

# Contents

<b>1</b>	<b>Introduction</b>	1
<b>2</b>	<b>Basics of Quandles</b>	5
2.1	Definitions and Examples of Quandles	5
2.2	Characterization Theorem of Quandles from Groups	9
2.3	Quandles and Centrally Extended Groups	12
2.4	Link Quandles and Their Properties	14
2.5	Appendix: Historical and Topological Comments on Quandles	16
<b>3</b>	<b><math>X</math>-Colorings of Links</b>	19
3.1	Definitions and Examples	19
3.2	Characterization of $X$ -colorings	23
3.2.1	Example 1; Parabolic $SL_2$ -Representations	25
3.2.2	Example 2; Core Quandle and Double Branched Covering	27
3.2.3	Example 3; First Cohomology with Local Coefficients	28
3.3	Appendix: Colorings and Braid Actions	30
<b>4</b>	<b>Some of Quandle Cocycle Invariants of Links</b>	33
4.1	Origin: The Homotopy Invariant from the Rack Space	33
4.2	Shadow Cocycle Invariant Associated with $X$ -sets	36
4.3	Cocycle Invariant with Non-Abelian Coefficients	39
4.4	Binary and Ternary Cocycle Invariants	41
<b>5</b>	<b>Topology of the Rack Space and the 2-Cocycle Invariant</b>	45
5.1	Rack and Quandle Homology with Properties	45
5.2	The Rack Space and its Properties	48
5.3	Topology of the Non-Abelian Cocycle Invariants	52
5.4	Examples; Second Quandle Homology and 2-Cocycles	55

<b>6</b>	<b>Topology on the Quandle Homotopy Invariant</b> . . . . .	59
6.1	Monoid Structure on the Universal Covering . . . . .	59
6.2	On the Classifying Map of the Rack Space . . . . .	61
6.3	Rack Spaces of the Knot Quandles . . . . .	64
6.4	Topological Interpretation of the Homotopy Invariant . . . . .	65
6.5	Application; Computation of Third Quandle Homology . . . . .	68
<b>7</b>	<b>Relative Group Homology</b> . . . . .	71
7.1	Review; Group Homology . . . . .	71
7.2	Relative Group Homology as a Mapping Cone . . . . .	74
7.3	Hochschild Relative Group Homology . . . . .	76
7.4	Examples of (Relative) Group (Co)cycles . . . . .	79
7.4.1	Example 1; Group 3-Cocycles of Cyclic Groups . . . . .	79
7.4.2	Example 2; the Chern-Simons 3-Class . . . . .	80
7.4.3	Example 3; Presented Groups and Knot Groups . . . . .	81
<b>8</b>	<b>Inoue–Kabaya Chain Map</b> . . . . .	83
8.1	Original Definition of Inoue–Kabaya Chain Map . . . . .	83
8.2	Guideline to Applications and Fundamental Classes . . . . .	85
8.3	Relation to the Chern-Simons Invariants of Hyperbolic Links . . . . .	86
8.4	Lifts of Inoue–Kabaya Chain Map . . . . .	89
8.4.1	For Some Quandle Operations on Groups . . . . .	89
8.4.2	Recovery of All Mochizuki’s 3-Cocycles . . . . .	92
8.4.3	Quandle Cocycles from Invariant Theory . . . . .	94
8.4.4	Binary Cocycle Invariants Versus Cohomology Pairings . . . . .	97
	<b>Appendix A: Notation and Basic Facts in Knot Theory</b> . . . . .	99
	<b>Appendix B: Automorphism Groups from Quandles</b> . . . . .	107
	<b>Appendix C: Small Quandles, and Some Quandle Homology</b> . . . . .	119
	<b>References</b> . . . . .	127
	<b>Index</b> . . . . .	135

Quandles and Topological Pairs

Symmetry, Knots, and Cohomology

Nosaka, T.

2017, IX, 136 p. 25 illus., 11 illus. in color., Softcover

ISBN: 978-981-10-6792-1
