

Contents

- 1 Human Decisions Are Often Suboptimal: Phenomenon of Bounded Rationality** 1
 - 1.1 Seemingly Irrational Human Decision Making: Formulation of the Problem 1
 - 1.2 Examples of (Seemingly) Irrational Decision Making. 3
 - 1.3 First Example of Seemingly Irrational Decision Making: Compromise Effect. 4
 - 1.4 Second Example of Seemingly Irrational Decision Making: Biased Probability Estimates. 6
 - 1.5 Third Example of Seemingly Irrational Behavior: Average Instead of the Sum 7
 - 1.6 Structure of the Book 7
- 2 Towards Explaining Specific Examples of Suboptimal (and Often Seemingly Irrational) Human Decisions** 9
 - 2.1 Traditional Utility-Based Approach to Decision Making: A Brief Reminder. 9
 - 2.2 Our Main Idea: Optimization Under Granularity 12
 - 2.3 Explaining the First Example of Seemingly Irrational Human Decision Making: Granularity Explains The Compromise Effect. 13
 - 2.4 Explaining the Second Example of Seemingly Irrational Human Decision Making: Granularity Explains Why Our Probability Estimates Are Biased 16
 - 2.5 Explaining the Third Example of Seemingly Irrational Human Decision Making: Using Average Instead of the Sum 22
- 3 Towards Explaining Other Aspects of Human Decision Making** 25
 - 3.1 Estimating Utility: Why Utility Grows as Square Root of Money. 25

3.2	Estimating Probabilities: A Justification of Sugeno λ -Measures . . .	27
3.3	Making a Decision Under Uncertainty: A Possible Explanation of the Usual Safety Factor of 2.	39
3.4	Taking into Account Interests of Others: Why Awe Makes People More Generous	41
3.5	Education as an Example of Joint Decision Making.	45
3.5.1	The “How” of Education: Coming up with a Good Question Is Not Easy	46
3.5.2	The Result of Education: Justifications of Rasch Model.	57
4	Towards Explaining Heuristic Techniques (Such as Fuzzy) in Expert Decision Making.	69
4.1	Discrete Heuristics: Case of Concept Analysis	69
4.2	Continuous Heuristics: Case of Fuzzy Techniques	73
4.2.1	Fuzzy Uncertainty: A Brief Description	73
4.2.2	How to Describe Selection on a Likert-Type Scale in Terms of Traditional Decision Making	74
5	Predicting How Bounded Rationality Will Affect the Quality of Future Decisions: Case Study.	83
5.1	Formulation of the Problem	83
5.2	Analysis of the Problem and the Derivation of the Resulting Formula	84
5.3	Case Study of Aircraft Fuel Efficiency Confirms the Theoretical Formula	86
6	Decision Making Under Uncertainty and Restrictions on Computation Resources: From Heuristic to Optimal Techniques.	89
6.1	Decision Making Under Uncertainty: Towards Optimal Decisions	89
6.1.1	Decision Making Under Uncertainty: Formulation of the Problem.	89
6.1.2	How to Describe Uncertainty	90
6.1.3	Fair Price Approach: Main Idea	92
6.1.4	Case of Interval Uncertainty	93
6.1.5	Case of Set-Valued Uncertainty.	94
6.1.6	Case of Embedded Sets.	95
6.1.7	Cases of Probabilistic and P-Box Uncertainty.	98
6.1.8	Case of Kaucher (Improper) Intervals	99
6.1.9	(Crisp) Z-Numbers, Z-Intervals, and Z-Sets: Cases When the Probabilities Are Crisp	100
6.1.10	(Crisp) Z-Numbers, Z-Intervals, and Z-Sets: Cases When Probabilities Are Known with Interval or Set-Valued Uncertainty	103

6.1.11	Case of Fuzzy Uncertainty	107
6.1.12	Case of Z-Number Uncertainty	111
6.2	Decision Making Under Uncertainty and Restrictions on Computation Resources: Educational Case Studies	114
6.2.1	How to Assign a Grade for a Partially Solved Problem: Decision-Making Approach to Partial Credit.	114
6.2.2	How to Take into Account a Student's Degree of Certainty When Evaluating Test Results.	125
6.2.3	How to Combine Grades for Different Classes into a Single Number: Need to Go Beyond GPA.	133
7	Conclusions and Future Work	135
	Appendix A: Computational Aspects of Decision Making Under Uncertainty	137
	References	153

Bounded Rationality in Decision Making Under
Uncertainty: Towards Optimal Granularity

Lorkowski, J.; Kreinovich, V.

2018, IX, 164 p., Hardcover

ISBN: 978-3-319-62213-2
