1	Introduction to Endohedral Fullerenes with the C₆₀ Cage	1
1.1	Fullerenes	1
1.2	Endohedral Metallo[60]Fullerenes	2
1.2.1	Origin of Endohedral [60]Fullerenes Studies	3
1.2.2	Extraction and Purification of Endohedral Metallo[60] Fullerenes	3
1.2.3	Chemical Modification of Endohedral Metallo[60] Fullerenes	6
1.2.4	Endohedral Metallo[60]Fullerenes with Late Transition Metals	7
1.3	Endohedral Nonmetal-Containing [60]Fullerenes	7
1.3.1	High Temperature and Pressure for Noble Gas Encapsulation	8
1.3.2	Molecular Surgery for Encapsulation	8
1.3.3	Nitrogen Atom-Containing [60]Fullerenes	10
1.4	Endohedral Lithium-Containing [60]Fullerenes	11
	References	12
2	History of Li@C₆₀	15
2.1	Introduction	15
2.2	Detection of Alkali Metal-Containing C ₆₀	16
2.3	Ion Implantation Method and Purification	17
2.4	Properties of Li@C ₆₀ in Early Research	20
2.5	Conclusion	21
	References	22
3	Synthesis and Characterization of Lithium-Ion-Containing Fullerene	25
3.1	Introduction	25
3.2	“Plasma Shower Method” for Efficient Encapsulation of Lithium Atom in the C ₆₀ Cage	26

3.3	Oxidation of $\text{Li}@\text{C}_{60}$ to $\text{Li}^+@\text{C}_{60}^-$	30
3.4	Purification Protocol	31
3.5	Characterization of $\text{Li}^+@\text{C}_{60}$	32
3.6	Conclusion	37
	References.	37
4	$\text{Li}^+@\text{C}_{60}$ Salts: Crystal Structures and Properties	39
4.1	Introduction	39
4.2	Crystal Structure of $[\text{Li}^+@\text{C}_{60}]\text{PF}_6^-$	40
4.3	Crystal Structure of $[\text{Li}^+@\text{C}_{60}]\text{SbCl}_6^-$	42
4.4	Enhanced Solubility Through Counter Anion Exchange	44
4.5	Conclusion	47
4.6	Experimental.	47
	References.	48
5	Chemical Modification of $\text{Li}^+@\text{C}_{60}$	51
5.1	Introduction	51
5.2	Reaction with Diazoalkane: Synthesis of $\text{Li}^+@\text{PCBM}$	52
5.3	Diels–Alder Reactions of $\text{Li}^+@\text{C}_{60}$	56
5.3.1	Diels–Alder Reaction of $\text{Li}^+@\text{C}_{60}$ with Cyclopentadiene	57
5.3.2	Diels–Alder Reaction of $\text{Li}^+@\text{C}_{60}$ with Cyclohexadiene	57
5.4	Crystal Structure Determination of [5,6]- and [6,6]- $\text{Li}^+@\text{C}_{61}\text{Ph}_2$	62
5.5	Hydroxylation of $\text{Li}^+@\text{C}_{60}$	69
5.6	Organometallic Complex of $\text{Li}^+@\text{C}_{60}$	73
5.7	Supramolecular Complex of $\text{Li}^+@\text{C}_{60}$	77
5.8	Conclusion	81
5.9	Experimental.	81
	References.	85
6	Photoinduced Electron Transfer in $\text{Li}^+@\text{C}_{60}$	89
6.1	Introduction	89
6.2	Photoexcited State of $\text{Li}^+@\text{C}_{60}$	90
6.3	Photoinduced Electron Transfer Reduction of $\text{Li}^+@\text{C}_{60}$	91
6.4	Photoinduced Electron Transfer in Supramolecular Systems.	92
6.5	Ion-Induced Electron Transfer	97
6.6	Photoinduced Electron Transfer in Three-Component Supramolecular Systems	98
6.7	Supramolecular Photovoltaic Systems Using $\text{Li}^+@\text{C}_{60}$	100
6.8	Conclusion	102

Endohedral Lithium-containing Fullerenes
Preparation, Derivatization, and Application

Matsuo, Y.; Okada, H.; Ueno, H.

2017, XIV, 140 p. 113 illus., 68 illus. in color., Hardcover

ISBN: 978-981-10-5003-9
