

# Contents

<b>Limit Load Theorems for the Drucker-Prager Yield Condition with a Non-associated Flow Rule</b> . . . . .	1
A.R.S. Ponter	
<b>A Direct Method for Predicting the High-Cycle Fatigue Regime of Shape-Memory Alloys Structures</b> . . . . .	13
Michaël Peigney	
<b>Shakedown Within Polycrystals: A Direct Numerical Assessment</b> . . . . .	29
D. Magisano, E. Charkaluk, G. de Saxcé and T. Kanit	
<b>On the Size of the Representative Volume Element Used for the Strength Prediction: A Statistical Survey Applied to the Particulate Reinforce Metal Matrix Composites (PRMMCs)</b> . . . . .	51
Geng Chen, Alexander Bezold, Christoph Broeckmann and Dieter Weichert	
<b>R-adaptivity in Limit Analysis</b> . . . . .	73
José J. Muñoz, James Hambleton and Scott W. Sloan	
<b>Shakedown Analysis Under Stochastic Uncertainty by Chance Constrained Programming</b> . . . . .	85
N.T. Tran, T.N. Tran, H.G. Matthies, G.E. Stavroulakis and M. Staat	
<b>Composite Finite Elements in Structural Analysis</b> . . . . .	105
G. Garcea and L. Leonetti	
<b>Recent Progress on Lower-Bound Shakedown Analysis of Road Pavements</b> . . . . .	129
J. Wang, S. Liu and H.S. Yu	
<b>Numerical Yield Design Analysis of High-Rise Reinforced Concrete Walls in Fire Conditions</b> . . . . .	143
J. Bleyer, D.T. Pham and P. de Buhan	

<b>Efficient Shakedown Solutions in Complex Loading Domains . . . . .</b>	<b>163</b>
K.D. Panagiotou and K.V. Spiliopoulos	
<b>Some Graphical Interpretations of Melan's Theorem for Shakedown Design . . . . .</b>	<b>179</b>
N. Vermaak, M. Boissier, L. Valdevit and R.M. McMeeking	
<b>High Temperature Limit Analysis of Pressure Vessels and Piping with Local Wall-Thinning . . . . .</b>	<b>199</b>
X. Du, Y. Liu and J. Zhang	

Advances in Direct Methods for Materials and  
Structures

Barrera, O.; Cocks, A.; Ponter, A. (Eds.)

2018, VIII, 217 p. 119 illus., Hardcover

ISBN: 978-3-319-59808-6
