## Part I Afar: Global Context

<b>1</b>	<b>Global and Regional Geodynamic Context</b> . . . . .	3
	References. . . . .	12
<b>2</b>	<b>Relief, Climate, People, Languages, Toponymy and Exploration History</b> . . .	13
2.1	Topography of Surrounding Plateaus . . . . .	13
2.2	Climate and Ecology . . . . .	15
2.3	Ethnographic Context . . . . .	16
2.4	Afar Topographic Maps and Toponymy . . . . .	22
2.5	History of Afar Exploration . . . . .	23
	References. . . . .	38
<b>3</b>	<b>Geophysical Frame: Mantle Plume(s), Triple Points, Rifting Processes</b> . . . .	39
3.1	The Nubian Plateau Uplift and Associated Volcanism . . . . .	39
3.2	From Continental Doming to Rifting: The Continental Rift Stage . . . . .	43
3.3	Mantle Plume in Afar and East Africa, Geochemical and Geophysical Approaches . . . . .	44
3.4	The Afar Triple Junction, a “Textbook Example”? . . . . .	48
3.5	Geodynamic Relations Between Doming and Rifting Inferred from Petrological Studies . . . . .	50
	References. . . . .	53

## Part II The Early Afar Geological Formations

<b>4</b>	<b>Pre-quaternary Geological Frame</b> . . . . .	57
4.1	The Afro-Arabian Plate Before Doming and Rifting . . . . .	57
4.2	Geology of the Plateau Margins Surrounding Afar . . . . .	61
4.2.1	The Nubian Margin . . . . .	61
4.2.2	The Arabian Margin . . . . .	65
4.2.3	The Somalian Margin . . . . .	66
4.2.4	The “Danakil Alps” (or Arrata) . . . . .	68
4.2.5	The Aisha—Ali-Sabieh Block . . . . .	71
4.3	The Miocene Peralkaline Granite Intrusions of Afar . . . . .	74
4.4	The Mio-Pliocene “Polychromatic Formation” . . . . .	76
4.5	The Adolei Basalts . . . . .	77
4.6	The Mabla Rhyolites . . . . .	79
4.7	The Dalha Basalts . . . . .	82

4.8	The Hadar Formation (Central Western Afar, Awash Basin), a Treasure in Human Palaeontology . . . . .	89
	References. . . . .	90

## 5 First Stage of Oceanisation of the Afar Floor: The Stratoid Series

	(4–1 Million Years Ago) . . . . .	93
5.1	The Basaltic Fissural Piles (Afar Stratoid Series Stricto Sensu) . . . . .	93
5.2	The Silicic Centres Associated with the Stratoid Series . . . . .	94
5.3	The Recent Basaltic Flows of the Upper Part of the Stratoid Series. . . . .	96
5.4	Spectacular Grabens Delimited by the Faulting Affecting the Stratoid Series in Southern Afar . . . . .	99
	References. . . . .	104

## Part III Afar Quaternary and Presently Active Geological Units

6	<b>Axial Volcanic Ranges</b> . . . . .	107
6.1	Afar Axial Ranges (Emerged MOR Analogues) . . . . .	107
6.2	Erta Ale Axial Range . . . . .	109
6.2.1	Submarine and Sublacustrine Initial Activity of the Rift Floor . . . . .	112
6.2.2	Hayli Gub Axial Emitting Fissures and Shield Volcano . . . . .	117
6.2.3	Erta Ale Shield Volcano. . . . .	120
6.2.4	Borale Ale Cumulo-Volcano. . . . .	129
6.2.5	Alu and Dala Filla Cumulo-Volcanoes . . . . .	138
6.2.6	Gada Ale Volcano. . . . .	143
6.2.7	Ale Bagu Strato-Volcano . . . . .	146
6.3	Tat'Ali–Mat'Ala Axial Range. . . . .	151
6.4	Alayta Axial Range. . . . .	157
6.5	Dabbahu Volcanic Centre . . . . .	162
6.6	Manda Harraro Axial Range. . . . .	167
6.6.1	Geological Description. . . . .	167
6.6.2	The 2005 Dabahu–Manda Harraro 2005–2010 Rifting Episode. . . . .	175
6.6.3	Manda Harraro in the Context of Afar Volcanic Ranges. . . . .	180
6.7	Manda Inakir Axial Range. . . . .	181
6.8	Asal Axial Range . . . . .	187
6.8.1	Geology of the Asal Volcanic Range . . . . .	187
6.8.2	The Ardoukoba Simo-Volcanic Event, 1978 . . . . .	189
6.8.3	Geothermal Exploration and Undergoing Developments at Asal. . . . .	196
6.9	The Gulf of Tadjourah Oceanic Spreading Segments. . . . .	197
6.10	Discussion: The Significance of the Axial Ranges. . . . .	200
	References. . . . .	202
7	<b>Recent and Active Units of the Danakil Sea (Dagad Salt Plain) and Afdera Lake</b> . . . . .	205
7.1	The Danakil Sea and the Dagad Salt Plain . . . . .	205
7.1.1	Marine Limestones . . . . .	205
7.1.2	Gypsum Deposits . . . . .	208
7.1.3	Salt Deposits . . . . .	209
7.1.4	Loams and Silts of the Plains . . . . .	210

7.2	Volcanoes of the Gulf of Zula (Eritrea) . . . . .	211
7.3	Alid Volcanoes (Eritrea) . . . . .	211
7.4	Maraho Submarine Volcano in the Dagad Salt Plain . . . . .	214
7.5	Dallol Hydrothermal Dome in the Dagad Salt Plain. . . . .	217
7.6	As Ale Phreatic Explosion Crater in the Dagad Salt Plain . . . . .	218
7.7	Lake Afdera and Sodonta Plain . . . . .	218
7.7.1	Lacustrine Limestones and Diatomites . . . . .	218
7.7.2	Lake Afdera . . . . .	219
7.8	Comments on the Danakil Sea and Other Sedimentary Areas . . . . .	221
	References. . . . .	225
<b>8</b>	<b>Central Silicic Volcanoes of the Afar Margins . . . . .</b>	<b>227</b>
8.1	Ma'alalta (Pierre Pruvost) . . . . .	227
8.2	The Bidu Transverse Alignment . . . . .	228
8.3	Moussa Ali . . . . .	235
8.4	Comments About These Volcanic Centres of Afar Margins . . . . .	236
	References. . . . .	239
<b>9</b>	<b>Transverse Volcanic Alignments Along Afar Margins. . . . .</b>	<b>241</b>
9.1	Dubbi (Eritrea) . . . . .	241
9.2	Hanish-Zukur (Red Sea Islands) . . . . .	241
9.3	Ado Ale (Assab Range, Eritrea) . . . . .	243
9.4	Gufa (South Eritrea) . . . . .	244
9.5	Sawâbi Islands (Sept Frères, Djibouti) . . . . .	244
9.6	Dabbayra (Western Afar) . . . . .	244
9.7	Geodynamic Interpretation of These Transverse Units . . . . .	245
	References. . . . .	251
<b>10</b>	<b>Southern Afar: The Main Ethiopian Rift (MER) Northern Extremity . . . . .</b>	<b>253</b>
10.1	Sedimentary Plains of Southern Afar. . . . .	253
10.1.1	The Yaldi-Hadar Basin . . . . .	253
10.1.2	The Kalo (Tendaho)-Gobaad Graben . . . . .	254
10.1.3	The Grabens of Southern Afar . . . . .	257
10.2	Geodynamics of Tendaho-Gobaad Graben . . . . .	259
10.2.1	Volcanic Features in the Tendaho-Gobaad Graben. . . . .	259
10.2.2	Dama Ale Shield Volcano . . . . .	260
10.2.3	Discussion of the Geodynamic Significance of the Tendaho-Gobaad Graben. . . . .	264
10.3	The MER Volcanic Units of Afar . . . . .	266
10.3.1	Gabilema. . . . .	266
10.3.2	Yangudi. . . . .	268
10.3.3	Ayelu-Abida (Called Amoisia in Ahmaric) . . . . .	269
10.3.4	Angelele-Hertale . . . . .	272
10.3.5	Dofan . . . . .	276
10.3.6	Fantale. . . . .	279
	References. . . . .	281

## Part IV Conclusive Remarks

<b>11 Afar, a Hot-Spot for Earth's Geodynamics Studies</b> . . . . .	285
11.1 The Process of Break-up of a Continent in an Area of Triple Junction . . . . .	285
11.2 From Continental to Oceanic Rifting . . . . .	287
11.3 Transform Faults and Fracture Zones . . . . .	288
11.4 MOR and Oceanic Island Analogues . . . . .	289
11.5 Pertinence and Limits of Mantle Plume Models . . . . .	289
11.6 Proposed Interpretation of the Evolution of Spreading Within Afar . . . . .	290
References . . . . .	293
<b>12 Geological Resources and Socio-Economic Issues</b> . . . . .	295
12.1 Thermal Manifestations, Geothermal Potential and Development Perspectives . . . . .	295
12.1.1 Despite Arid Climate, a Gifted Region . . . . .	295
12.1.2 Alid (Eritrea) . . . . .	296
12.1.3 Dallol (North Afar, Ethiopia) . . . . .	298
12.1.4 Tat'Ali Near Afdera (North Afar, Ethiopia) . . . . .	299
12.1.5 Dabbahu Near Teru (West Afar, Ethiopia) . . . . .	299
12.1.6 South Manda Harraro Geothermal Sites (Including Tendaho Graben, Central Afar, Ethiopia) . . . . .	300
12.1.7 Dama Ale in Ethiopia and Lake Abhe in Djibouti . . . . .	303
12.1.8 Asal in Djibouti Republic . . . . .	303
12.1.9 Other Sites in Djibouti Republic . . . . .	309
12.1.10 Gawani Area . . . . .	310
12.1.11 Dofan . . . . .	311
12.1.12 Fantale . . . . .	313
12.1.13 Future Dreams: Drilling Through an Oceanic Ridge from Land . . . . .	314
12.1.14 General Considerations on Geothermal Development Perspectives in Afar . . . . .	316
12.2 Mineral Resources . . . . .	317
12.2.1 Metallic Resources Associated with the Tectono-Magmatic and Geothermal Context . . . . .	317
12.2.2 Mineral Resources Related to Marine or Lacustrine Evaporitic Contexts . . . . .	317
12.2.3 Metallic Resources Associated with Synsedimentary Hydrothermal Activity . . . . .	318
References . . . . .	321
<b>13 Afar, One Geology, One Culture, Spread in Three Countries, at Present a Melting Pot</b> . . . . .	323
<b>Conclusion</b> . . . . .	325
<b>References</b> . . . . .	327
