

Contents

1	General Introduction	1
1.1	Structure	1
1.2	Reactivity	2
1.3	Other Applications	3
1.4	Preparation	4
1.5	Copper(I) Catalysis for Selective Borylation	6
1.6	Overview	9
	References	9
2	Copper(I)-Catalyzed Direct Boryl Substitution of Unactivated Alkyl Halides	11
2.1	Introduction	11
2.2	Results and Discussion	12
2.3	Summary	17
2.4	Experimental	17
2.4.1	General	17
2.4.2	Starting Materials	18
2.4.3	Representative Procedure for Borylation	18
	References	24
3	Copper(I)-Catalyzed Intermolecular Borylative Exo-cyclization of Alkenyl Halides Containing Unactivated Double Bond	27
3.1	Introduction	27
3.2	Results and Discussion	29
3.3	Conclusion	41
3.4	Experimental	41
3.4.1	General	41
3.4.2	Characterization of Borylation Products	51
3.4.3	Derivatization of Borylative Cyclization Products	58

3.5	Details of DFT Calculations	64
3.5.1	Distortion/Interaction Analysis	65
3.5.2	Structure Analysis of Stationary Points for Various Ligands	65
3.5.3	Structure Analysis of Reaction Pathways in the Reaction of Propene	67
	References.	68
4	Copper(I)-Catalyzed Regio- and Enantioselective Monoborylation of Alkenylsilanes	71
4.1	Introduction	71
4.2	Results and Discussion	73
4.3	Conclusion	78
4.4	Experimental.	78
4.4.1	General	78
4.4.2	Preparation of Substrates.	79
4.4.3	Stepwise Transformations of Hydroboration Products	95
	References.	97
5	Copper(I)-Catalyzed Enantioselective Nucleophilic Borylation of Aldehydes	99
5.1	Introduction	99
5.2	Results and Discussion	101
5.3	Conclusion	108
5.4	Experimental.	109
5.4.1	General	109
5.4.2	Borylation Product Characterization	115
5.4.3	Borylation Product Functionalization Procedure	123
	References.	126
6	Computational Insight into the Enantioselective Borylation of Aldehydes Catalyzed by Chiral Bisphosphine Copper(I) Complexes	129
6.1	Introduction	129
6.2	Results and Discussion.	132
6.2.1	Investigation on the Origin of Regioselectivity	132
6.2.2	Investigation on the Mechanism for Enantioselectivity	135
6.2.3	Investigation on the Effect of a Proton Source in the Enantioselective Borylation of Aldehydes	137
6.3	Conclusion	143
6.4	Details of DFT Calculations	144
	References.	144

7	Copper(I)-Catalyzed Enantioselective Borylative Dearomatization of Indoles	147
7.1	Introduction	147
7.2	Results and Discussion	149
7.3	Conclusion	154
7.4	Experimental	155
7.4.1	General	155
7.4.2	General Experimental Procedures	155
7.4.3	Substrate Preparation	157
7.4.4	Determination of Diastereomeric Ratio Values	163
7.4.5	Borylation Product Characterization	164
7.4.6	(<i>S,R</i>)-1-Benzyl 2-ethyl 3-(4,4,5,5-tetramethyl-1,3,2-dioxaborolan-2-yl)indoline-1,2-dicarboxylate [(<i>S,R</i>)-3h]	168
7.4.7	Borylation Product Functionalization Procedure	171
7.4.8	Determination of the Absolute Configurations	172
7.4.9	Details of DFT Calculations	172
	References	176
8	Copper(I)-Catalyzed Regio- and Enantioselective Borylation of 1,2-Dihydropyridines	179
8.1	Introduction	179
8.2	Results and Discussion	181
8.3	Conclusion	187
8.4	Experimental	187
8.4.1	General	187
8.4.2	Procedure for the Copper(I)-Catalyzed Enantioselective Borylation of 1,2-dihydropyridines 2a (Table 8.1)	188
8.4.3	Borylation Product Characterization	189
8.4.4	Borylation Product Functionalization Procedure	197
	References	206
9	Summary and Outlook	209
	Curriculum Vitae	211

Synthesis of Functionalized Organoboron Compounds
Through Copper(I) Catalysis

Kubota, K.

2017, XIII, 213 p. 225 illus., Hardcover

ISBN: 978-981-10-4934-7
