

# Contents

<b>1</b>	<b>Introduction</b> . . . . .	1
1.1	History of CO <sub>2</sub> System Research in the Baltic Sea . . . . .	1
1.2	Objectives of This Book . . . . .	3
	References . . . . .	5
<b>2</b>	<b>The Marine CO<sub>2</sub> System and Its Peculiarities in the Baltic Sea</b> . . . .	7
2.1	Atmospheric CO <sub>2</sub> Over the Baltic Sea . . . . .	7
2.2	Aqueous Equilibrium Chemistry of CO <sub>2</sub> . . . . .	8
2.3	Measurable Variables of the Marine CO <sub>2</sub> System . . . . .	15
2.3.1	CO <sub>2</sub> Equilibrium Fugacity and Partial Pressure . . . . .	15
2.3.2	Total CO <sub>2</sub> and pH . . . . .	15
2.3.3	Alkalinity . . . . .	18
2.3.4	Physico-Chemical Properties of the Master Variables . . . . .	21
2.4	CO <sub>2</sub> Air-Sea Gas Exchange . . . . .	27
	References . . . . .	33
<b>3</b>	<b>The Main Hydrographic Characteristics of the Baltic Sea</b> . . . . .	35
3.1	Water Budget and Estuarine Circulation . . . . .	35
3.2	Seasonality of the Stratification . . . . .	36
3.3	Stagnation and Inflow Events . . . . .	39
	References . . . . .	41
<b>4</b>	<b>The Database</b> . . . . .	43
4.1	Studies of the Surface Water CO <sub>2</sub> System . . . . .	43
4.2	Investigations of the Deep Water CO <sub>2</sub> Accumulation . . . . .	47
	References . . . . .	48

<b>5 Surface Water Biogeochemistry as Derived from <math>p\text{CO}_2</math></b>	
<b>Observations</b> . . . . .	49
5.1 Seasonal and Regional Patterns of $p\text{CO}_2$ and $C_T$ . . . . .	49
5.1.1 Characteristics of the $p\text{CO}_2$ Time Series . . . . .	49
5.1.2 Long-Term Changes in $p\text{CO}_2$ . . . . .	53
5.1.3 The Seasonal Fine Structure of the $p\text{CO}_2$ . . . . .	54
5.1.4 From $p\text{CO}_2$ Measurements to Total $\text{CO}_2$ Data . . . . .	56
5.2 A Walk Through the Seasons . . . . .	58
5.2.1 Timing of the Spring Bloom and the Role of Solar Radiation . . . . .	58
5.2.2 Quantification of Spring Bloom Productivity . . . . .	63
5.2.3 Nitrogen Supply for the Spring Bloom . . . . .	71
5.2.4 Net Community Production and Nutrient Consumption . . . . .	74
5.2.5 The “Blue Water” Period . . . . .	75
5.2.6 Control of Mid-Summer Net Community Production and N-fixation . . . . .	76
5.2.7 Estimation of Depth-Integrated N-fixation . . . . .	82
5.2.8 Autumn Mixing and Upwelling: The Occurrence of a Last Bloom Event . . . . .	84
5.2.9 Annual $C_T^*$ Cycling Presented as $C_T^*$ Versus SST Diagrams . . . . .	87
References . . . . .	90
<b>6 Organic Matter Mineralization as Reflected in Deep-Water <math>C_T</math> Accumulation</b> . . . . .	93
6.1 Total $\text{CO}_2$ Dynamics During Periods of Stagnation and Water Renewal . . . . .	93
6.2 Organic Matter Mineralization Rates Derived from $C_T$ Mass-Balance Calculations . . . . .	96
6.3 Release and Transformations of Nutrients During OM Mineralization . . . . .	101
References . . . . .	104
<b>7 Progress Made by Investigations of the <math>\text{CO}_2</math> System and Open Questions</b> . . . . .	105
<b>Index</b> . . . . .	109

Biogeochemical Transformations in the Baltic Sea  
Observations Through Carbon Dioxide Glasses

Schneider, B.; Müller, J.D.

2018, XII, 110 p. 54 illus., Hardcover

ISBN: 978-3-319-61698-8
