

Contents

1	Environmental Monitoring	1
1.1	Monitoring	1
1.2	Satellite Monitoring	5
1.3	Integration of GNSS with Remote Sensing Satellites	7
1.4	Objectives and Aims of the Book.	10
	References.	11
 Part I Global Navigation Satellite Systems (GNSS)		
2	Modernization of GNSS	17
2.1	Introductory Remarks	17
2.2	GNSS Family and the Future	18
2.3	Benefits of the Expanding GNSS Family	21
2.4	Concluding Remarks.	23
	References.	24
3	The Global Positioning System	25
3.1	Introductory Remarks	25
3.2	GPS Design and Operation.	25
	3.2.1 Space Segment	26
	3.2.2 Control Segment	27
	3.2.3 User Segment	28
3.3	GPS Observation Principles	29
	3.3.1 GPS Signals	29
	3.3.2 Measuring Principle.	32
3.4	Errors in GPS Measurements	34
	3.4.1 Ephemeris Errors.	35
	3.4.2 Clock Errors	36
	3.4.3 Atmospheric Errors	36
	3.4.4 Multipath.	40
	3.4.5 Satellite Constellation “Geometry”	40
	3.4.6 Other Sources of Errors.	41

3.5	Concluding Remarks.	41
	References.	41
4	Mathematical Modelling	43
4.1	Introductory Remarks	43
4.2	Observation Equations	44
4.3	Models	47
4.3.1	Static and Kinematic Positioning.	50
4.3.2	Differential GPS (DGPS).	52
4.3.3	Relative Positioning.	54
4.4	Concluding Remarks.	56
	References.	58
5	Environmental Surveying and Surveillance.	59
5.1	Environmental Monitoring Parameters	59
5.2	Design of GNSS Monitoring Survey	60
5.3	Mission Planning and Reconnaissance	61
5.4	GNSS Field Procedures	66
5.4.1	Single Point Positioning	67
5.4.2	Static Relative Positioning.	69
5.4.3	Real-Time GNSS (RTGNSS)	71
5.4.4	Differential and Augmented GNSS	72
5.4.5	Rapid Positioning Methods	74
5.4.6	Real-Time Kinematic (RTK)	77
5.4.7	Precise Point Positioning (PPP).	79
5.5	Environmental Surveillance: CORS Monitoring	80
5.6	Coordinate Reference System.	87
5.6.1	Datum	87
5.6.2	Coordinate Systems.	89
5.6.3	Map Projection	91
5.7	Concluding Remarks.	92
	References.	94
6	Data Processing and Adjustment	97
6.1	Introductory Remarks	97
6.2	Processing of Observations.	97
6.2.1	Data.	97
6.2.2	Baseline Processing.	99
6.2.3	Solution Types	100
6.2.4	Quality Assessment	102
6.2.5	Adjustment of GNSS Network Surveys.	103
6.3	Least Squares Solution	105
6.4	Online Processing.	111
6.5	Concluding Remarks.	113
	References.	113

7	Basics of Galileo Satellites	115
7.1	Introductory Remarks	115
7.2	Galileo Design and Operation	117
7.2.1	User Component	117
7.2.2	Global Component	119
7.2.3	Regional Component	120
7.2.4	Local Component	120
7.3	Galileo Signals	121
7.4	Concluding Remarks	122
	References	122

Part II Applications to Environmental Monitoring

8	GNSS Maps in Environmental Monitoring	125
8.1	Maps and Their Environmental Applications	125
8.2	Types of Maps	126
8.2.1	Thematic Maps	126
8.2.2	Topographical Maps	127
8.2.3	GNSS-Derived Topographical Maps	128
8.2.4	Application to the Monitoring of Lake Jack Finney	133
8.3	Concluding Remarks	136
	References	137
9	GNSS Remote Sensing of the Environment	139
9.1	Introductory Remarks	139
9.2	GNSS Remote Sensing of the Atmosphere	140
9.2.1	Background to GNSS-Meteorology	141
9.2.2	GNSS-Derived Atmospheric Parameters	142
9.2.3	GNSS Remote Sensing Techniques	150
9.3	GNSS Contribution to Remote Sensing of Gravity Variations	159
9.3.1	Mass Variation and Gravity	159
9.3.2	High and Low Earth Orbiting Satellites	160
9.3.3	Gravity Recovery and Climate Experiment	162
9.4	Satellite Altimetry	164
9.4.1	Remote Sensing with Satellite Altimetry	164
9.4.2	Satellite Altimetry Missions	166
9.5	Concluding Remarks	167
	References	168
10	GNSS Reflectometry and Applications	173
10.1	Remote Sensing Using GNSS Reflectometry	173
10.1.1	Background	173
10.1.2	Geometry and Observations	175

10.2	Environmental Applications	177
10.2.1	Sensing Changes in Soil Moisture	178
10.2.2	Sensing Changes in Vegetation	180
10.2.3	Sensing Changes in Cryosphere	181
10.2.4	Sensing Changes in Lakes and Oceans	181
10.3	Concluding Remarks.	182
	References.	182
11	Climate Change and Weather Related Impacts	185
11.1	Weather, Climate, and Global Warming	185
11.2	Impacts of Weather and the Changing Climate.	187
11.2.1	Weather Related Impacts	187
11.2.2	Climate Related Impacts	187
11.3	Water Vapour	190
11.3.1	Significance	190
11.3.2	Numerical Weather Prediction	191
11.4	Environmental Monitoring Applications	194
11.4.1	GNSS Applications to Weather Monitoring.	194
11.4.2	GNSS Applications to Climate Change Monitoring.	196
11.4.3	Monitoring of Global Warming	199
11.4.4	Monitoring Cryospheric Changes	206
11.4.5	Possible Contributions of GNSS to International Protocols	207
11.5	Concluding Remarks.	210
	References.	210
12	GNSS Sensing of Climate Variability.	217
12.1	Introductory Remarks	217
12.2	Variability of the Tropopause	218
12.3	GNSS Monitoring of Tropopause Variability	219
12.4	Example: Ganges-Brahmaputra-Meghna (GBM) River Basin.	220
12.5	The GBM River Basin	220
12.5.1	COSMIC GNSS-Meteorological Data	221
12.5.2	Reanalysis Products.	222
12.5.3	Climate Variability Indices	224
12.5.4	GBM Tropopause Temperatures and Heights	225
12.5.5	Principal Component Analysis (PCA)	225
12.6	Variability of the GBM Tropopause	226
12.6.1	Seasonal and Interannual Variability of Temperature	226
12.6.2	Trends and Variability of Tropopause Heights and Temperatures	230
12.7	Concluding Remarks.	237
	References.	238

13 Environmental Impact Assessment	243
13.1 GNSS Support of EIA, SEA, and SA	243
13.1.1 Impact Assessments and the Need for Monitoring	243
13.1.2 Applications of GNSS	244
13.2 Impact Monitoring to Detect Change	246
13.3 Project EIA	247
13.3.1 GNSS in Support of EIA Process	247
13.3.2 GNSS in Support of Multi-criteria Analysis	249
13.3.3 Example of Gwangara Mound Groundwater Resources	256
13.4 Strategic Environmental Assessment	264
13.4.1 GNSS Role in Supporting Cumulative Impacts Assessments	265
13.4.2 Example of Marillana Creek (Yandi) Mine	266
13.5 Sustainability Assessment	268
13.6 Concluding Remarks	268
References	269
14 Water Resources	273
14.1 Why Monitor Variation in Fresh Water Resources?	273
14.2 Gravity Field and Changes in Stored Water	276
14.2.1 Gravity Field Changes and the Hydrological Processes	276
14.2.2 Monitoring Variation in Stored Water Using Temporal Gravity Field	277
14.3 Examples of Space Monitoring of Changes in Stored Water	279
14.3.1 The Nile Basin	279
14.3.2 Understanding the Decline of Lake Naivasha	292
14.3.3 Water, a Critical Dwindling Australian Resource	299
14.4 Concluding Remarks	304
References	304
15 Coastal Resources	311
15.1 Integrated Coastal Zone Management and Its Importance	311
15.2 Marine Habitat	312
15.2.1 Background	312
15.2.2 Satellites Monitoring of Marine Habitats	313
15.3 Shoreline Monitoring and Prediction	315
15.3.1 Definition and Need for Monitoring	315
15.3.2 Monitoring	317
15.3.3 Prediction	322
15.4 Concluding Remarks	328
References	328

16	Land Management	333
16.1	Introductory Remarks	333
16.2	GNSS for Reconnaissance and Validation	333
16.3	Monitoring of Land Conditions	334
16.3.1	Soil Landscape Mapping	334
16.3.2	Provision of Point Data	335
16.3.3	Provision of Polygon Data	336
16.4	Monitoring of Land Degradation	337
16.4.1	Soil Erosion Monitoring	337
16.4.2	Salinity Monitoring: The Catchment Approach	338
16.5	GNSS Support of Precise Farming	343
16.5.1	Precise Farming	343
16.5.2	Farm Topographical Maps	344
16.6	Concluding Remarks	347
	References	348
17	Disaster Management	351
17.1	Geosensor Networks in Disaster Monitoring	351
17.1.1	Disasters and Their Impacts	351
17.1.2	GNSS in Support of Geosensor Networks	353
17.2	Changing Sea Levels	354
17.2.1	Impacts of Rise in Sea Level	355
17.2.2	Tide Gauge Monitoring	357
17.2.3	GNSS Monitoring	357
17.3	Tsunami Early Warning System	360
17.4	Land Subsidence and Landslides	362
17.5	Earthquakes	365
17.6	Floods	371
17.6.1	Flood Forecasting and Warning	372
17.6.2	Mapping of Flood Events and Damage Assessment	373
17.6.3	Flood Plain Management	374
17.6.4	GNSS Monitoring of ENSO and IOD	375
17.7	Droughts	377
17.7.1	Early Warning of Drought	378
17.7.2	Monitoring and Assessment	379
17.7.3	Combating Drought	380
17.8	Vector-Borne Diseases and Outbreak	380
17.9	Concluding Remarks	382
	References	382
18	Environmental Pollution	387
18.1	The Concept of Pollution and Applications of GNSS	387
18.2	Water Pollution	388
18.2.1	Point and Non-point Sources	388
18.2.2	Eutrophication of the Lakes	390

18.3	Air Pollution	391
18.3.1	Background	391
18.3.2	Pollution from Transportation Sector	392
18.4	Land Pollution	394
18.4.1	Solid Waste Collection and Management	394
18.4.2	GNSS Support of Solid Waste Management	394
18.4.3	Solid Waste from Transportation Sector	395
18.4.4	Acid Mine Deposit Sites	399
18.5	Concluding Remarks	400
	References	400
19	Animals and Vegetation Protection and Conservation	403
19.1	Introductory Remarks	403
19.2	GNSS Animal Telemetry	404
19.2.1	Benefits and background	404
19.2.2	Observation and Data Management Techniques	406
19.2.3	Applications	407
19.3	Vegetation	415
19.3.1	Forests	416
19.3.2	Wetlands	419
19.4	Concluding Remarks	420
	References	421
20	Unmanned Aircraft Vehicles	423
20.1	Introductory Remarks	423
20.2	Background to UAVs	424
20.2.1	Terminology and Definitions	424
20.2.2	Historical Background of the UAV Development	425
20.3	Basics of Unmanned Aerial System (UAS)	427
20.3.1	Unmanned Aircrafts	427
20.3.2	Ground Control Station	430
20.3.3	Data Link	431
20.3.4	Payload, Launch and Recovery Equipment and Ground Support Equipment	432
20.4	GNSS in Supporting UAVs	432
20.4.1	Precise Hovering of Rotary-Wing UAVs	432
20.4.2	Automatic Return System and Autonomous Fly System	433
20.4.3	Object Avoidance Program	433
20.4.4	GPS to Geo-Located Images Captured by UAVs	434
20.5	Environment Application of UAVs	434
20.5.1	Agriculture Monitoring	434
20.5.2	DEM Models for Disaster Management and Reconstruction	436
20.5.3	Classification, Change Detection and Tracing	437

20.6 Future Challenges of UAVs 439

20.6.1 Technology Aspect 439

20.6.2 Legal Issue 440

20.7 Concluding Remarks. 441
