

Preface

This volume of *Advances in Intelligent Systems and Computing* contains papers presented at the Third International Afro-European Conference for Industrial Advancement—AECIA 2016. The conference aimed at bringing together the foremost experts and excellent young researchers from Africa, Europe, and the rest of the world to disseminate the latest results from various fields of engineering, information, and communication technologies. AECIA 2016 received a large number of papers from all over the world. They were carefully reviewed, and only high-quality papers were selected for oral or poster presentation during conference days. The topics of accepted papers cover a broad range of domains spanning from ICT and engineering to prediction, modeling, and analysis of complex systems. The conference was hosted by the Computer, Networks, Mobility and Modeling Laboratory, Faculty of Sciences and Techniques, Hassan 1st University, Settat, Morocco, and held at the Kenzi Farah Hotel in Marrakesh. The organizing committee expresses deep gratitude to the members of the International Program Committee, the hosting institution, local organizers and to all supporters and authors, for their impressive efforts and contribution to the success of the events.
