

Contents

- 1 Robots and Their Applications** 1
 - 1.1 Classification of Robots 2
 - 1.2 Industrial Robots. 3
 - 1.3 Autonomous Mobile Robots 4
 - 1.4 Humanoid Robots. 6
 - 1.5 Educational Robots. 7
 - 1.6 The Generic Robot 11
 - 1.6.1 Differential Drive. 11
 - 1.6.2 Proximity Sensors 12
 - 1.6.3 Ground Sensors 13
 - 1.6.4 Embedded Computer. 13
 - 1.7 The Algorithmic Formalism 14
 - 1.8 An Overview of the Content of the Book. 15
 - 1.9 Summary 18
 - 1.10 Further Reading 19
 - References. 19

- 2 Sensors** 21
 - 2.1 Classification of Sensors. 22
 - 2.2 Distance Sensors. 22
 - 2.2.1 Ultrasound Distance Sensors 23
 - 2.2.2 Infrared Proximity Sensors 24
 - 2.2.3 Optical Distance Sensors 24
 - 2.2.4 Triangulating Sensors 26
 - 2.2.5 Laser Scanners. 27
 - 2.3 Cameras 30
 - 2.4 Other Sensors 31
 - 2.5 Range, Resolution, Precision, Accuracy 32

2.6	Nonlinearity	34
2.6.1	Linear Sensors	34
2.6.2	Mapping Nonlinear Sensors	35
2.7	Summary	36
2.8	Further Reading	37
	References	37
3	Reactive Behavior	39
3.1	Braitenberg Vehicles	39
3.2	Reacting to the Detection of an Object	40
3.3	Reacting and Turning	42
3.4	Line Following	44
3.4.1	Line Following with a Pair of Ground Sensors	45
3.4.2	Line Following with only One Ground Sensor	48
3.4.3	Line Following Without a Gradient	49
3.5	Braitenberg's Presentation of the Vehicles	51
3.6	Summary	52
3.7	Further Reading	52
	References	53
4	Finite State Machines	55
4.1	State Machines	55
4.2	Reactive Behavior with State	56
4.3	Search and Approach	57
4.4	Implementation of Finite State Machines	58
4.5	Summary	60
4.6	Further Reading	61
	References	61
5	Robotic Motion and Odometry	63
5.1	Distance, Velocity and Time	64
5.2	Acceleration as Change in Velocity	65
5.3	From Segments to Continuous Motion	67
5.4	Navigation by Odometry	69
5.5	Linear Odometry	69
5.6	Odometry with Turns	71
5.7	Errors in Odometry	73
5.8	Wheel Encoders	76
5.9	Inertial Navigation Systems	77
5.9.1	Accelerometers	78
5.9.2	Gyroscopes	78
5.9.3	Applications	80
5.10	Degrees of Freedom and Numbers of Actuators	81
5.11	The Relative Number of Actuators and DOF	82
5.12	Holonomic and Non-holonomic Motion	88

5.13	Summary	92
5.14	Further Reading	92
	References.	92
6	Control.	95
6.1	Control Models.	96
6.1.1	Open Loop Control	96
6.1.2	Closed Loop Control	96
6.1.3	The Period of a Control Algorithm	97
6.2	On-Off Control	99
6.3	Proportional (P) Controller	101
6.4	Proportional-Integral (PI) Controller	104
6.5	Proportional-Integral-Derivative (PID) Controller	106
6.6	Summary	108
6.7	Further Reading	108
	Reference	108
7	Local Navigation: Obstacle Avoidance.	111
7.1	Obstacle Avoidance	112
7.1.1	Wall Following	112
7.1.2	Wall Following with Direction	114
7.1.3	The Pledge Algorithm	116
7.2	Following a Line with a Code	116
7.3	Ants Searching for a Food Source	118
7.4	A Probabilistic Model of the Ants' Behavior	121
7.5	A Finite State Machine for the Path Finding Algorithm	123
7.6	Summary	125
7.7	Further Reading	125
	References.	126
8	Localization	127
8.1	Landmarks	127
8.2	Determining Position from Objects Whose Position Is Known	128
8.2.1	Determining Position from an Angle and a Distance.	128
8.2.2	Determining Position by Triangulation	129
8.3	Global Positioning System	131
8.4	Probabilistic Localization	131
8.4.1	Sensing Increases Certainty	132
8.4.2	Uncertainty in Sensing	134
8.5	Uncertainty in Motion.	137
8.6	Summary	139
8.7	Further Reading	139
	References.	139

9	Mapping	141
9.1	Discrete and Continuous Maps	142
9.2	The Content of the Cells of a Grid Map	143
9.3	Creating a Map by Exploration: The Frontier Algorithm	145
9.3.1	Grid Maps with Occupancy Probabilities	145
9.3.2	The Frontier Algorithm	146
9.3.3	Priority in the Frontier Algorithm	149
9.4	Mapping Using Knowledge of the Environment	151
9.5	A Numerical Example for a SLAM Algorithm	153
9.6	Activities for Demonstrating the SLAM Algorithm	159
9.7	The Formalization of the SLAM Algorithm	161
9.8	Summary	162
9.9	Further Reading	162
	References	163
10	Mapping-Based Navigation	165
10.1	Dijkstra's Algorithm for a Grid Map	165
10.1.1	Dijkstra's Algorithm on a Grid Map with Constant Cost	166
10.1.2	Dijkstra's Algorithm with Variable Costs	168
10.2	Dijkstra's Algorithm for a Continuous Map	170
10.3	Path Planning with the A* Algorithm	172
10.4	Path Following and Obstacle Avoidance	176
10.5	Summary	177
10.6	Further Reading	178
	References	178
11	Fuzzy Logic Control	179
11.1	Fuzzify	179
11.2	Apply Rules	180
11.3	Defuzzify	181
11.4	Summary	182
11.5	Further Reading	183
	References	183
12	Image Processing	185
12.1	Obtaining Images	186
12.2	An Overview of Digital Image Processing	187
12.3	Image Enhancement	188
12.3.1	Spatial Filters	189
12.3.2	Histogram Manipulation	191
12.4	Edge Detection	193
12.5	Corner Detection	196
12.6	Recognizing Blobs	197

12.7	Summary	200
12.8	Further Reading	200
	References	200
13	Neural Networks	203
13.1	The Biological Neural System	203
13.2	The Artificial Neural Network Model	204
13.3	Implementing a Braintenberg Vehicle with an ANN	206
13.4	Artificial Neural Networks: Topologies	209
13.4.1	Multilayer Topology	209
13.4.2	Memory	211
13.4.3	Spatial Filter	211
13.5	Learning	213
13.5.1	Categories of Learning Algorithms	213
13.5.2	The Hebbian Rule for Learning in ANNs	214
13.6	Summary	219
13.7	Further Reading	219
	References	219
14	Machine Learning	221
14.1	Distinguishing Between Two Colors	222
14.1.1	A Discriminant Based on the Means	223
14.1.2	A Discriminant Based on the Means and Variances	225
14.1.3	Algorithm for Learning to Distinguish Colors	227
14.2	Linear Discriminant Analysis	228
14.2.1	Motivation	228
14.2.2	The Linear Discriminant	230
14.2.3	Choosing a Point for the Linear Discriminant	231
14.2.4	Choosing a Slope for the Linear Discriminant	231
14.2.5	Computation of a Linear Discriminant: Numerical Example	234
14.2.6	Comparing the Quality of the Discriminants	238
14.2.7	Activities for LDA	238
14.3	Generalization of the Linear Discriminant	241
14.4	Perceptrons	241
14.4.1	Detecting a Slope	241
14.4.2	Classification with Perceptrons	243
14.4.3	Learning by a Perceptron	244
14.4.4	Numerical Example	246
14.4.5	Tuning the Parameters of the Perceptron	247
14.5	Summary	249
14.6	Further Reading	249
	References	249

15	Swarm Robotics	251
15.1	Approaches to Implementing Robot Collaboration	252
15.2	Coordination by Local Exchange of Information	253
15.2.1	Direct Communications	253
15.2.2	Indirect Communications	253
15.2.3	The BeeClust Algorithm	255
15.2.4	The ASSISibf Implementation of BeeClust	256
15.3	Swarm Robotics Based on Physical Interactions	258
15.3.1	Collaborating on a Physical Task	258
15.3.2	Combining the Forces of Multiple Robots	259
15.3.3	Occlusion-Based Collective Pushing	261
15.4	Summary	264
15.5	Further Reading	264
	References	264
16	Kinematics of a Robotic Manipulator	267
16.1	Forward Kinematics	268
16.2	Inverse Kinematics	270
16.3	Rotations	274
16.3.1	Rotating a Vector	274
16.3.2	Rotating a Coordinate Frame	276
16.3.3	Transforming a Vector from One Coordinate Frame to Another	277
16.4	Rotating and Translating a Coordinate Frame	279
16.5	A Taste of Three-Dimensional Rotations	282
16.5.1	Rotations Around the Three Axes	283
16.5.2	The Right-Hand Rule	284
16.5.3	Matrices for Three-Dimensional Rotations	285
16.5.4	Multiple Rotations	286
16.5.5	Euler Angles	286
16.5.6	The Number of Distinct Euler Angle Rotations	289
16.6	Advanced Topics in Three-Dimensional Transforms	289
16.7	Summary	290
16.8	Further Reading	290
	References	290
	Appendix A: Units of Measurement	293
	Appendix B: Mathematical Derivations and Tutorials	295
