

Contents

1	Introduction	1
1.1	Vehicular Ad-Hoc Networks	2
1.1.1	VANET Applications	3
1.1.2	VANET Characteristics	3
1.2	Node Cooperation in Wireless Communication	4
1.3	Motivation and Research Contributions	5
1.4	Outline	7
	References	7
2	Background and Literature Review	11
2.1	Medium Access Control in VANETs	11
2.1.1	IEEE 802.11	11
2.1.2	Time Division Multiple Access	13
2.2	Link-Layer Cooperation	13
2.2.1	Objective and Issues	14
2.2.2	Link-Layer Cooperation	15
2.2.3	Cooperation for Makeup Transmission	16
2.3	Summary	17
	References	17
3	System Model	21
3.1	Network Topology and Communication Among Nodes	21
3.2	Channel Access	21
3.3	Time Synchronization Among Vehicles	22
3.4	Neighboring Nodes	22
3.5	Reservation and Retention of Time Slots	23
	References	24
4	Cooperation in ADHOC MAC	25
4.1	CAH-MAC Basics	26
4.1.1	Frame Information	26
4.1.2	Node Cooperation Mechanism	28
4.1.3	Cooperation Header and Cooperation Acknowledgement	30

4.2	Preliminaries for the Performance Analysis	31
4.2.1	Node Distribution	31
4.2.2	Distribution of the Number of Neighboring Nodes.....	32
4.2.3	Transmission During a Time Slot	33
4.2.4	Types of Time Slots and Their Distributions	33
4.2.5	Cooperation Enabled Transmission	34
4.2.6	Benefits of Cooperation	36
4.3	Throughput Analysis	37
4.3.1	Expected Number of Successful Time Slots	37
4.3.2	Throughput and Throughput Gain.....	38
4.4	Reliability Analysis	38
4.4.1	Packet Transmission Delay	38
4.4.2	Packet Dropping Rate	39
4.5	Numerical Results	40
4.6	Summary	47
	References	48
5	Enhanced Node Cooperation	49
5.1	System Overview	50
5.1.1	Channel Model	50
5.1.2	Cooperation Collisions and Release of Time Slots	51
5.2	Enhanced Cooperative ADHOC MAC	53
5.2.1	Types of Packet Structure	53
5.2.2	Cooperation Collision Avoidance	54
5.3	Utilization of an Unreserved Time Slot	56
5.3.1	Distribution of Node Number	57
5.3.2	Probability of <i>Event 3</i>	58
5.3.3	Probability of <i>Event 4</i>	59
5.3.4	Close-Form Expressions for Time Slot Utilization	60
5.4	Numerical Results	61
5.5	Simulation Results	63
5.6	Summary	73
	References	75
6	Cooperative Relay Broadcasting	77
6.1	System Overview	78
6.1.1	Two-State Markov Channel.....	79
6.2	Node Cooperation for Broadcast Service in D-TDMA MAC	81
6.3	Optimal Helper Selection with Accurate Channel Information	84
6.4	Helper Selection with Channel Prediction	85
6.4.1	Prediction of Failed and Successful Nodes	86
6.4.2	Cooperation Decisions	87
6.4.3	Re-broadcasting of Tagged Packets	88
6.5	Simulation Results	90
6.6	Summary	94
	References	98
