available Paths . . . . .	71
5.5.3	Frequency Setting and Stops Setting for This Case. . . . .	72
5.5.4	Analysis of the Computing Results . . . . .	73
5.6	Brief Summary . . . . .	73
	References. . . . .	74
<b>6</b>	<b>Train Re-Pathing in Emergencies Based on Fuzzy Linear Programming. . . . .</b>	<b>75</b>
6.1	Introduction . . . . .	75
6.2	Related Works . . . . .	76
6.3	Train Re-Pathing Model . . . . .	78
6.3.1	Basic Assumption . . . . .	78
6.3.2	Graph-Based Description of Rail Networks. . . . .	78
6.3.3	Available Paths Set Generating . . . . .	78
6.3.4	Optimization Objectives . . . . .	79
6.3.5	Train Distribution Model. . . . .	80
6.4	Fuzzy Coefficients Processing and Train Re-Pathing Model Solution. . . . .	82
6.4.1	Fuzzy Coefficients Processing . . . . .	82
6.4.2	Steps to Solve Train Distribution Model. . . . .	84
6.5	Case Study . . . . .	85
6.5.1	Case Scenario . . . . .	85
6.5.2	Trains to Be Re-Pathing . . . . .	85
6.5.3	Available Paths . . . . .	86
6.5.4	Distribution Plan . . . . .	87
6.6	Brief Summary . . . . .	93
	References. . . . .	93
<b>7</b>	<b>Train Re-scheduling Based on an Improved Fuzzy Linear Programming Model . . . . .</b>	<b>95</b>
7.1	Introduction on Train Re-scheduling. . . . .	95
7.2	Problem Statement . . . . .	100
7.2.1	Objective of Train Re-Scheduling Model . . . . .	100
7.2.2	System Constraints . . . . .	101
7.2.3	Mathematical Model . . . . .	102
7.3	Fuzzy Linear Programming with Fuzzy Resource Constraints Theory . . . . .	103
7.3.1	Fuzzy Linear Programming with Fuzzy Resources . . . . .	103
7.3.2	Fuzzy Linear Programming of Resources with Fuzzy Coefficients Boundaries of Fuzzy Resources. . . . .	104

7.4	Improved Fuzzy Linear Programming Model for Train Re-scheduling . . . . .	105
7.5	Computation Cases and Analysis . . . . .	107
7.5.1	Results of the Computation Cases. . . . .	107
7.5.2	Analysis of the Computation Cases. . . . .	120
7.6	Brief Summary . . . . .	136
	References. . . . .	136

Train Operation in Emergencies

Jia, L.; Meng, X.; Qin, Y.

2017, XI, 138 p. 22 illus., 9 illus. in color., Hardcover

ISBN: 978-981-10-4596-7
