Part I Physics: Linked-Metrics Generates Vortex-World Physics

1 The Linked-Measure and Linked-Field for Linking Micro-Particles to Macro-Cosmos with Dispelling Dark Matter and Dark Energy	3
1.1 Introduction	3
1.2 Present Achievements as Constrains	4
1.2.1 Observational Evidence	4
1.2.2 Theoretical Constrains with Characteristics	5
1.3 New Theoretical Structure	6
1.3.1 Linked-Measure	7
1.3.2 Linked-Field	8
1.4 Dark Matter and Dark Energy: The Structural Effects	12
1.5 Experiment Suggestion	12
1.6 Discussion: Cosmological Image	13
1.7 Concluding Remarks	16
References	17
2 The Physical Linked-Measure Works as Vortex with Linking to Turbulence	19
2.1 Introduction	19
2.2 Methodology	20
2.3 Vortex Dynamics and Black Hole	23
2.4 Wingtip Vortices	26
2.5 Crosswind as Wavelets Leading to Ideal Turbulence	28
2.6 Discussion and Conclusion	30
References	31

3	The Clifford-Finslerian Linked-Field Leads Branching	
	Multiverse	33
3.1	Introduction	33
3.2	The Clifford-Finslerian Construction.	35
	3.2.1 Clifford Algebra as Interior Dynamics.	35
	3.2.2 Finsler Geometry and Catastrophic Theory Leads Space-Time Branching	38
3.3	Analytical Structure and Wave-Particle Duality	40
	3.3.1 Field Equations	41
	3.3.2 An Interpretation of Wave-Particle Duality	42
3.4	Branching Multiverse	42
3.5	Discussion and Criticism	43
3.6	Conclusion	45
	References.	45
4	A Clifford-Finslerian Physical Unification and Fractal	
	Dynamics	47
4.1	Introduction	47
4.2	Mathematical Methods	48
	4.2.1 Algebraic Structure	48
	4.2.2 Analytical Structure.	49
	4.2.3 Geometrical Structure	49
4.3	Physical Principles	50
	4.3.1 The First Physical Principle.	50
	4.3.2 The Second Physical Principle	51
	4.3.3 The Third Physical Principle	51
4.4	Clifford-Finslerian Physics	52
4.5	Finslerian Metric and Fractal Dynamics	52
4.6	Discussion	53
4.7	Conclusion	54
	References.	55
5	A Vortex Mechanism Linking Micro-Particle	
	to Macro-Galaxy Without Supersymmetry	57
5.1	Introduction	57
5.2	Phenomenological Foundations and Theoretical Constrains	58
5.3	Theoretical Approaches by Vortex Mechanism.	59
	5.3.1 Linked-Measure Describes Vortex, Leading to Linked-Field	60
	5.3.2 Electromagnetic Field	63
	5.3.3 Strong and Electro-Weak Fields	63
	5.3.4 Gravitational Field.	64
5.4	Discussion: The Vortex-World	66

5.4.1	An Interpretation of Wave-Particle Duality	66
5.4.2	An Interpretation for the Asymmetry of Particles and Antiparticles	67
5.4.3	An Interpretation of Dark Matter and Dark Energy	67
5.4.4	Black Holes as Astronomical Vortices in The Universe	69
5.5	More Evidence and Limitations	69
5.6	Conclusion	70
	References.	71
6	The Physical Foundation of Information and the Unification of Physics	73
6.1	Order Coordinate as the Dimension of Information	73
6.2	Physical Constants with Dimension Analysis	75
6.3	Analytical Principle and Gauge Invariance	76
6.4	Substance Generation	76
6.5	Physical Information and Probable Information	78
6.6	Cosmos Model	78
6.7	Conclusion	80
	References.	80

7	A Probe into the Unification of Micro-Macro-Economics: Arrow-Debreu-Mundell-Fleming Model as a Standard Model	85
7.1	Introduction	85
7.2	Theoretical Background	86
7.3	The Keys to Link Micro-Economics with Macro-Economics	86
7.3.1	The First Key: From Micro-Demand-Supply to Macro-AD-AS	87
7.3.2	The Second Key: Marginal Effects in Both Micro-Economics and Macro-Economics.	87
7.3.3	The Third Key: AD-AS Model Can Be Approached by Multiplier Model	89
7.4	Macro-Economic Model: More Details.	89
7.5	More Discussion: Other Models	92
7.6	Conclusion and Suggestion.	93
	References.	93
8	The Commodity-Money Analytical Framework: A Unified Approach to Micro-Macro-Economics and Complex Economics.	95
8.1	Introduction	95
8.2	Methodology: The Commodity-Money Analytical Framework. . . .	96
8.3	An Interpretation of Inflation and Deflation	98

8.4	Some Special Cases	99
8.5	Complex Economics: Using Complex Numbers as Unified Marginal-Multiplier Measures	100
8.6	Discussion: A Conjecture on Linking Marginal Effect to Multiplier Effect	101
8.7	More Analysis: Relations Among the Rates of Inflation, Interest and Exchange.	103
8.8	Concluding Remarks.	104
	References.	105
9	Economic Complex Analysis for Approaching Economic Equilibrium and Economic Stability	107
9.1	Introduction	107
9.2	Complex Economics as Theoretical Framework	108
9.3	Analytical Solutions	109
9.4	Numerical Simulation	110
9.5	Discussion	112
9.6	Concluding Remarks.	114
	References.	114
10	Complex Economic Metrics Linking to Scaling Money Supply	117
10.1	Introduction	117
10.2	Theoretical Framework for the Upper-Limitations and Lower-Limitations of Money Supply	118
	10.2.1 Three Ways	118
	10.2.2 Linking to Complex Metrics	120
10.3	Numerical Estimation	121
10.4	Discussion: Money Supply and Money Policy	122
10.5	Conclusion	124
	References.	125
11	A Synthetic Macro-Economic Model Integrating Interest, Exchange and Tax Rates	127
11.1	Introduction	127
11.2	Concepts and Relations of Three Rates	128
11.3	Synthetic Model	130
11.4	Policy Analysis.	132
11.5	Possible Extension	135
11.6	Discussion: Quantitative Easing and Three Ratios	136
11.7	More Discussion: Social Equality and Economic Efficiency	137
11.8	Conclusion	139
	References.	139

12 A Cubic Integrated Economic Model for Macro-Economic Analysis	141
12.1 Introduction	141
12.2 A Brief Review of the Analytical Foundations	142
12.3 The Cubic Integrated Model	145
12.4 Discussion I: Total Economic Quantities and Relative Economic Rates	147
12.5 Discussion II: Possible Applications and Expected Extensions	149
12.6 Conclusion	149
References	150
 Part III Scientometrics: Knowledge Metrics and h-type Metrics	
13 Measuring Knowledge: A Quantitative Approach to Knowledge Theory	155
13.1 Introduction	155
13.2 DIKW Chain and Knowledge Metrics	156
13.3 Measuring Explicit Knowledge and Tacit Knowledge	158
13.4 Analysis and Discussion	160
13.5 Conclusion	161
References	162
 14 A Theoretical Unification of Informetric Models by Wave-Heat Equations	163
14.1 Introduction	163
14.2 Theoretical Methodology	164
14.2.1 Shifted Power Function Fits Wave-Heat Equations	164
14.2.2 Fundamental Solutions and the Function $F(x, T)$ as a Fundamental Solution	165
14.2.3 Space-Type Distributions and Their Size-Rank Transformation	166
14.2.4 Time-Type Distributions	173
14.3 Theoretical Extension	174
14.4 Discussion	177
14.5 Conclusion	178
References	179
 15 The Empirical Investigation and Theoretical Unification of Mathematical Models for the h-Index	181
15.1 Introduction	181
15.2 Methodology	182
15.2.1 Method	182
15.2.2 Data	183
15.3 Results	183

15.4	Analysis and Discussion	186
15.5	Conclusion	188
	References.	189
