

Preface

This report is a partial result of the China's Quarterly Macroeconometric Model (CQMM), a project developed and maintained by the Center for Macroeconomic Research (CMR) at Xiamen University. The CMR is one of the Key Research Institutes of Humanities and Social Sciences sponsored by the Ministry of Education of China, focusing on China's economic growth and macroeconomic policy. The CMR started to develop the CQMM for purpose of short-term forecasting, policy analysis, and simulation in 2005.

Based on the CQMM, the CMR and its partners hold press conferences to release forecasts for China's major macroeconomic variables. Since July 2006, twenty-one quarterly reports on China's macroeconomic outlook have been presented and twelve annual reports have been published.

This 22nd quarterly report was presented at the Forum on China's Macroeconomic Prospects and Press Conference of the CQMM on February 22, 2017. This conference was jointly held by Xiamen University and Economic Information Daily at Xinhua News Agency.
