1	Concept of Stability	1
1.1	Introduction	1
1.2	Type of Instability	3
1.3	General References	6
2	Buckling and Post-buckling of Beams	7
2.1	Introduction	7
2.2	Kinematic Relations	7
2.3	Equilibrium Equations	11
2.4	Stability Equations	12
2.5	Thermal Buckling of FGM Beams	13
2.5.1	Introduction	13
2.5.2	Functionally Graded Timoshenko Beams	14
2.5.3	Existence of Bifurcation Type Buckling	15
2.5.4	Thermal Buckling	15
2.5.5	Types of Thermal Loads	17
2.5.6	Results and Discussion	20
2.6	Thermo-Electrical Buckling of Beams	23
2.6.1	Introduction	23
2.6.2	Piezoelectric FGM Beam	24
2.6.3	Governing Equations	24
2.6.4	Existence of Bifurcation Type Buckling	27
2.6.5	Stability Equations	28
2.6.6	Types of Thermal Loads	29
2.6.7	Results and Discussion	31
2.7	Postbuckling of Piezo-FGM Timoshenko Beams	33
2.7.1	Introduction	33
2.7.2	Governing Equations	34
2.7.3	Clamped–Clamped Boundary Conditions	39

2.7.4	Simply Supported-Simply Supported Boundary Conditions	41
2.7.5	Results and Discussion	43
2.8	Vibration of Thermo-Electrically Post-buckled FGPM Beams . . .	48
2.8.1	Introduction	48
2.8.2	Governing Equations	51
2.8.3	Finite Elements Model	55
2.8.4	Result and Discussions	58
2.9	Vibration of Thermally Post-buckled Beams on Elastic Foundation	64
2.9.1	Introduction	64
2.9.2	Governing Equations	65
2.9.3	Types of Thermal Loading	70
2.9.4	Results and Discussion	71
2.10	FGM Beams, Thermal Dynamic Buckling	91
2.10.1	Fundamental Equations of the FGM Beam.	92
2.10.2	Governing Equations	93
2.10.3	Numerical Investigation	97
2.11	Problems	104
	References	105
3	Buckling and Post-buckling of Curved Beams and Rings	111
3.1	Introduction	111
3.2	Strain-Displacement Relations and Constitutive Law	112
3.3	Equilibrium Equations	114
3.4	Stability Equation	115
3.5	Stability of Arches, Uniform Pressure	116
3.5.1	Introduction	116
3.5.2	General Formulation	118
3.5.3	Existence of Bifurcation Type Instability	120
3.5.4	Critical Bifurcation Loads	120
3.5.5	Limit Load Instability Analysis	123
3.5.6	Result and Discussion	124
3.5.7	Studying the Bifurcation Behavior	130
3.6	Stability of Arches; Concentrated Force	133
3.6.1	Introduction	133
3.6.2	Governing Equations	135
3.6.3	Bifurcation Analysis	140
3.6.4	Limit Load Type of Instability	144
3.6.5	Results and Discussion	145
3.6.6	Studying the Bifurcation Phenomenon	156
3.7	Thermal Buckling of Arches	156
3.7.1	Governing Equations	158
3.7.2	Displacements and Internal Forces	161
3.7.3	Stress and Strain	163

3.7.4	Nonlinear Buckling Analysis	164
3.7.5	Results and Discussions	166
3.8	Postbuckling of Rings	169
3.8.1	Governing Equations	172
3.8.2	Prebuckling Analysis	175
3.8.3	Stability Equations	176
3.8.4	Postbuckling Analysis	178
3.8.5	Solution Procedure	181
3.8.6	Numerical Results and Discussion	184
3.9	Problems	186
	References	187
4	Buckling of Rectangular Plates	189
4.1	Introduction	189
4.2	Kinematic Relations and the Constitutive Law	190
4.3	Equilibrium Equations	192
4.4	Stability Equations	195
4.5	Existence of Bifurcation Type Buckling	197
4.6	Thermal Buckling of Rectangular Plates	197
4.6.1	Introduction	197
4.6.2	Governing Equations and Boundary Conditions	199
4.6.3	Pre-buckling Loads	200
4.6.4	Result and Discussions	203
4.7	Rectangular Plates; In-Plane Compressive Load	216
4.7.1	Introduction	216
4.7.2	Governing Equations	217
4.7.3	Buckling Analysis	218
4.7.4	Results and Discussion	220
4.8	Thermoelastic Buckling of Piezo-Controlled Plates	224
4.8.1	Introduction	224
4.8.2	Fundamental Equations	224
4.8.3	Thermal Buckling	230
4.8.4	Result and Discussion	231
4.9	FGM Plates on Pasternak Elastic Foundation	232
4.9.1	Introduction	232
4.9.2	Governing Equations	232
4.9.3	Existence of Bifurcation Type Buckling	234
4.9.4	Stability Equations	235
4.9.5	Solution of the Stability Equation	236
4.9.6	Babnov–Galerkin Solution (BGS)	237
4.9.7	Power Series Solution (PSS)	238
4.9.8	Semi-Levy Solution (SLS)	240
4.9.9	Types of Thermal Loading	240
4.9.10	Result and Discussions	242

4.10	Sandwich Plates on the Pasternak Elastic Foundation	247
4.10.1	Introduction	247
4.10.2	Governing Equations	247
4.10.3	Mechanical Buckling	252
4.10.4	Thermal Buckling	253
4.10.5	Results and Discussion	254
4.11	Imperfect Plates on Elastic Foundation	260
4.11.1	Introduction	260
4.11.2	Sandwich FGM Plates	261
4.11.3	Governing Equations	262
4.11.4	Solving Equations	264
4.11.5	Results and Discussion	268
4.11.6	Comparative Studies	268
4.11.7	Parametric Studies	270
4.12	Problems	274
