

Contents

1	Higher Order Parametric Duality Models	1
1	Role of Parametric Duality Models	1
2	Generalized Sonvexities	2
3	New Duality Models	6
4	Duality Theorems	8
5	General Remarks	15
	References	15
2	New Generation Parametric Optimality	17
1	The Significance of Semi-infinite Fractional Programming	17
2	Basic Concepts and Auxiliary Results	18
3	Sufficient Optimality Theorems	21
4	General Remarks	34
	References	36
3	Accelerated Roles for Parametric Optimality	37
1	Semi-infinite Fractional Programming	37
2	General Concepts and Auxiliary Results	38
3	New Sufficient Optimality Conditions	41
4	General Remarks	55
	References	58
4	Semi-infinite Multiobjective Fractional Programming I	59
1	Role of Sufficient Efficiency Conditions	59
2	Basic Concepts	61
3	Sufficient Efficiency Theorems	66
4	General Remarks	81
	References	82

5	Semi-infinite Multiobjective Fractional Programming II	83
1	Hadamard Derivatives and Parametric Duality Models	83
2	Significant Basic Concepts	85
3	Duality Model I	87
4	Duality Model II	94
5	Some Applications	111
6	General Remarks	113
	References	114
6	Semi-infinite Multiobjective Fractional Programming III	115
1	Role of Semi-infinite Multiobjective Fractional Programs	115
2	Significant Basic Concepts and Auxiliary Results	116
3	Duality Model I and Duality Theorems	119
4	Duality Model II and Duality Theorems	126
5	Some Applications	146
6	General Remarks	149
	References	150
7	Hanson-Antczak-Type Generalized V-Invexity I	151
1	Role of Sufficient Conditions	151
2	Hanson-Antczak-Type Invexities	153
3	Sufficient Efficiency Conditions	158
4	Generalized Sufficiency Criteria	165
5	General Remarks	171
	Reference	172
8	Parametric Optimality in Semi-infinite Fractional Programs	173
1	Role of Optimality in Semi-infinite Fractional Programming	173
2	Generalized Sonvexities	174
3	Parametric Necessary and Sufficient Optimality	176
4	General Remarks	190
	References	190
9	Semi-infinite Discrete Minmax Fractional Programs	193
1	Significance of Semi-infinite Fractional Programming	193
2	Hybrid Sonvexities	194
3	Main Results on Necessary and Sufficient Optimality	196
4	General Remarks	209
	References	209
10	Next-Generation Semi-infinite Discrete Fractional Programs	211
1	Necessary and Sufficient Optimality	211
2	Generalized Sonvexities	212
3	Necessary and Sufficient Optimality Theorems	213
4	General Remarks	230
	References	230

11	Hanson-Antczak-Type Sonvexity III	231
1	Semi-infinite Multiobjective Fractional Programming	231
2	Hanson-Antczak Type Sonvexities	234
3	Duality Models I	239
4	Duality Model II	243
5	Duality Model III	249
6	Duality Model IV	256
7	General Remarks	263
	References	263
12	Semi-infinite Multiobjective Optimization	265
1	The Significance of Semi-infinite Multiobjective Optimization . . .	265
2	Significant Related Concepts	266
3	A Theorem of the Alternative and Necessary Efficiency Conditions	268
4	Role of Hadamard Differentiability	271
5	Role of Gâteaux Differentiability	274
6	Some Applications	275
7	Significant Specializations	279
8	General Remarks	281
	References	281
	References	283

Semi-Infinite Fractional Programming

Verma, R.U.

2017, XI, 291 p., Hardcover

ISBN: 978-981-10-6255-1
