1 Theoretical Comparison of Supply Side Economics and Demand Side Economics	1
1.1 Supply and Demand in Market Mechanism	1
1.1.1 The Origin of Supply and Demand	1
1.1.2 The Theoretical Framework of Supply and Demand	2
1.2 Basic Theories of Supply Side Economics and Demand Side Economics	4
1.2.1 Demand Economics with Its Core “Three Carriages”	4
1.2.2 Relevant Theories on the Demand Side	7
1.2.3 Supply Economics with Its Core Theory of “Four Factors”	9
1.2.4 Relevant Theories on the Supply Side	11
1.3 Reflection and Transcendence of Supply Side Economics and Demand Side Economics	13
1.3.1 Reflection on Division of Economy into Supply and Demand	13
1.3.2 Evaluation of Supply Side and Demand Side Policies	15
1.3.3 Economic Theories Beyond Supply and Demand	18
1.4 Study and Discussion in the Chinese Economic Academia	21
1.4.1 The Formation and Development of the Theory of Socialist Market Economy	22
1.4.2 Economic Researches on the Supply Side and Demand Side in China	23
1.4.3 Structural Reform Theories on the Supply Side	27
1.5 Proposal of China’s Structural Reform on the Supply Side	28
2 Generation and Development of the Structural Reform on the Supply Side in the Global Perspective	31
2.1 Historical Background of the Structural Reform on the Supply Side in Major Economies	31

2.1.1	The Relationship of the Supply and Demand Broken by Globalization	32
2.1.2	Advantages Brought by Technological Innovation in Competitions	33
2.1.3	The Extension of Market Economy as the Foundation for the Global System of Supply and Demand	35
2.1.4	Multinational Corporations as the Leading Force in the Adjustment of Aggregate Supply and Demand	36
2.2	Development Dilemma of the Structural Reform on the Supply Side in Major Economies	37
2.2.1	The Coexistence of Economic Stagnation and Inflation	38
2.2.2	Imbalance Between Financial Revenue and Expenditure	42
2.2.3	Slow Structural Adjustment Leads to Low Production Efficiency	42
2.2.4	Social Conflicts and Structural Problems	48
2.3	Implementation of the Structural Reform on the Supply Side in Major Economies	49
2.3.1	The “New Right” as the Theoretical Foundation for the Structural Reform on the Supply Side	50
2.3.2	The Prelude to the Structural Reform on the Supply Side	51
2.3.3	Goals of Structural Reform on the Supply Side	53
2.3.4	Characteristics of Structural Reform on the Supply Side	54
2.4	Major Tactics of the Structural Reform on the Supply Side in Major Economies	56
2.4.1	Readjustment of the Government-Market Relationship	56
2.4.2	Readjustment of the Government-Enterprise Relationship	58
2.4.3	Readjustment of the Government–Individual Relationship	59
2.4.4	Readjustment of the Labor-Capital Relationship	60
2.4.5	Readjustment of the Macro and Micro Structures	61
3	Policy and Assessment of Structural Reform on the Supply Side in the Global Perspective	63
3.1	Economic Policy of the Structural Reform on the Supply Side in Major Economies	63
3.1.1	The Aggregate Adjustment Policies	63
3.1.2	Adjustment Policies on Departments	65
3.1.3	Adjustment Policies on Enterprises	72

3.2	The Social Policies Conducted by Major Economies in the Supply Side Structural Reform	83
3.2.1	Policies Regarding the Reform of Trade Union	83
3.2.2	Policies of Housing System Reform	84
3.2.3	Policies of Education Reform	85
3.2.4	Policies of Health Care Reform.	88
3.2.5	Policies of the Reform of the Relief System	91
3.3	Performance Measurement of the Structural Reform on the Supply Side in Major Economies	93
3.3.1	Four Major Successes	93
3.3.2	Six Major Problems	99
3.4	Lessons and Inspirations of the Structural Reform for Supply Side in Major Economies	102
3.4.1	Three Insights in Terms of Ideas.	102
3.4.2	Six Insights in Terms of Measures	103
4	Status Quo and Risks of Structural Reforms Under the New Normal	107
4.1	Analysis on the Characteristics and Risks of China's Economy Under the New Normal	107
4.1.1	Characteristics of China's Economy Under the New Normal	107
4.1.2	Risk Analysis of China's Economy Under the New Normal	112
4.2	Structural Problems of China's Economy Under the New Normal and the Analysis of Their Root Causes.	117
4.2.1	Structural Problems of China's Economy Under the New Normal	117
4.2.2	The Roots of China's Structural Problems in the New Normal	126
4.3	Difference Analysis on the Structural Reforms of China and Other Main Countries in the World	130
4.3.1	China's Reform Is Based on a Different Theory	131
4.3.2	China's Supply Side Reform Confronts Formidable Difficulties.	132
4.3.3	China's Plan Boasts Huge Potentials.	133
4.4	Difficulties for China in Implementing Its Supply Side Reform	133
4.4.1	Maintaining Good Tempo of the Reform	134
4.4.2	Deal with Relations Within the Framework of Reform	134
4.4.3	Prevent Risks Brought by Reform.	135

5 Theories and Practices of Supply Side Reform

Under New Normal	137
5.1 The Background of China's Supply Side Reform	137
5.1.1 The Background Under Which China Plans to Reform the Supply Side	137
5.1.2 Analysis of and Review on Opinions About Supply Side Reform	142
5.2 Understanding China's Supply Side Reform	145
5.2.1 Foci of China's Supply Side Reform	145
5.2.2 The Significant Objective of China's Supply Side Reform	146
5.2.3 Driving Forces of China's Supply Side Reform	146
5.3 Theoretical System of Political Economics of Chinese Socialism	147
5.3.1 The Formation and Development of the Political Economics of Chinese Socialism	147
5.3.2 Theoretical Framework of Socialist Political Economics with Chinese Characteristics	149
5.4 The Political Economics of Chinese Socialism and Reform of the Supply Side	153
5.4.1 Reform of the Supply Side Regarding Productive Factors	153
5.4.2 Supply Side Reform Aimed at Enterprise Production	155
5.5 Theoretical Logic of Chinese New Supply Economics Theory	156
5.5.1 The Goal of Structural Reform of Supply Side Is to Realize Efficient and Sustainable Growth	157
5.5.2 The Realization of Efficient and Sustainable Growth Calls for the Synergy of Structural Reform of Supply Side and Management of Demand Side	157
5.5.3 Endogenous Variables of Structural Reform of the Supply Side Serves as the Inner Motive for Continuous Growth; The Mechanism Is to Realize the Maximum Efficiency of Production Factors	158
5.5.4 With Their Mechanism to Seek for the Maximum Efficiency of Economic Development, Exogenous Variables (Institution, Structure and New Supply of Policy) of Structural Reform of the Supply Side Are the External Locomotive of Continuous Growth	159
5.5.5 The Structural Reform of the Supply Side Should Be Based on New Development Ideas, and Give Decisive Play to Market and Allow the Government to Play Its Role Better	161

5.6	Strategic Approach of Chinese Structural Reform of the Supply Side	163
5.6.1	The Method of the Structural Reform of the Supply Side	163
5.6.2	Strategic Path of Chinese Structural Reform of the Supply Side.	165
6	Structural Reform of the Supply Side and Endogenous Variables (New Supply of Factors).	169
6.1	Total Factor Productivity and Economic Growth	169
6.1.1	Evaluation of Total Factor Productivity.	170
6.1.2	Analysis of Source of Total Factor Productivity and Economic Growth	175
6.1.3	Major Problems Restricting Factor Allocation Efficiency	176
6.2	Factor Allocation Efficiency and the Supply of Labor, Capital and Technology	180
6.2.1	Potential of the Supply of the Demographic Dividend and Labor Force	180
6.2.2	Monetary Capital Market Reform and Capital Allocation Efficiency	186
6.2.3	Supply of Technology Factors and National Innovative System Construction	193
6.3	The Intensification and Supply of Land Factors	200
6.3.1	Rural Land Reform and the Integration of Urban and Rural Land Markets	200
6.3.2	New Urbanization and Economical and Intensive Use of Land	205
6.3.3	Breakthroughs of Reform of Distribution System of Land Added-Value Revenue.	211
7	Supply Side Structural Reform and Exogenous Variables (Supply of New Institutions, Supply of New Structures, and Supply of New Policies).	219
7.1	Institutions, Structures, Policies and Economic Growth	219
7.1.1	Institutional Innovation and Economic Growth.	220
7.1.2	Structural Adjustment and Economic Growth	221
7.1.3	Policies Supply and Economic Growth	223
7.2	Market Reform and Supply of New Institutions	224
7.2.1	Government Performance and Power Boundary	225
7.2.2	Market Mechanisms and Market Institutions.	228
7.2.3	State-Owned Assets and Enterprises Governance and Market-Based Reform	231

7.3	Structural Adjustment and Supply of New Structures.	234
7.3.1	Optimization and Adjustment of Industrial Supply Side Structures	234
7.3.2	New Type of Urbanization and Well-Balanced Adjustment of Urban and Rural Structures	239
7.3.3	Coordinated Adjustment Between New Growth Poles of City Clusters and Regional Structures.	242
7.4	Resolving of Risks and Supply of New Policies.	245
7.4.1	Overcapacity and Policies	245
7.4.2	Financial Risks and Policies	247
7.4.3	Enterprises Costs and Policies	248
8	Co-ordination of Supply Side Structural Reform and Demand Side Management	251
8.1	Total Supply and Demand Analysis and Macro Regulation	251
8.1.1	Trend of Total Supply and Total Demand Since the Reform and Opening-Up.	252
8.1.2	Total Supply and Demand and Macro Regulation.	258
8.2	Coordination of Supply Side Reform and Demand Side Management.	264
8.2.1	Integration of Supply Side Reform and Demand Side Management	264
8.2.2	Policy Objectives of the Coordination of Supply Side Reform and Demand Side Management	265
8.3	Supply Side Reform, Consumption Upgrading, Effective Investment and Foreign Trade Transformation	266
8.3.1	Supply Side Reform and Consumption Upgrading	266
8.3.2	Supply Side Reform and Effective Investment	271
8.3.3	Supply Side Reform and Foreign Trade Transformation	275
9	Supply Side Structural Reform and Sustained Growth of Economy	283
9.1	Analysis of Economic Transformation, Total Supply and Demand Structure and Economic Fluctuation	283
9.1.1	Total Supply and Demand Structures and Economic Operation	284
9.1.2	Characteristics Analysis of China's Economic Fluctuation	286
9.1.3	Impetus Structure of Total Supply and Demand and Economic Fluctuation.	289
9.1.4	Imbalance of Total Supply and Demand and Economic Fluctuation	296

9.2	Supply Side Structural Reform and China's Economic Growth Potential Analysis	299
9.2.1	Input of Labor and Capital and Potential Growth Rate	300
9.2.2	Technological Progress and Potential Growth Rate	303
9.2.3	Institutional Innovation and Potential Growth Rate	305
9.2.4	Optimization of Industrial Structure and Potential Growth Rate	306
9.3	Supply Side Structural Reform and Prediction of China's Economic Growth Trend	308
9.3.1	Global Structural Reform and World Economic Growth Prospects	308
9.3.2	The Overall Trend of China's Medium and Long Term Economic Growth	310
9.3.3	Predication of Medium- and Long-Term Growth Rates of China's Economy	311
9.3.4	Predication of Medium- and Long-Term Economic Aggregate of China's Economy	312
9.3.5	Prediction of China's Medium- and Long-Term Economic Growth Structure	313
	Postscript	315
