<b>1</b>	<b>Introduction</b>	1
1.1	General	1
1.2	Flood and Hazard Definition	5
1.3	Hydro-meteorological Events	8
1.3.1	Global Environment and Cycle	8
1.4	Hydrological Cycle	9
1.5	Flood Definition	11
1.5.1	Ordinary Floods	12
1.5.2	Flash Floods	13
1.5.3	Triggering Mechanism Types	15
1.6	Physical Causes of Flood	17
1.7	Flood Plains	19
1.8	Flood Hazards	21
1.8.1	Human Causes	23
1.9	Water Disasters	25
1.10	Various Definitions	26
	References	28
<b>2</b>	<b>Rainfall and Floods</b>	31
2.1	General	31
2.2	Causative Reasons for Rainfall Occurrence	34
2.2.1	Water Vapor	34
2.2.2	Cooling	35
2.2.3	Condensation	38
2.3	Precipitation Types	39
2.3.1	Elevation Difference (Orographic)	39
2.3.2	Temperature Difference (Convective)	39
2.3.3	Pressure Difference (Frontal)	41
2.4	Rainfall Measurement	41
2.4.1	Non-recording Raingauges	42
2.4.2	Recording Raingauges	43

2.5	Rainfall Measurement Errors . . . . .	45
2.6	Arid Region Rainfall . . . . .	47
2.7	Rainfall Duration . . . . .	48
2.8	Missing Data Filling. . . . .	48
2.8.1	Arithmetic Average . . . . .	49
2.8.2	Ratio Method . . . . .	50
2.8.3	Inverse Distance Square Method . . . . .	50
2.8.4	Correlation Method . . . . .	51
2.9	Double Mass Curve Method. . . . .	52
2.10	Rainfall Intensity . . . . .	54
2.11	Hyetograph–Hydrograph Relationship . . . . .	63
2.12	Intensity–Duration–Frequency (IDF) Curves. . . . .	68
2.12.1	Dimensionless Intensity–Duration (DID) Curve. . . . .	71
2.12.2	Intensity–Duration–Frequency (IDF) Curve Generation . . . . .	72
2.13	Probably Maximum Precipitation (PMP) . . . . .	73
2.13.1	Definitions of PMP and PMF . . . . .	74
2.13.2	Statistical Estimates. . . . .	74
2.13.3	Area Reduction Curves . . . . .	79
2.13.4	PMP and PMF Estimations . . . . .	80
2.13.5	Application of Procedure. . . . .	82
2.14	Probable Maximum Flood (PMF). . . . .	89
2.15	Precipitable Water Calculation . . . . .	92
2.15.1	Application Principles . . . . .	98
2.16	Areal Average Rainfall Calculation . . . . .	99
2.16.1	Arithmetic Average . . . . .	100
2.16.2	Weighted Average. . . . .	100
	References. . . . .	104
<b>3</b>	<b>Floods and Drainage Basin Features . . . . .</b>	<b>107</b>
3.1	General. . . . .	107
3.2	Topographic Map Presence. . . . .	109
3.2.1	Elevation Features . . . . .	110
3.2.2	Field Survey . . . . .	111
3.3	Digital Elevation Model (DEM). . . . .	112
3.4	Flood Map Derivation Ingredients . . . . .	113
3.5	Drainage Basin (Catchment) Features. . . . .	115
3.5.1	Water Divide Point . . . . .	115
3.5.2	Water Divide Line. . . . .	116
3.5.3	Drainage Basin (Catchment) . . . . .	117
3.6	Drainage Basin Quantities . . . . .	120
3.6.1	Drainage Area . . . . .	120
3.6.2	Main Channel Length . . . . .	121

3.6.3	Main Channel Slope . . . . .	122
3.6.4	Drainage Density . . . . .	123
3.6.5	Shape Factor . . . . .	124
3.6.6	Stream Order . . . . .	126
3.6.7	Bifurcation Ratio . . . . .	126
3.6.8	Elongation Ratio . . . . .	127
3.6.9	Drainage Frequency . . . . .	127
3.6.10	Centroid Length . . . . .	128
3.7	Cross Sections . . . . .	128
3.7.1	Cross Section Slope . . . . .	130
3.7.2	Cross Sections Area and Rating Curve . . . . .	131
3.7.3	Cross Section Wetted Perimeter and Hydraulic Radius . . . . .	132
3.7.4	Cross Section Discharge . . . . .	133
3.8	Floods and Basic Concepts . . . . .	136
3.8.1	Flash Floods . . . . .	138
3.9	Flood Hazard Map Preparation . . . . .	139
3.10	Drainage Basin Flood System . . . . .	142
3.11	Standard Hypsographic Curves (HC) . . . . .	143
3.12	Direct Hydrograph Catchment Feature Relationships . . . . .	145
3.13	Drainage Area Discharge Approaches . . . . .	145
	References . . . . .	149
<b>4</b>	<b>Hydrograph and Unit Hydrograph Analysis . . . . .</b>	<b>151</b>
4.1	General . . . . .	151
4.2	Hydrograph . . . . .	152
4.3	Theoretical Storm Hydrographs . . . . .	156
4.4	Hydrograph Properties . . . . .	158
4.5	Unit Hydrograph Definition (UH) . . . . .	160
4.5.1	UH Limitations . . . . .	164
4.6	S-Hydrograph and Decimal-Fold Duration UH . . . . .	164
4.7	Instantaneous Unit Hydrograph (IUH) . . . . .	167
4.7.1	IUH Derivation . . . . .	168
4.8	Dimensionless Unit Hydrograph (DUH) . . . . .	170
4.9	Synthetic Hydrographs (SH) . . . . .	173
4.9.1	Snyder Method . . . . .	174
4.9.2	Soil Conservation Service (SCS) Method . . . . .	179
4.9.3	The Geomorphologic Instantaneous Unit Hydrograph . . . . .	181
4.10	Santa Barbara Hydrograph . . . . .	187
4.11	Conceptual UH Models . . . . .	189
4.11.1	Nash Conceptual Model . . . . .	190
	References . . . . .	193

<b>5</b>	<b>Rational Flood Methodologies</b>	195
5.1	General	195
5.2	Early Methodologies	196
5.2.1	Talbot Method	198
5.2.2	Lacey Formulation	202
5.2.3	Reliability of Early Methods	203
5.3	Flood Discharge Envelope Curves	204
5.4	Discharge-Area-Rainfall Intensity Rational Method	209
5.5	Runoff Coefficient Seasonal Variation	213
5.5.1	Runoff Coefficient Polygons	215
5.5.2	Application	217
5.6	Arid Zone Runoff Coefficient Area Relationship	221
5.7	Arid Region Flood Calculations	222
5.8	Irrationality of Rational Method and Some Rectification	223
5.8.1	Criticisms	227
5.8.2	Modified Rational Method (MRM)	228
5.8.3	Application	232
5.9	Ungauged Site Monthly Flow Estimation	238
5.9.1	Standardizing Flows by Drainage Area	238
5.9.2	Standardizing Flows by Mean Streamflow	241
5.9.3	Standardizing Flows by Mean and Standard Deviation	242
	References	243
<b>6</b>	<b>Probability and Statistical Methods</b>	245
6.1	General	245
6.2	Flood Frequency Calculations	247
6.2.1	Plotting Positions	249
6.2.2	Probability Distribution Functions (PDFs)	249
6.3	Flood Data Preparation	252
6.3.1	Annual Flood Discharge	252
6.3.2	Partial Flood Discharges	253
6.3.3	Hybrid Flood Discharges	254
6.4	Flood Risk Calculations	255
6.5	Annual Flood Discharge Calculations	256
6.5.1	Probability Paper Plot Method	258
6.5.2	Safety–Risk on PDF Curve	262
6.5.3	Frequency Factor	263
6.6	Practical Flood Calculation Application	271
6.6.1	Flood Analysis	278
6.7	Regional Skewness Characteristics	279
6.8	Relationship Between Extreme Values and Run-Lengths	280
6.8.1	Extreme Values	281
6.8.2	Run Properties	281

6.8.3	Extreme Values of Small Samples. . . . .	283
6.8.4	Application . . . . .	286
6.9	Simple Flood Risk Calculations in Dependent Time Series . . . .	289
6.9.1	Flood Application . . . . .	293
6.10	Extreme Values in Small Sample-Dependent Processes . . . . .	295
6.10.1	Innovative Approach . . . . .	297
6.10.2	Application . . . . .	298
