

Contents

1	Wireless Technology for Vehicles	1
1.1	Wireless Local Area Networks	2
1.2	Expanding the Mobility Domain of WLANs	4
1.2.1	Vehicular Communications	5
1.2.2	V2V and R2V Communications	5
1.3	Autonomous and Connected Vehicles Vision	7
1.4	Wireless Technologies for Vehicles	9
1.4.1	Cellular Networks and D2D Communication	10
1.4.2	802.1x Technologies	12
1.4.3	Cognitive Radio	13
1.5	802.11-Based VC: Challenges	13
1.5.1	Disruption Tolerance	13
1.5.2	Handover Latency	15
1.5.3	Security Issues	16
1.6	Summary	16
2	Basics of Vehicular Communication	19
2.1	Disruption Tolerant Networking	20
2.1.1	Systems and Architectures	20
2.1.2	New and Modified Protocols	23
2.1.3	Prediction-Based Techniques	25
2.2	Handover Latency in Wireless Networks	27
2.2.1	Detection, Search, and Probing Delay	28
2.2.2	Authentication and Address Allocation Delay	30
2.3	Handovers in Vehicular Communication	31
2.3.1	Mobility Management and Heterogeneity	34
2.4	IEEE Standards for Vehicular Communication	35
2.4.1	Wireless Access in Vehicular Environments: 802.11p	36
2.4.2	Fast Transition: 802.11r	37
2.4.3	High Throughput: 802.11n	38

2.4.4	Very High Throughput: 802.11ac	38
2.4.5	IEEE 802.11ax: Work in Progress	40
2.5	Summary	41
3	Performance Indicators of Vehicular Communication	43
3.1	The Vehicular Context	44
3.2	Key Parameters: RSS and Data Rate	44
3.3	Measurement and Analysis	45
3.3.1	Signal Strength	46
3.3.2	Data Rate	49
3.3.3	Correlation Between Data Rates and RSS	53
3.4	Application: Traffic Congestion Monitoring	55
3.4.1	Extended MULE Concept	56
3.4.2	Roadside Infrastructure	58
3.4.3	Communication Mechanism	61
3.5	Case Study: In-Vehicle Infotainment	65
3.6	Summary	66
4	Markov Representation of Vehicular Communications	69
4.1	Markov Models	70
4.1.1	Fundamentals of Markov Chains	70
4.1.2	Markov Process in R2V Communications	71
4.2	Estimating the Transition Probability	73
4.2.1	Data Collection	73
4.2.2	Probability Distribution of Dataset	74
4.2.3	Calculating Transition Probability	79
4.2.4	Long Term Error Rate	81
4.3	Three-State Markov Model	83
4.4	Towards Hidden Markov Model	85
4.5	Summary	86
5	Disruption in Vehicular Communications	87
5.1	Hidden Markov Models	87
5.2	HMM Representation of R2V Communication	88
5.2.1	Model Structure	89
5.2.2	Estimating Model Parameters	91
5.2.3	Model Generality, Limitations, and Need	94
5.3	Observation Sequence of HMM	96
5.4	Probabilistic Measures of Disruption	99
5.4.1	Forward Algorithm	100
5.4.2	State Probability	102
5.4.3	Encounter Probability	103
5.5	Traffic Pattern Analysis	105
5.5.1	Drive Tests	105
5.5.2	Variation in Disruption with Traffic Patterns	107
5.6	Summary	110

6	Inter ISP Roaming for Vehicular Communications	111
6.1	Intra- and Inter ISP Roaming	112
6.2	Wireless Internet Service Provider Roaming	114
6.2.1	WISPr Architecture	115
6.3	Wireless Roaming for Data Offloading	117
6.4	Modifications in HMM	119
6.4.1	Effectiveness of WISPr	120
6.5	Summary	122
7	Handover Latency in Vehicular Communication	125
7.1	Handovers in WLANs	125
7.2	Experiments and Observations	126
7.2.1	Measurement Setup	127
7.2.2	Observations in Vehicular Environments	127
7.3	Latency Analysis	130
7.3.1	DHCP Delay	130
7.3.2	EAP Delay	134
7.3.3	Scanning Delay	135
7.3.4	Delays Due to Background Applications	135
7.4	Reducing Scanning Phase Delay	136
7.4.1	Scanning Orthogonal Channels	137
7.4.2	AP Performance on Orthogonal Channels	140
7.5	Summary	143
8	Cellular Technology-Based Vehicular Communication	145
8.1	Vehicular D2D Communication	146
8.1.1	Quality of Service Issues	146
8.1.2	Contextual Awareness	147
8.2	D2D Support in LTE-A Networks	147
8.3	Resource Allocation	148
8.3.1	Vehicular Perspective	149
8.3.2	Moving Personal Cells	150
8.3.3	State of the Art: Resource Allocation	151
8.4	Device Discovery	152
8.4.1	Dedicated Discovery Resources	153
8.4.2	Existing Discovery Mechanisms	154
8.5	Summary	155
9	Epilogue	157
9.1	Future of ITS	157
9.2	Disruption Tolerance	158
9.3	Handover Latency	158
9.4	D2D-based Vehicular Communication	159
9.5	Data Handling in Vehicular Sensor Networks	159
9.6	Location Invariant Models	160

A Backward Algorithm	163
B EAP Authentication Mechanism	165
C Software Tools	167
C.1 IPerf	167
C.2 Vistumbler	167
C.3 Windows Network Monitor	168
C.4 Others	168
References	169
