

Contents

Part I Mathematics

- 1 Hole: An Emerging Character in the Story of Radio k -Coloring Problem** 3
Ushnish Sarkar and Avishek Adhikari
- 2 Robust Control of Stochastic Structures Using Minimum Norm Quadratic Partial Eigenvalue Assignment Technique** 43
Kundan Goswami, Sonjoy Das and Biswa Nath Datta
- 3 Single-Time and Multi-Time Hamilton–Jacobi Theory Based on Higher Order Lagrangians** 71
Savin Treanță and Constantin Udriște

Part II Statistics

- 4 On Wavelet-Based Methods for Noise Reduction of cDNA Microarray Images** 99
Tamanna Howlader, S. M. Mahbubur Rahman
and Yogendra Prasad Chaubey
- 5 A Transformation for the Analysis of Unimodal Hazard Rate Lifetimes Data** 121
Kobby Asubonteng, Govind S. Mudholkar and Alan Hutson
- 6 The Power M-Gaussian Distribution: An R-Symmetric Analog of the Exponential-Power Distribution** 141
Saria Salah Awadalla, Govind S. Mudholkar and Ziji Yu
- 7 Stochastic Volatility Models (SVM) in the Analysis of Drought Periods** 159
Jorge Alberto Achcar, Roberto Molina de Souza
and Emilio Augusto Coelho-Barros

8	Nonparametric Estimation of Mean Residual Life Function Using Scale Mixtures	169
	Sujit K. Ghosh and Shufang Liu	
9	Something Borrowed, Something New: Precise Prediction of Outcomes from Diverse Genomic Profiles	193
	J. Sunil Rao, Jie Fan, Erin Kobetz and Daniel Sussman	
10	Bivariate Frailty Model and Association Measure	209
	Ramesh C. Gupta	
11	On Bayesian Inference of $R = P(Y < X)$ for Weibull Distribution	225
	Debasis Kundu	
12	Air Pollution Effects on Clinic Visits in Small Areas of Taiwan: A Review of Bayesian Spatio-Temporal Analysis	247
	Atanu Biswas and Jean-Francois Angers	
13	On Competing Risks with Masked Failures	257
	Isha Dewan and Uttara Naik-Nimbalkar	
14	Environmental Applications Based on Birnbaum–Saunders Models	283
	Víctor Leiva and Helton Saulo	
15	Analysis of Chronic Disease Processes Based on Cohort and Registry Data	305
	Richard J. Cook and Jerald F. Lawless	
16	Exact Likelihood-Based Point and Interval Estimation for Lifetime Characteristics of Laplace Distribution Based on a Time-Constrained Life-Testing Experiment	327
	Xiaojun Zhu and N. Balakrishnan	

Mathematical and Statistical Applications in Life
Sciences and Engineering

Adhikari, A.; Adhikari, M.R.; Chaubey, Y.P. (Eds.)

2017, XIV, 372 p. 87 illus., Hardcover

ISBN: 978-981-10-5369-6
