

Contents

1	Methods and Instruments for Condition Monitoring of Lubricants	1
1.1	Introduction	1
1.2	Laboratory Methods of Oil Monitoring	2
1.3	Methods and Means for Real-Time Monitoring Lubricant Performance	3
1.4	Fluorescence Methods and Tools for Real-Time Oil Oxidation Monitoring	12
1.5	Fluorescence Emission Ratio Technique and Sensor for On-Board Application	17
1.5.1	Application of the Fluorescent Sensor for Hydraulic Oil Condition Monitoring	21
1.5.2	Application of Fluorescence Emission Ratio Technique for Transformer Oil Monitoring	22
1.6	Conclusions	27
	References	28
2	Oil Viscosity Monitoring	31
2.1	Introduction	31
2.2	Oil Viscosity Characterization	31
2.3	Laboratory Measurements of Viscosity	33
2.4	Methods of On-Line Viscosity Monitoring	35
2.5	Viscosity Sensor Based on Magneto-Elasticity	44
2.5.1	Magnetoelastic Viscometry Technique	44
2.5.2	Magnetoelastic Viscometer	48
2.5.3	Experimental Results	52
2.6	Conclusions	57
	References	58

3	Monitoring of Water Content in Oil	61
3.1	Introduction	61
3.2	Forms of Water in Oil	62
3.3	Water Content Characteristics	64
3.4	Laboratory Methods for Measuring Water Content in Oil	66
3.5	Methods and Devices for Real-Time Monitoring of Water Content in Oil	69
3.6	Conclusions	79
	References	80
4	Control of Soot Concentration in Oil	83
4.1	Introduction	83
4.2	Up-to-Date Requirements to Monitoring of Diesel Oil	84
4.3	Laboratory Methods of Monitoring Soot Content in Oil and Its Properties	86
4.4	Portable and Built-in Devices for Monitoring Soot in Oil	88
4.5	Fiber-Optic Sensors of Soot Content in Diesel Oil	95
4.6	Conclusions	127
	References	127
5	Wear Prediction for Tribosystems Based on Debris Analysis	131
5.1	Introduction	131
5.2	Laboratory Diagnostics Basing on Wear Debris Analysis	142
5.3	Portable Means for Machine Condition Monitoring	148
5.4	Techniques and Devices for Wear Diagnostics in Real-Time	153
5.5	Development of Tribodiagnostic Devices	167
5.5.1	On-line Opto-Magnetic Detector	167
5.5.2	Optical Ferroanalyzer	182
5.5.3	Inductive Wear Particle Counter	189
5.6	Conclusions	196
	References	196
6	Trends in On-line Tribodiagnostics	203
6.1	Introduction	203
6.2	Modular Systems	203
6.3	Intelligent (SMART) System	213
6.4	Artificial Intelligence Methods of Data Processing	214
6.5	Conclusions	221
	References	222
	Conclusions	225

On-line Condition Monitoring in Industrial Lubrication
and Tribology

Myshkin, N.K.; Markova, L.V.

2018, XIX, 227 p. 157 illus., 38 illus. in color., Hardcover

ISBN: 978-3-319-61133-4
