

Contents

1	Introduction	1
1.1	Conventional Control System Design	1
1.1.1	Mathematical Modeling	2
1.1.2	Performance Objectives and Design Constraints	4
1.2	Evolution of Fuzzy Logic Control	5
1.2.1	Fuzzy Modeling and Identification	6
1.2.2	Why Fuzzy Control?	6
1.2.3	Benefits of Fuzzy Logic Control	7
1.2.4	Components of the Fuzzy Logic Controller	7
1.3	Fuzzy Control System Design	8
1.4	Outline of the Book	9
1.4.1	Methodology	9
1.4.2	Objectives of the Book	10
1.4.3	Chapter Organization	11
 Part I Applications and Tools		
2	Basics of Fuzzy Control	15
2.1	Introduction	15
2.2	Classical Sets and Fuzzy Sets	16
2.2.1	Illustrative Example 2.1	16
2.2.2	Set Operations and Properties	16
2.2.3	Fuzzy Sets and Operations	17
2.2.4	Classification of Fuzzy Sets	20
2.2.5	Membership Functions	20
2.2.6	A Comparison	25
2.3	Fuzzification	27
2.3.1	Illustrative Example 2.2	28
2.3.2	Illustrative Example 2.3	29

2.4	Fuzzy Rule-Based System	30
2.4.1	Fuzzy If-Then Rules	30
2.4.2	Fuzzy Proposition	31
2.4.3	Methods for Construction of Rule-Base	32
2.4.4	Illustrative Example 2.4	32
2.5	Defuzzification	33
2.5.1	Mean of Maximum (MOM) Method	34
2.5.2	Center of Gravity (COG) Method	34
2.5.3	The Height Method (HM)	35
2.5.4	The Lookup Table	35
2.5.5	Illustrative Example 2.5	36
2.6	Fuzzy Inference System	37
2.6.1	Mamdani Fuzzy Inference	38
2.6.2	Tsukamoto Fuzzy Inference	38
2.6.3	Sugeno Fuzzy Method	39
2.7	Fuzzy Control Basics	41
2.7.1	Linguistic Variables, Values, and Rules	42
2.7.2	Universes of Discourse	42
2.7.3	Linguistic Variables	43
2.7.4	Linguistic Values	43
2.8	Notes	43
	Problem.	44
3	Discrete-Time Fuzzy Delay Systems	45
3.1	Control of Discrete Fuzzy Delay Systems	45
3.1.1	Problem Statement	45
3.1.2	Stability Analysis	49
3.1.3	Piecewise State Feedback	54
3.1.4	Piecewise Output Feedback	57
3.1.5	Optimization Procedure	63
3.1.6	Simulation Example 3.1	65
3.2	Filtering of Discrete Fuzzy Delay Systems	71
3.2.1	Problem Formulation	72
3.2.2	Delay-Dependent Fuzzy Filtering	75
3.2.3	Simulation Example 3.2	86
3.2.4	Simulation Example 3.3	88
3.3	Notes	92
	Problems.	93
4	Fuzzy Networked Control Systems	99
4.1	Networked Systems with Two-Quantizers	99
4.1.1	Introduction	99
4.1.2	System Description	100
4.1.3	Effect of Network Elements	102

4.1.4	Closed-Loop Fuzzy System	104
4.1.5	Feedback Design Result	104
4.1.6	Case of Single Quantizer	107
4.1.7	Design of Feedback Gains	108
4.1.8	Observer-Based Feedback Design	110
4.1.9	Simulation Example 4.1	113
4.2	Robust Networked Discrete Systems	118
4.2.1	Problem Setup	118
4.2.2	Closed-Loop Fuzzy System	120
4.2.3	State Feedback Control	120
4.2.4	Quantizer	121
4.2.5	Quantized Fuzzy Control Design	123
4.2.6	Special Cases	130
4.2.7	Nominal Case	131
4.2.8	Case of NCS Without Quantizer	132
4.2.9	Simulation Example 4.2	133
4.2.10	Simulation Example 4.3	136
4.3	Decentralized Networked Systems	138
4.3.1	Introduction	138
4.3.2	System Formulation	139
4.3.3	Virtual Control Design	142
4.3.4	Controller Design	145
4.3.5	Case 1: Known Parameters	146
4.3.6	Case 2: Unknown Parameters	152
4.3.7	Simulation Example 4.4	155
4.3.8	Simulation Example 4.5	159
4.4	Fuzzy Quantized Networked Systems with Random Delays	163
4.4.1	Introduction	163
4.4.2	Problem Formulation	164
4.4.3	Stability Results	169
4.4.4	Computer Simulation	177
4.4.5	Simulation Example 4.6	179
4.4.6	Simulation Example 4.7	183
4.5	Notes	186
	Problems	189
5	Adaptive and Sliding-Mode Fuzzy Control	193
5.1	Adaptive Fuzzy Control	193
5.1.1	Introduction	193
5.1.2	Problem Definition	194
5.1.3	Stabilizing Control Design	196
5.1.4	Simulation Example 5.1	205
5.1.5	Simulation Example 5.2	206

5.2	Variable Structure Discrete Fuzzy Systems	208
5.2.1	Introduction	208
5.2.2	Problem Statement	211
5.2.3	Structure of FLC	212
5.2.4	Design Results	218
5.2.5	Simulation Example 5.3	222
5.3	Feedback Triggering Fuzzy Control	226
5.3.1	Introduction	227
5.3.2	System Description	228
5.3.3	Dynamic Feedback Fuzzy Controller	229
5.3.4	Systems with Event-Triggering	230
5.3.5	Systems with Self-triggering	233
5.3.6	Simulation Example 5.4	234
5.4	Communication Scheme for Fuzzy Networked Systems	237
5.4.1	Introduction	239
5.4.2	Event-Triggered Communication Scheme	240
5.4.3	Networked T-S Fuzzy Systems	242
5.4.4	Stability Analysis and Controller Synthesis	245
5.4.5	Simulation Example 5.5	248
5.5	Notes	251
	Problems	252
6	Robust Fuzzy Control	255
6.1	Optimal Fuzzy Control	255
6.1.1	Introduction	255
6.2	Twin Rotor System (TRS)	256
6.2.1	Model Description	256
6.2.2	System Mathematical Model	257
6.2.3	Quasi-linearization Approach	259
6.2.4	Decoupled Models	260
6.2.5	Simplification of Nonlinear Functions	261
6.2.6	Takagi-Sugeno Fuzzy Model	263
6.2.7	Simulation Example 6.1	268
6.2.8	Design of Parallel Distributed Fuzzy LQ Controllers	269
6.2.9	Stability Analysis	269
6.2.10	Simulation Example 6.2	271
6.3	Robust H_∞ Fuzzy Control Synthesis	279
6.3.1	Preliminaries	279
6.3.2	Robust H_∞ State Feedback Design	280
6.3.3	Robust H_∞ Output Feedback Design	285
6.3.4	Simulation Example 6.3	292
6.4	Notes	297
	Problems	297

Part II Fuzzy Estimation

7	Fuzzy Robust Estimation	303
7.1	Fuzzy Modeling Identification	303
7.1.1	Constructing Fuzzy Models	303
7.1.2	Structure and Parameters	304
7.1.3	Fuzzy Systems and Neural Networks	305
7.2	Decentralized Fuzzy Estimation	305
7.2.1	Problem Description	306
7.2.2	The Individual Level	306
7.2.3	Subsystem Fuzzy Model	307
7.2.4	The Higher Level	308
7.3	Linear Fuzzy Estimator Structure	310
7.3.1	Global Estimator Analysis	312
7.3.2	Local Estimator Design	314
7.3.3	Simulation Example 7.1	317
7.3.4	Simulation Example 7.2	321
7.4	Fuzzy Kalman Filtering	323
7.4.1	Clustering Algorithm for Antecedent Estimation	324
7.4.2	The ERA/DC Algorithm for Consequent Estimation	325
7.4.3	Fuzzy Kalman Filter Algorithm	329
7.4.4	Simulation Example 7.3	331
7.5	Applications of Kalman Filter	339
7.5.1	Target Tracking System	340
7.5.2	Kalman Controller	341
7.5.3	Fuzzy Identification Models	344
7.5.4	New Fuzzy Modeling Algorithm	345
7.5.5	Estimating Consequent Parameters	349
7.5.6	Application	352
7.6	Fuzzy Extended Kalman Estimation	353
7.6.1	Introduction	354
7.6.2	Identification of T-S Model	354
7.6.3	Iterative Parameter Identification	356
7.6.4	Extended Kalman Filter	357
7.6.5	Kalman Filter for Parameters Identification	358
7.6.6	Application of T-S Fuzzy Model	359
7.7	Design of Optimal Fuzzy Controller	360
7.7.1	Computation of the Affine Term	361
7.7.2	State Feedback Control	361
7.7.3	Simulation Example 7.4	363
7.8	Quantized Fuzzy Filtering Approach	366
7.8.1	Problem Formulation	367
7.8.2	Local Quantizers	368

7.8.3	The Global Filtering Error Dynamics	371
7.8.4	Analysis Results	372
7.8.5	Design Results	375
7.8.6	Interconnected Delay-Free Fuzzy Systems	377
7.8.7	Single Time-Delay Fuzzy System	378
7.8.8	Single Linear Fuzzy System	379
7.8.9	Simulation Example 7.5	380
7.8.10	Simulation Example 7.6	384
7.9	Notes	392
	Problems	393
8	Fuzzy Stabilization Approaches	397
8.1	Fuzzy Dissipative Stabilization	397
8.1.1	Introduction	397
8.1.2	Problem Statement	398
8.1.3	Fuzzy Feedback Stabilization	400
8.1.4	Stabilization with Disturbance Attenuation	403
8.1.5	Asymptotic Stabilization with Strict Positive Realness	403
8.1.6	Asymptotic Stabilization with Passivity	404
8.1.7	Simulation Example 8.1	404
8.1.8	Simulation Example 8.2	408
8.2	Fuzzy Observer-Based Stabilization of Delay Systems	413
8.2.1	Introduction	413
8.2.2	Problem Description	414
8.2.3	State Feedback Stabilization	415
8.2.4	Observer-Based Feedback	421
8.2.5	Simulation Example 8.3	427
8.2.6	Simulation Example 8.4	429
8.2.7	Simulation Example 8.5	430
8.2.8	Simulation Example 8.6	434
8.3	Fuzzy Decentralized Quantized Control	437
8.3.1	Introduction	437
8.3.2	Problem Statement	438
8.3.3	Local Quantizers	440
8.3.4	Output Feedback Design	441
8.3.5	Without Quantization	441
8.3.6	With Quantization	445
8.3.7	Special Cases	449
8.3.8	Single Time-Delay Fuzzy System	449
8.3.9	Large-Scale Fuzzy Delay-Less Systems	450
8.3.10	Single Fuzzy System	451
8.3.11	Simulation Example 8.7	452
8.3.12	Simulation Example 8.8	460

8.4	Reliable Mixed $\mathcal{L}_2/\mathcal{H}_\infty$ Fuzzy Nonlinear Systems	464
8.4.1	Introduction	465
8.4.2	Problem Formulation	466
8.4.3	A Sufficient Condition	469
8.4.4	An ILMI Algorithm	471
8.4.5	Simulation Example 8.9	472
8.5	Notes	476
	Problems	477

Part III Fuzzy Diagnosis

9	Fuzzy Fault Detection and Control	483
9.1	General	483
9.1.1	Fault Detection and Diagnosis Scheme	485
9.1.2	Fuzzy Modeling	486
9.2	Fault Detection in Finite-Frequency Domain	487
9.2.1	Introduction	488
9.2.2	System Description	489
9.2.3	Fault Detection Filter	490
9.2.4	Finite Frequency Performance Analysis	492
9.2.5	Inequality Condition for Finite Frequency H_∞ Performance	494
9.2.6	Inequality Condition for Low-Frequency H_- Performance	499
9.2.7	Fault Detection Filter for Low-Frequency H_- Performance	500
9.2.8	Fault Detection Filter for High-Frequency H_∞ Performance	503
9.2.9	Stability Condition	504
9.2.10	FD Filter Parameters	506
9.2.11	Detection Threshold Design	506
9.2.12	Simulation Example 9.2	507
9.2.13	Simulation Example 9.3	509
9.3	Fuzzy Sensor Fault Detection Design	511
9.3.1	Introduction	513
9.3.2	Physical Model	514
9.3.3	Feedback Control	515
9.4	Takagi–Sugeno Models	516
9.4.1	TS Model with Measurable Decision Variables	516
9.4.2	T–S Model with Unmeasurable Decision Variables	518
9.4.3	Descriptor Observer Design	520
9.4.4	Simulation Example 9.4	522

9.5	H_∞ Fault Detection Filter for Fuzzy Descriptor Systems	526
9.5.1	Introduction	526
9.5.2	Problem Formulation	527
9.5.3	Design Results	531
9.5.4	Simulation Example 9.5	537
9.6	Notes	542
	Problems	543
10	Fuzzy Fault Diagnosis	547
10.1	Approach to Fuzzy Fault Detection and Isolation	547
10.1.1	Introduction	547
10.1.2	Fuzzy Modeling	549
10.1.3	Takagi–Sugeno Fuzzy Model	549
10.1.4	Fuzzy Clustering for Identification	550
10.1.5	Parameter Estimation	551
10.1.6	Description of the Process	552
10.1.7	FDI System Design	552
10.1.8	FDI Validation	556
10.2	Fault Diagnosis Using Adaptive Neuro-Fuzzy	558
10.2.1	Introduction	559
10.2.2	Fault Diagnosis Features	559
10.2.3	Adaptive Neuro-Fuzzy Inference System	560
10.2.4	Learning Processes	561
10.2.5	Development of ANFIS Model	563
10.2.6	Main Features of the ANFIS	565
10.3	The ANFIS Design	566
10.3.1	Fault Types Classification	567
10.3.2	ANFIS1 Design for Fault Types Classification	568
10.3.3	Fault Location Identification	570
10.3.4	Identifying Fault Location	571
10.3.5	Typical Power System	572
10.3.6	Power Restoration Plan	573
10.3.7	ANFIS4 Design for Planning Power Restoration	574
10.3.8	Training ANFIS4 for Power Restoration Plan	575
10.3.9	Result of Fault Diagnosis	576
10.3.10	Result on ANFIS1 Prediction	577
10.3.11	ANFIS2: Identifying X Coordinate Fault Location	577
10.3.12	ANFIS3: Identifying Y Coordinate Fault Location	577
10.3.13	ANFIS4: Planning Power Restoration	578
10.4	Notes	579
	Problems	579

Part IV Applications and Tools

11 Applications	589
11.1 DC Motor	589
11.1.1 Mathematical Model	589
11.1.2 Fuzzy Logic Control	591
11.1.3 Fuzzification	592
11.1.4 Defuzzification	593
11.1.5 Rule Table and Inference Engine	594
11.1.6 Simulation Results	594
11.2 The Truck Backing-UP (TBU) Problem	596
11.3 Active Magnetic Bearing System	600
11.3.1 Model Identification	601
11.3.2 PID Fuzzy Controller Design	603
11.3.3 Tuning the Scaling Factors	605
11.3.4 Controller Implementation	609
11.4 Generation–Demand Balance in Isolated Power Distribution Systems	609
11.4.1 Introduction	609
11.4.2 System Configuration	610
11.4.3 Grid Structure	610
11.4.4 Control Strategy	611
11.4.5 Simulation Results	615
11.5 Mechatronics and Automation	617
11.5.1 Vehicle Primary Suspensions	617
11.5.2 Passive Damping	618
11.5.3 Active Damping	618
11.5.4 Semi-active Damping	618
11.5.5 Modeling of Quarter Car Model	619
11.5.6 Fuzzy Logic Controller for the Suspension System	620
11.5.7 Design of Fuzzy Controller for the Suspension System	622
11.5.8 Range of Membership Function	624
11.5.9 Fuzzy Suspension Control Performance	625
11.6 Mobile Autonomous Robot System	627
11.6.1 Mechanism	627
11.6.2 Controller Design	629
11.7 Notes	631
12 Simulation Tools	633
12.1 Simulink for Beginners	633
12.1.1 MATLAB Command Window	633
12.2 A Glance of Fuzzy Logic Toolbox	637

12.2.1	The FIS Editor	638
12.2.2	The Membership Function Editor	640
12.2.3	The Rule Editor	643
12.2.4	The Rule Viewer	646
12.2.5	The Surface Viewer	648
12.2.6	Initial Example	650
