

TABLE OF CONTENTS

1	CHAPTER 1 FUNDAMENTAL SURVEYING	1
1.1	INTRODUCTORY REMARKS	1
1.2	DEFINITIONS.....	1
1.2.1	Surveying.....	1
1.2.2	Engineering and Mine Surveying.....	1
1.3	PLANE AND GEODETIC SURVEYING.....	2
1.4	MEASURING TECHNIQUES.....	3
1.4.1	Plane Surveying Measurements and Instruments	3
1.4.2	Geodetic Measuring Techniques.....	4
1.4.3	Basic Measuring Principles and Error Management.....	5
1.5	MEASUREMENT TYPES	6
1.5.2	Linear Measurements	6
1.5.3	Traversing.....	6
1.6	CONCLUDING REMARKS	8
1.7	REFERENCE FOR CHAPTER 1	8
2	CHAPTER 2 LEVELLING.....	9
2.1	INTRODUCTORY REMARKS	9
2.2	DEFINITIONS OF LEVELLING TERMINOLOGIES	9
2.3	EXAMPLE: THE AUSTRALIAN HEIGHT DATUM (AHD).....	10
2.4	INSTRUMENTATION: AUTOMATIC LEVEL AND STAFF	14
2.4.1	Setting the instrument for area levelling.....	14
2.4.2	Levelling the instrument.....	14
2.4.3	Focusing the instrument.....	15
2.4.4	Reading the staff interval.....	15
2.4.5	Collimation checks (Two peg test).....	16
2.5	MEASURING AND REDUCTION TECHNIQUES	18
2.5.1	Basic Rules of Levelling.....	18
2.5.2	Levelling Specifications in Australia	18
2.5.3	Differential Levelling: The “Rise and Fall” method	19
2.5.4	Booking and field reduction procedures for levelling.....	19
2.5.5	Rise and Fall Booking and Reduction Procedures.....	20
2.5.6	Area Levelling: The “Rise and Fall” Method	21
2.5.7	Area Levelling: The “Height of Collimation” Method	22
2.6	EXAMPLES OF LEVELLING FOR HEIGHT CONTROL	24
2.6.1	Civil Engineering for a Road Excavation Exercise.....	24
2.6.2	Mining Engineering Surveying for a Site Development	25
2.6.3	Grid Layout for levelling	26
2.6.4	Orthogonal Grid Layout Methods.....	27
2.6.5	Height from Vertical Inclination.....	27
2.7	ERRORS IN LEVELLING AND MANAGEMENT STRATEGIES	28
2.7.1	Systematic Errors in Level Observations	28
2.7.2	Random Errors in Level Observations	29
2.7.3	Observation Blunders and Mistakes.....	30
2.8	CONCLUDING REMARKS	30
2.9	REFERENCES TO CHAPTER 2	30

3	CHAPTER 3 RELIEF AND VERTICAL SECTIONS	31
3.1	INTRODUCTORY REMARKS	31
3.2	DEFINITIONS	31
3.3	APPLICATION: ROAD DESIGN.....	34
3.4	CALCULATION OF ROAD CROSS SECTIONS IN CUT AND FILL OPERATIONS.....	35
3.4.1	Calculation of Cut Formation Width w_L , and, w_R , Flat Ground.....	36
3.4.2	Calculation of Formation Width, w_L , and, w_R , Incorporating Cross Fall. Sloping Ground.....	36
3.4.3	Calculation of Formation Width, w_L , and, w_R , Constant Cross Fall Ground	38
3.4.4	Calculation of Formation Width, w_L , and w_R , Varying Cross Fall Ground	38
3.4.5	Batter Width Falls Outside the First Cross Section	39
3.4.6	Derivation of AREA Formula using Formation Widths	40
3.4.7	Area by Matrix Determinant.....	41
3.5	CALCULATION OF EMBANKMENT VOLUME FROM ROAD CROSS SECTIONS IN CUT AND FILL OPERATIONS	42
3.6	PLAN SCALE, HORIZONTAL AND VERTICAL.....	42
3.7	VERTICAL EXAGGERATION.....	43
3.8	PLAN SKETCHING AND DRAWING	43
3.9	CALCULATION OF EMBANKMENT VOLUME FROM BATTER SLOPES: MINING.....	43
3.9.1	Batters, Ramps and Benches.....	43
3.9.2	Calculate Cross Section Areas for Volume: Mining.....	45
3.9.3	Cross Section Area by Trapezium.....	47
3.9.4	Block Volume	48
3.9.5	Volume by Contour	50
3.9.6	Missing Grid Data	51
3.9.7	Stockpile Volumes	52
3.10	CONCLUDING REMARKS	54
3.11	REFERENCE TO CHAPTER 3	54
4	CHAPTER 4 TOTAL STATION: MEASUREMENTS AND COMPUTATIONS.....	55
4.1	INTRODUCTORY REMARKS	55
4.2	INSTRUMENTATION AND OPERATION	55
4.2.1	The Total Station.....	55
4.2.2	Setting over a Point Using the Optical or Laser Plummet.....	57
4.2.3	Preparing Trimble M3 DR 5" for Survey Observations.....	58
4.2.4	Preparing Sokkia SET530RK3 for Survey Observations.....	58
4.3	MEASUREMENTS	62
4.3.1	Distance Measurements.....	62
4.4	PRISM CONSTANT, WHY ALL THE FUSS?.....	64
4.4.1	How a Prism is Measured, and its PC is Determined.....	64
4.4.2	The Leica Geosystems Total Station Prism Constant Conundrum	65
4.5	ANGULAR MEASUREMENTS.....	68
4.6	COMBINED TOTAL STATION MEASUREMENTS	69
4.6.1	Station Records	69
4.6.2	Recording Observations	69
4.6.3	Example Recording of Observations from an Initial Station.....	70
4.7	COMPUTATIONS	70
4.7.1	Manipulating VECTORS	70
4.7.2	Using the POLAR and RECTANGULAR Function on a Calculator	74

4.7.3	Reduction of Electronically Measured Distance to the Spheroid	74
4.8	OBSERVATION BLUNDERS AND MISTAKES	76
4.9	CONCLUDING REMARKS	76
4.10	REFERENCE TO CHAPTER 4	76
5	CHAPTER 5 TRAVERSING	77
5.1	INTRODUCTORY REMARKS	77
5.2	DEFINITION AND APPLICATIONS.....	77
5.3	TRAVERSE PROCEDURE	78
5.4	FIELD NOTES REDUCTION.....	79
5.4.1	Angular Misclose	80
5.4.2	Bearing and Coordinates Computations	81
5.4.3	Traverse Misclose: Bowditch Adjustment.....	81
5.4.4	Area Computations.....	82
5.4.5	Summary of the Traverse Computation	83
5.5	EXAMPLE: SET-OUT AND ADJUSTMENT OF CONTROL POINTS FOR SITE CONTROL.....	83
5.5.1	Field Book Observations and Reduction	84
5.5.2	Network Adjustment Method	85
5.5.3	Angular Misclose Correction.....	86
5.5.4	Adjusted Coordinates using the Bowditch Adjustment	86
5.5.5	Calculation of AREA by Coordinates Method	87
5.5.6	Calculation of Area by Double Longitude Coordinates	88
5.5.7	Example Field Calculations. Field Practical in Appendix A2-3	88
5.5.8	The “eccy” Station. Missing the Point?.....	90
5.6	SOURCES OF ERRORS IN TRAVERSING	92
5.7	CONCLUDING REMARKS	92
5.8	REFERENCE FOR CHAPTER 5	92
6	CHAPTER 6 TOTAL STATION DIFFERENTIAL LEVELLING	93
6.1	INTRODUCTORY REMARKS	93
6.2	ERRORS PROPAGATION IN TRIGONOMETRIC LEVELLING	93
6.2.1	Systematic Errors in Level Observations	94
6.2.2	Random Errors in Observations	95
6.3	CALCULATION OF THREE DIMENSIONAL COORDINATES FROM OBSERVATIONS.....	96
6.3.1	Calculation of Observed Distances.	96
6.3.2	Direct Calculation of Horizontal X, Y Coordinates by Intersection of Horizontal Distances to Known Points.....	97
6.3.3	Orientation of a Local Coordinate System to a Grid System	99
6.3.4	Observation, Booking and Calculation of Terrain Points for DTM.....	100
6.3.5	Feature Codes for Point and Line Pickup	101
6.4	CONCLUDING REMARKS.....	101
6.5	REFERENCE TO CHAPTER 6	101
7	CHAPTER 7 STRIKE AND DIP TO AN EMBEDDED PLANE	103
7.1	INTRODUCTORY REMARKS	103
7.2	STRIKE AND DIP	103
7.3	STRIKE AND DIP TO A PLANE	103
7.4	DERIVING STRIKE AND DIP OF A PLANE	103
7.4.1	Strike and Dip of a Plane, a Worked Example by Calculation	105
7.4.2	Strike and Dip of a Plane, the Graphical Solution	106
7.4.3	Maximum Dip “Outside” Strike Lines	107

7.5	SEAM THICKNESS	108
7.6	DEPTH TO SEAM	108
7.7	DIRECTION OF ANY SLOPE OVER THE DIPPING SURFACE	109
7.8	HORIZONTAL ANGLES PROJECTED ON TO AN INCLINED PLANE	110
7.8.1	Worked Example 2	111
7.8.2	Worked Example 3	112
7.9	CONCLUDING REMARKS	112
7.10	REFERENCE FOR CHAPTER 7	113
8	CHAPTER 8 CIRCULAR CURVES	115
8.1	INTRODUCTORY REMARKS	115
8.2	GENERATING A CIRCULAR CURVE - A PROCESS OF VISUALISATION	117
8.2.1	Basic Formulae	117
8.2.2	The Tangent Distance	117
8.2.3	The Long Chord	118
8.2.4	The Chord Deflection Angle	118
8.2.5	Chainage	119
8.2.6	In, Through and Out Arcs. Setout and Checking Tools	121
8.2.7	Calculating a Circular Curve: Definitions and Formulæ	122
8.3	LAYING OUT OF CIRCULAR CURVES	122
8.4	CALCULATIONS FOR A FIELD PRACTICAL EXERCISE	124
8.4.1	Calculation of a Design Curve	124
8.4.2	Curve Radius from Design Profile	124
8.4.3	Initial Curve Calculations	126
8.4.4	In, Through and Out arcs for Curve M1	127
8.5	ROADS IN MINING OPERATIONS	127
8.5.1	Haul Road Example	127
8.5.2	Curve T5, centre line calculations	127
8.6	CONCLUDING REMARKS	128
8.7	REFERENCES TO CHAPTER 8	129
9	CHAPTER 9 VERTICAL CURVES	131
9.1	INTRODUCTORY REMARKS	131
9.1.1	Definition	131
9.1.2	Uses	131
9.1.3	Components of a Vertical Curve	131
9.2	ELEMENTS OF THE VERTICAL CURVE	132
9.2.1	Sign of r.	133
9.3	CALCULUS OF THE PARABOLA	134
9.3.1	Developing the General Equation	134
9.3.2	Deriving Data from the General Equation	134
9.3.3	High or Low Point of the Vertical Curve	135
9.3.4	Level of High or Low Point of the Vertical Curve	135
9.3.5	The Midpoint of the Vertical Curve	136
9.3.6	Pass a Curve Through a Fixed Point	138
9.4	CALCULATE THE RLS OF POINTS ALONG THE VERTICAL CURVE	139
9.4.1	Worked Example. Single Vertical Curve	139
9.4.2	Worked Example. Multiple Vertical Curves	141
9.4.3	Vertical Curves in Rural Road Design	142
9.4.4	Grades in Rural Road Design	143
9.4.5	Length of Vertical Curves in Rural Road Design	144

9.4.6	“K” Value in Vertical Curve Design.....	144
9.4.7	Sight Distance in Vertical Curve Design.....	144
9.4.8	The Arc Length of the Vertical Curve.....	145
9.5	CONCLUDING REMARKS	145
9.6	REFERENCES FOR CHAPTER 9.....	145
10	CHAPTER 10 GLOBAL NAVIGATION SATELLITE SYSTEM	147
10.1	INTRODUCTORY REMARKS	147
10.2	GNSS, A REVOLUTION TO MINE AND CIVIL ENGINEERING INDUSTRIES.....	148
10.2.1	Measuring principle and GNSS Family	148
10.2.2	Applications to Mine and Civil Engineering Operations	148
10.3	GPS DESIGN AND OPERATION	149
10.3.1	Space Segment	149
10.3.2	Control Segment.....	150
10.3.3	User Segment	151
10.4	ERRORS IN GPS MEASUREMENTS	151
10.4.1	Ephemeris Errors.....	151
10.4.2	Clock Errors.....	152
10.4.3	Atmospheric Errors	152
10.4.4	Multipath.....	154
10.4.5	Satellite Constellation “Geometry”	154
10.4.6	Other Sources of Errors	155
10.5	CONCLUDING REMARKS	155
10.6	REFERENCE TO CHAPTER 10	155
11	CHAPTER 11 SETTING OUT OF ENGINEERING STRUCTURES	157
11.1	INTRODUCTORY REMARKS	157
11.2	CONTROL SURVEYING.....	158
11.3	UNDERTAKING AN ENGINEERING CONSTRUCTION PROJECT	159
11.3.1	Personnel involved	159
11.3.2	Recording and Filing of Information.....	159
11.3.3	Plans	159
11.3.4	Setting out Methods and Procedures.....	160
11.4	CONCLUDING REMARKS	167
11.5	REFERENCES TO CHAPTER 11	167
12	CHAPTER 12 COORDINATE TRANSFORMATION AND LEAST SQUARES SOLUTIONS.....	169
12.1	INTRODUCTION	169
12.2	DEFINITIONS	169
12.3	TRANSFORMATION METHODS.....	171
12.3.1	Block shift.....	171
12.3.2	Conformal transformation	172
12.3.3	A Matrix Method Approach to Coordinate Transformations - the Unique Solution.....	178
12.3.4	Least Squares Solution to Coordinate Transformation	181
12.4	COORDINATE TRANSLATIONS – A VERY HELPFUL TECHNIQUE.....	185
12.5	RESECTION TO A POINT BY EDM – A LEAST SQUARES SOLUTION	186
12.5.1	Resection by Observation from an Unknown Point to Two Known Points	187
12.6	LEAST SQUARES SOLUTION OF AN OVER-DETERMINED TRILATERATION PROBLEM.....	191

12.7	CONCLUDING REMARKS	195
12.8	REFERENCES TO CHAPTER 12	195
13	APPENDICES.....	197
A1	WORKSHOP MATERIALS	197
A1-1	WORKSHOP 1 - LEVELLING	197
A1-2	WORKSHOP 2 – EARTHWORKS: RELIEF REPRESENTATION AND VERTICAL SECTIONS	200
A1-3	WORKSHOP 3 – TOTAL STATION AND ANGULAR MEASUREMENTS	201
A1-4	WORKSHOP 4 – TRAVERSING	203
A1-5	WORKSHOP 5 – HORIZONTAL CURVES	204
A2	FIELD PRACTICAL MATERIALS.....	205
A2-1	INSTRUCTIONS FOR FIELD PRACTICAL SESSIONS.....	205
A2-1-1	INTRODUCTORY REMARKS	205
A2-1-2	CONDUCT OF FIELD PRACTICAL SESSIONS.....	205
A2-1-3	FIELD CHECKS	206
A2-1-4	COMPUTATIONS AND PLAN DRAWINGS	206
A2-1-5	EQUIPMENT.....	207
A2-1-6	HYGIENE, SAFETY AND DRESS.....	207
A2-1-7	WORKSHOPS	207
A2-1-8	FIELD PRACTICAL INSTRUCTIONS	207
A2-1-9	FIELD BOOKS AND DATA RECORDING.....	207
A2-2	ESTABLISHMENT OF VERTICAL CONTROL AND VERTICAL SECTIONS FOR A CONSTRUCTION SITE	208
A2-2-1	FIELD PRACTICAL 1: ESTABLISHMENT OF VERTICAL CONTROL.....	208
A2-2-2	FIELD PRACTICAL 2: VERTICAL SECTIONS.....	210
A2-3	ESTABLISHMENT OF HORIZONTAL CONTROL FOR A CONSTRUCTION SITE.....	219
A2-3-1	FIELD PRACTICAL 3: ESTABLISHMENT OF HORIZONTAL CONTROL	219
A2-3-2	FIELD PRACTICAL 4: ESTABLISHMENT AND ADJUSTMENT OF CONSTRUCTION SITE BOUNDARY CONTROL	223
A2-4	ESTABLISHMENT OF HORIZONTAL CURVES FIELD EXAMINATION.....	229
A2-4-1	CALCULATION AND SET-OUT OF A SIMPLE CURVE—ASSESSED FIELD PRACTICAL 5.....	229
A2-4-2	LOCATION OF FIELD WORK: EDINBURGH OVAL SOUTH.....	231
A2-4-3	CURVE SET-OUT DATA	232
A2-4-4	CURVE COORDINATE DATA FOR EACH GROUP	233
A2-4-5	CURVE CHECK OBSERVATIONS.....	234
A2-4-6	EXAMPLE GROUP ASSESSMENT FORM.....	235
A2-4-7	DEFINITIONS AND FORMULAE.....	236
A2-5	COMPUTATION OF DESIGN PARAMETERS OF VERTICAL CURVES	238
A2-5-1	PRACTICAL 6.....	238
A2-5-2	TASK:	238
A2-6	EXAMPLES OF INTERIM REPORTS	242
A3	CIVIL ENGINEERS PRACTICALS	243
A3-1	CIVIL ENGINEERS PRACTICALS 1	243
A3-2	CIVIL ENGINEERS PRACTICAL 2	244
A3-3	CIVIL ENGINEERS PRACTICAL 3	245
A3-4	CIVIL ENGINEERS PRACTICAL 4	246
A4	MINING ENGINEERS PRACTICALS.....	247
A4-1	MINING ENGINEERS PRACTICAL 1.....	247

A4-2	MINING ENGINEERS PRACTICAL 2.....	248
A4-3	MINING ENGINEERS PRACTICAL 3.....	249
A4-4	MINING ENGINEERS PRACTICAL 4.....	250
A4-5	CIVIL AND MINING ENGINEERS. PRACTICAL 5	251
A5	SURVEY CALCULATIONS ON THE HP 10s+	252
A5-1	INTRODUCTION	252
A5-1-1	SET-UP FOR SURVEYING.....	252
A5-1-2	TIME/ANGLE CALCULATIONS:	252
A5-1-3	DMS TO DECIMAL DEGREES: ON ANS LINE.	252
A5-1-4	DEGREES TO RADIANS:.....	252
A5-1-5	WHY RADIANS TO DEGREES?	253
A5-2	VECTOR CONVERSION AND AXES ROTATION.....	253
A5-2-1	THEM (THE US) AND US (AUSTRALIA).....	254
A5-2-2	THE IMPORTANCE OF THE SIGN OF THE RECTANGULAR COORDINATES	254
A5-3	CONVERTING BETWEEN POLAR AND RECTANGULAR COORDINATES USING FUNCTION KEYS.....	254
A5-3-1	TRIGONOMETRIC CONVERSION TO RECTANGULAR COORDINATES.....	254
A5-3-2	TRIGONOMETRIC CONVERSION USING THE REC() FUNCTION KEY	254
A5-4	CONVERTING BETWEEN RECTANGULAR AND POLAR COORDINATES USING FUNCTION KEYS.....	255
A5-4-1	TRIGONOMETRIC CONVERSION TO POLAR COORDINATES	255
A5-4-2	TRIGONOMETRIC CONVERSION USING THE POL() FUNCTION KEY	256
A5-4-3	THE ATAN2() FUNCTION IN SPREADSHEETS.....	256
A5-5	USING THE M+ KEY FOR ACCUMULATE OPERATIONS	256
A5-6	STATISTICS, MEAN AND STANDARD DEVIATIONS	257
A5-7	CONCLUDING REMARKS.....	257
A5-8	REFERENCES APPENDIX A5	257
14	INDEX.....	259

Surveying for Civil and Mine Engineers

Theory, Workshops, and Practicals

Walker, J.; Awange, J.L.

2018, XXI, 260 p. 250 illus., 73 illus. in color., Hardcover

ISBN: 978-3-319-53128-1
