<b>1</b>	<b>EAF in Global Steel Production; Energy and Productivity</b>	
	<b>Problems</b>	1
1.1	Production of Steel from Scrap Is EAF's Mission	1
1.2	Melting a Scrap as a Key Process of the Heat	3
1.3	Unjustified High Electrical Energy Consumption	3
1.4	Problems of Ultra-High Power (UHP) EAFs with Regard to Energy	4
1.5	High Productivity or Low Costs?	5
	References.	6
<b>2</b>	<b>Analysis of Technologies and Designs of the EAF as an Aggregate for Heating and Melting of Scrap</b>	7
2.1	Melting a Scrap by Electric Arcs. Function of Hot Heel	7
2.1.1	Single Scrap Charging	8
2.1.2	Telescoping Shell	9
2.2	Heating a Scrap by Burners in the Furnace Freeboard	9
2.2.1	Specifics of Furnace Scrap Hampering Its Heating	9
2.2.2	Stationary Burners and Jet Modules	10
2.2.3	Rotary Burners with Changing the Flame Direction	14
2.2.4	Two-Stage Scrap Melting. Industrial Testing of the Process	19
2.2.5	Twin-Shell EAFs.	22
2.3	EAF with Preheating a Scrap by Off-Gases and Melting of Preheated Scrap in Liquid Metal	25
2.3.1	Conveyor Furnaces of Consteel-Type	25
2.3.2	Shaft Furnaces with Fingers Retaining Scrap	29
2.3.3	Shaft Furnaces with Pushers of the COSS-Type	35

2.4	Factors Hindering Wide Spread of Shaft Furnaces . . . . .	37
2.4.1	Calculation of the Maximum Values of the Power of the Heat Flow of Off-Gases and Temperature of Scrap Heating by These Gases in the Shaft . . . . .	38
	References. . . . .	39
<b>3</b>	<b>Experimental Data on Melting a Scrap in Liquid Metal Required for Calculation of This Process . . . . .</b>	<b>41</b>
3.1	Features of Scrap Melting Process . . . . .	41
3.2	Studies of the Melting Process by the Method of Immersion of Samples in a Liquid Metal. Analysis of the Results . . . . .	43
3.2.1	Melting of Single Samples of Scrap with a Solidified Layer and Without Solidifying . . . . .	43
3.2.2	Co-melting of Multiple Samples . . . . .	48
3.2.3	Porosity of Charging Zone and Bulk Density of Scrap . . . . .	50
	References. . . . .	50
<b>4</b>	<b>Calculations of Scrap Melting Process in Liquid Metal . . . . .</b>	<b>51</b>
4.1	Scrap Melting Time . . . . .	51
4.2	Adaptation of Experimental Data Obtained by the Method of Melting Samples to Real Conditions of Scrap Melting. . . . .	52
4.2.1	Equivalent Scrap . . . . .	52
4.2.2	Correction Coefficients $K_p$ , $K_L$ , $K_{ts}$ and $K_\alpha$ . . . . .	53
4.3	Calculation Method of Scrap Melting Time in Liquid Metal . . . . .	55
4.3.1	General Characteristic of the Method . . . . .	55
4.3.2	Examples of Calculations of Scrap Melting Time . . . . .	55
4.3.3	Specific Scrap Melting Rate . . . . .	58
	References. . . . .	59
<b>5</b>	<b>Increasing Scrap Melting Rate in Liquid Metal by Means of Oxygen Bath Blowing. . . . .</b>	<b>61</b>
5.1	Preliminaries. . . . .	61
5.2	Tuyeres with Evaporation Cooling Embedded in the Lining . . . . .	63
5.3	Roof Water-Cooled Tuyeres for Bath Blowing at Slag-Metal Interface . . . . .	66
5.3.1	Thermal Operation of Tuyeres: Heat Flows, Temperatures. . . . .	66
5.3.2	Roof Tuyere with Jet Cooling; Design, Basic Parameters. . . . .	73
	References. . . . .	78

<b>6 High-Temperature Heating a Scrap in a Furnace Shaft. . . . .</b>	<b>79</b>
6.1 Preliminary Considerations and Evaluation of Some Parameters . . . . .	80
6.1.1 Calculation of Scrap Heating Time with off-Gases in the Quantum Shaft . . . . .	81
6.2 Scrap Preheating System by High-Power Recirculation Burner Devices. . . . .	82
Reference . . . . .	85
<b>7 Fuel Arc Furnace—FAF. . . . .</b>	<b>87</b>
7.1 Concept of the Fuel Arc Furnace . . . . .	87
7.1.1 Selection of the Quantum Constructive Scheme as a Base for FAF. . . . .	88
7.1.2 Calculations of Main Parameters and Performances of the FAF . . . . .	89
7.2 Advantages of Fuel Arc Furnaces FAF of Quantum-Type . . . . .	91
Reference . . . . .	92
<b>Index . . . . .</b>	<b>93</b>

Fuel Arc Furnace (FAF) for Effective Scrap Melting  
From EAF to FAF

Toulouevski, Y.N.; Zinurov, I.Y.

2017, IX, 94 p. 23 illus., Softcover

ISBN: 978-981-10-5884-4
