Big Data and IoT for U-healthcare Security	1
Mechelle Grace Zaragoza, Haeng-Kon Kim and Roger Y. Lee	
Retrospection and Perspectives on Pragmatic Software Architecture Design: An Industrial Report	13
Xiaofeng Cui	
Distributed Coding and Transmission Scheme for Wireless Communication of Satellite Images	29
Ahmed Hagag, Ibrahim Omara, Souleyman Chaib, Xiaopeng Fan and Fathi E. Abd El-Samie	
Experimental Evaluation of HoRIM to Improve Business Strategy Models	43
Yohei Aoki, Hironori Washizaki, Chimaki Shimura, Yuichiro Senzaki and Yoshiaoki Fukazawa	
Combining Lexicon-Based and Learning-Based Methods for Sentiment Analysis for Product Reviews in Vietnamese Language	57
Son Trinh, Luu Nguyen and Minh Vo	
Reducing Misclassification of True Defects in Defect Classification of Electronic Board	77
Tokiko Shiina, Yuji Iwahori, Yohei Takada, Boonserm Kijssirikul and M.K. Bhuyan	
Virtual Prototyping Platform for Multiprocessor System-on-Chip Hardware/Software Co-design and Co-verification	93
Arya Wicaksana and Tang Chong Ming	

A Data-Mining Model for Predicting Low Birth Weight with a High AUC	109
Uzapi Hange, Rajalakshmi Selvaraj, Malatsi Galani and Keletso Letsholo	
A Formal Approach for Maintaining Forest Topologies in Dynamic Networks	123
Faten Fakhfakh, Mohamed Tounsi, Mohamed Mosbah, Dominique Méry and Ahmed Hadj Kacem	
A Multicriteria Approach for Selecting the Optimal Location of Waste Electrical and Electronic Treatment Plants	139
Santoso Wibowo and Srimannarayana Grandhi	
Localization Strategy for Island Model Genetic Algorithm to Preserve Population Diversity	149
Alfian Akbar Gozali and Shigeru Fujimura	
HM-AprioriAll Algorithm Improvement Based on Hadoop Environment	163
Wentian Ji, Qingju Guo and Yanrui Lei	
Architecture of a Real-time Weather Monitoring System in a Space-time Environment Using Wireless Sensor Networks	175
Walid Fantazi and Tahar Ezzedine	
Mobile Application Development on Domain Analysis and Reuse-Oriented Software (ROS)	187
Mechelle Grace Zaragoza and Haeng-Kon Kim	
A Transducing System Between Hichart and XC on a Visual Software Development Environment	195
Takaaki Goto, Ryo Nakahata, Tadaaki Kirishima, Takeo Yaku and Kensei Tsuchida	
Development of an Interface for Volumetric Measurement on a Ground-Glass Opacity Nodule	207
Weiwei Du, Dandan Yuan, Xiaojie Duan, Jianming Wang, Yanhe Ma and Hong Zhang	
Efficient Similarity Measurement by the Combination of Distance Algorithms to Identify the Duplication Relativity	219
Manop Phankokkruad
