

# Contents

**Advanced Unmanned Systems: Requirements and Groundwork for the Next Generation of Robotics Systems**

**A Model for Temperament and Emotions on Robots** . . . . . 3  
Lyle N. Long

**A Cybernetic Approach to Characterization of Complex Sensory Environments: Implications for Human Robot Interaction** . . . . . 14  
Kelly Dickerson, Jeremy Gaston, and Kelvin S. Oie

**Spatial Understanding as a Common Basis for Human-Robot Collaboration** . . . . . 23  
D. Paul Benjamin, Tianyu Li, Peiyi Shen, Hong Yue, Zhenkang Zhao, and Damian Lyons

**Wearable Robotics, Industrial Robots and Construction Worker’s Safety and Health** . . . . . 31  
Rita Yi Man Li and Daniel Ping Lung Ng

**Advanced Displays and Intuitive Interfaces**

**Using the Soundpainting Language to Fly a Swarm of Drones** . . . . . 39  
Nadine Couture, Sébastien Bottecchia, Serge Chaumette, Mateo Ceconello, Josu Rekalde, and Myriam Desainte-Catherine

**Issues and Advances in Anomaly Detection Evaluation for Joint Human-Automated Systems** . . . . . 52  
Cory A. Rieth, Ben D. Amsel, Randy Tran, and Maia B. Cook

**Maintain and Regain Well Clear: Maneuver Guidance Designs for Pilots Performing the Detect-and-Avoid Task** . . . . . 64  
Kevin J. Monk and Zachary Roberts

<b>Evaluation of Early Ground Control Station Configurations for Interacting with a UAS Traffic Management (UTM) System. . . . .</b>	<b>75</b>
Arik-Quang V. Dao, Lynne Martin, Christoph Mohlenbrink, Nancy Bienert, Cynthia Wolter, Ashley Gomez, Lauren Claudatos, and Joey Mercer	
<b>User-Centered Design and Evaluation of Smartphone-Controls for the Movement Control of Mobile Platforms . . . . .</b>	<b>87</b>
Robert Fingerle, Lars Krause, Hugo Tausch, and Carsten Wittenberg	
<b>A Multi-modal Interface for Natural Operator Teaming with Autonomous Robots (MINOTAUR) . . . . .</b>	<b>99</b>
Stephanie Kane, Kevin McGurgan, Martin Voshell, Camille Monnier, Stan German, and Andrey Ost	
<b>UAS Detect and Avoid – Alert Times and Pilot Performance in Remaining Well Clear . . . . .</b>	<b>109</b>
Rania W. Ghatas, James R. Comstock Jr., Michael J. Vincent, Keith D. Hoffler, Dimitrios Tsakpinis, and Anna M. DeHaven	
<b>Advances in Unmanned Aerial Vehicles (UAV) and Drones Research</b>	
<b>Drone Relay Stations for Supporting Wireless Communication in Military Operations . . . . .</b>	<b>123</b>
Seon Jin Kim, Gino J. Lim, and Jaeyoung Cho	
<b>Human-Systems Integration Challenges in Resilient Multi-UAV Operation. . . . .</b>	<b>131</b>
Edwin Ordoukhanian and Azad M. Madni	
<b>Human Factors in Military Maritime and Expeditionary Settings: Opportunity for Autonomous Systems? . . . . .</b>	<b>139</b>
Jacob N. Norris	
<b>A Motivation for Co-adaptive Human-Robot Interaction . . . . .</b>	<b>148</b>
Caroline E. Harriott, Sara Garver, and Meredith Cunha	
<b>An Integration of Cognitive Task Analysis Results for Situation Awareness-Focused Training Program Development . . . . .</b>	<b>161</b>
David B. Kaber, Rebecca S. Green, and Manida Swangnetr	
<b>Control Using Multimodal Input</b>	
<b>Challenges of Using Gestures in Multimodal HMI for Unmanned Mission Planning. . . . .</b>	<b>175</b>
Meghan Chandarana, Erica L. Meszaros, Anna Trujillo, and B. Danette Allen	

**Compensating for Limitations in Speech-Based Natural Language Processing with Multimodal Interfaces in UAV Operation . . . . .** 183  
Erica L. Meszaros, Meghan Chandarana, Anna Trujillo,  
and B. Danette Allen

**Crew Performance and Situation Awareness in Three UAS GCS Layouts . . . . .** 195  
Derek McColl, Jean-Francois Gagnon, Simon Banbury, Robert Arrabito,  
Nada Pavlovic, Fred Williams, Mario Charron, and Ming Hou

**Investigation of Gesture Based UAV Control . . . . .** 205  
Brian Sanders, Dennis Vincenzi, and Yuzhong Shen

**Tactile Applications for Enhanced Performance in Naturalistic Settings**

**How Close Is Close Enough? A Multimodal Analysis of Temporal Matching Between Visual and Tactile Signaling . . . . .** 219  
Catherine Neubauer

**Identifying Errors in Tactile Displays and Best Practice Usage Guidelines . . . . .** 226  
Bruce J.P. Mortimer and Linda R. Elliott

**Can You Feel Me Now? Wearable Concept for Soldier Communications . . . . .** 236  
Gina Hartnett, Linda Elliott, Lisa Baraniecki, Anna Skinner,  
Kenyan Riddle, and Rodger Pettitt

**Development of a Vibrotactile Metronome to Assist in Conducting Contemporary Classical Music . . . . .** 248  
Patrick Ignoto, Ian Hattwick, and Marcelo M. Wanderley

**Understanding the Key Drivers of Human-Machine Trust: Lessons Learned and Future Directions**

**A Theoretical Conceptualization for Overtrust. . . . .** 261  
Alan R. Wagner and Mollik Nayyar

**The Sky’s (Not) the Limit - Influence of Expertise and Privacy Disposition on the Use of Multicopters . . . . .** 270  
Chantal Lidynia, Ralf Philipsen, and Martina Ziefle

**Users’ Trust in Automation: A Cultural Perspective . . . . .** 282  
Hsiao-Ying Huang and Masooda Bashir

**Human-Robot Teaming**

**Human Robot Team Development: An Operational and Technical Perspective** . . . . . 293  
Jurriaan van Diggelen, Rosemarijn Looije, Jasper van der Waa, and Mark Neerinx

**Team Synchrony in Human-Autonomy Teaming** . . . . . 303  
Mustafa Demir, Nathan J. McNeese, and Nancy J. Cooke

**Toward an “Equal-Footing” Human-Robot Interaction for Fully Autonomous Vehicles** . . . . . 313  
Theocharis Amanatidis, Patrick Langdon, and P. John Clarkson

**Virtual Reality Technologies for Training Applications and C2 of Unmanned Systems**

**Automated Collision Avoidance Developed Within a Mixed Reality System** . . . . . 323  
Josh Wilkerson, Ryan McGee, Brian Reitz, Roberto Bellido, Katia Estabridis, Gary Hewer, and Ryan Erb

**Multimodality Evaluation Metrics for Human-Robot Interaction Needed: A Case Study in Immersive Telerobotics** . . . . . 335  
Iina Aaltonen, Susanna Aromaa, Kaj Helin, and Ali Muhammad

**VR Environment for the Study of Collocated Interaction Between Small UAVs and Humans** . . . . . 348  
Christopher Widdowson, Hyung-Jin Yoon, Venanzio Cichella, Ranxiao Frances Wang, and Naira Hovakimyan

**Author Index** . . . . . 357

Advances in Human Factors in Robots and Unmanned  
Systems

Proceedings of the AHFE 2017 International  
Conference on Human Factors in Robots and  
Unmanned Systems, July 17–21, 2017, The Westin  
Bonaventure Hotel, Los Angeles, California, USA

Jessie Chen, Y.-S. (Ed.)

2018, XII, 358 p. 142 illus., Softcover
