

# Contents

## Part I Airplane Aerodynamics/Propulsion Integration

<b>Numerical Investigation of Slot and Configuration Impact on the Efficiency of Tangential Blowing at a Vertical Tailplane with Infinite Span</b> . . . . .	3
Anna Gebhardt and Jochen Kirz	
<b>Steady and Unsteady Numerical Simulation of a Bent Intake Geometry</b> . . . . .	15
Thomas Kächele, Tim Schneider and Reinhard Niehuis	
<b>Numerical and Experimental Investigation of a Helicopter Engine Side Intake</b> . . . . .	27
Florian Knoth and Christian Breitsamter	
<b>Simulations of Streamwise Vortices on a High-Lift Wing with UHBR-Engine</b> . . . . .	39
Tim Landa, Rolf Radespiel and Sebastian Ritter	
<b>Aerodynamic Assessment of Pylon-Mounted Over-the-Wing Engine Installations on a STOL Commercial Aircraft Concept</b> . . . . .	51
Luciana Savoni and Ralf Rudnik	
<b>Unsteady Simulation of the Separated Wake of a Transport Aircraft by Detached Eddy Simulation</b> . . . . .	61
Andreas Waldmann, Thorsten Lutz and Ewald Krämer	

## Part II Turbulence Research and Turbulence Modeling

<b>Revisiting the Higher-Order Statistical Moments in Turbulent Pipe Flow Using Direct Numerical Simulations</b> . . . . .	75
Christian Bauer, Daniel Feldmann and Claus Wagner	

<b>A New Experiment of a Turbulent Boundary Layer Flow at Adverse Pressure Gradient for Validation and Improvement of RANS Turbulence Models . . . . .</b>	<b>85</b>
Tobias Knopp, Matteo Novara, Daniel Schanz, Erich Schülein, Andreas Schröder, Nico Reuther and Christian J. Kähler	
<b>Optical Skin Friction Measurements in a Turbulent Boundary Layer with Pressure Gradient . . . . .</b>	<b>95</b>
Erich Schülein, Nico Reuther and Tobias Knopp	
<b>Characterization of Turbulence Generated by an Active Grid with Individually Controllable Paddles. . . . .</b>	<b>105</b>
T. Skeledzic, J. Krauss, H. Lienhart, Ö. Ertunc and J. Jovanovic	
<b>Part III Hypersonic Aerodynamics</b>	
<b>Stagnation Point Probes in Hypersonic Flow . . . . .</b>	<b>117</b>
Syed Raza Christopher Ali, Rafael Zárate Cárdenas, Rolf Radespiel, Thomas Schilden and Wolfgang Schröder	
<b>PIV Measurements of Shock/Cooling-Film Interaction at Varying Shock Impingement Position . . . . .</b>	<b>129</b>
Pascal Marquardt, Michael Klaas and Wolfgang Schröder	
<b>Calibration of Fast-Response Temperature Sensitive Paints for Their Application in Hypersonic High Enthalpy Flows . . . . .</b>	<b>141</b>
Jan Martinez Schramm, Frank Edzards and Klaus Hannemann	
<b>Part IV Laminar Flow Control and Transition</b>	
<b>Redesigned Swept Flat-Plate Experiment for Crossflow-Induced Transition Studies . . . . .</b>	<b>155</b>
Hans Peter Barth, Stefan Hein and Henning Rosemann	
<b>Experimental and Numerical Investigation on Delta-Wing Post-stall Flow Control . . . . .</b>	<b>167</b>
Andrei Buzica and Christian Breitsamter	
<b>Extension of the PSE Code NOLOT for Transition Analysis in Rotating Reference Frames . . . . .</b>	<b>179</b>
Xavier Dechamps and Stefan Hein	
<b>Numerical Simulations of the High-Enthalpy Boundary Layer on a Generic Capsule Geometry with Roughness . . . . .</b>	<b>189</b>
Antonio Di Giovanni and Christian Stemmer	
<b>One-Equation Transition Model for Airfoil and Wing Aerodynamics . . . . .</b>	<b>199</b>
M. Fehrs	

<b>Experimental Investigation of a Dynamically Forced Impinging Jet Array</b> . . . . .	209
Frank Haucke and Arne Berthold	
<b>Linear and Nonlinear Growth of Secondary Instabilities of Stationary Crossflow Vortices Studied by Parabolized Stability Equations</b> . . . . .	219
Stefan Hein	
<b>Flow Manipulation by Standing Acoustic Waves and Visualization with Background Oriented Schlieren (BOS)</b> . . . . .	229
Christian Kiefer, Dara Feili, Karin Bauer and Helmut Seidel	
<b>Air Outlet Design for a Passively Driven Hybrid Laminar Flow Control System</b> . . . . .	239
Udo Krause, Peter Kreuzer and Hubert Stuke	
<b>Determination of the Critical Cross Flow N-factor for the Low-Speed Wind Tunnel Braunschweig (DNW-NWB)</b> . . . . .	251
Martin Kruse, Albert Küpper, Rouven Petzold and Federico Munoz	
<b>Experimental Studies on the Receptivity of Stationary Crossflow Modes to Pneumatic Actuation</b> . . . . .	263
J. Lohse, A. Berthold and W. Nitsche	
<b>Direct TS-Wave Simulation on a Laminar Wing-Profile with Forward-Facing Step</b> . . . . .	275
Heinrich Lüdeke and Kai Backhaus	
<b>Reattaching Flow Behind a Forward-Backward Facing Step Investigated with Temperature-Sensitive Paint</b> . . . . .	285
J. Lemarechal, E. Mäteling, C. Klein, D.K. Puckert and U. Rist	
<b>Transition Downstream of an Isolated Cylindrical Roughness Element on a Flat Plate Boundary Layer</b> . . . . .	295
Dominik K. Puckert and Ulrich Rist	
<b>Experimental Investigation of Mach Number and Pressure Gradient Effects on Boundary Layer Transition in Two-Dimensional Flow</b> . . . . .	305
Steffen Risius, Marco Costantini, Stefan Hein, Stefan Koch and Christian Klein	
<b>Separation Control with Lobe Mixers in the Wake of an Axisymmetric Space-Launcher Model</b> . . . . .	315
Anne-Marie Schreyer and Gonca Taskin	
<b>Shape Optimization of Active and Passive Drag-Reducing Devices on a D-shaped Bluff Body</b> . . . . .	327
Richard Semaan	

<b>Active Flow Control on a Non-steady Operated Compressor Stator Cascade by Means of Fluidic Devices. . . . .</b>	<b>337</b>
M. Staats and W. Nitsche	
<b>Study About Boundary-Layer Suction at a Junction for Sustained Laminar Flow. . . . .</b>	<b>349</b>
Johannes Zahn and Ulrich Rist	
<b>Part V High-Agility Configuration</b>	
<b>Study of Total Pressure Losses at the Engine Face of a Submerged Inlet with an Ingested Vortex. . . . .</b>	<b>361</b>
Stefan Koch, Markus Rütten and Martin Rein	
<b>Part VI Rotorcraft Aerodynamics</b>	
<b>Towards Density Reconstruction of Helicopter Blade Tip Vortices from High-Speed Background-Oriented Schlieren Data. . . . .</b>	<b>375</b>
J.N. Braukmann, A. Bauknecht, C.C. Wolf and M. Raffel	
<b>Unsteady Boundary Layer Transition Detection by Automated Analysis of Hot Film Data . . . . .</b>	<b>387</b>
A. Goerttler, A.D. Gardner and K. Richter	
<b>Wind Turbine Wake Vortex Influence on Helicopter Rotor Trim . . . . .</b>	<b>397</b>
B.G. van der Wall and P.H. Lehmann	
<b>Part VII Aeroelasticity and Structural Dynamics</b>	
<b>Experimental Investigation of Flutter Mechanisms Depending on Sweep Under Subsonic Flow and Low Reynolds Numbers. . . . .</b>	<b>411</b>
Marc Braune and Stefan Wiggen	
<b>Numerical Investigations of an Elasto-Flexible Membrane Airfoil Compared to Experiments . . . . .</b>	<b>421</b>
Julie Piquee, Mehran Saeedi, Christian Breitsamter, Roland Wüchner and Kai-Uwe Bletzinger	
<b>Coupling of Recurrent and Static Neural Network Approaches for Improved Multi-step Ahead Time Series Prediction. . . . .</b>	<b>433</b>
Maximilian Winter and Christian Breitsamter	
<b>Part VIII Numerical Simulation/Aerodynamics</b>	
<b>Direct Numerical Simulation of Convective Channel Flow with Temperature and Concentration Gradients . . . . .</b>	<b>445</b>
Philipp Bahavar and Claus Wagner	

<b>Comparison of Optimizer-Based and Flow Solver-Based Trimming in the Context of High-Fidelity Aerodynamic Optimization. . . . .</b>	<b>455</b>
Časlav Ilić	
<b>A New High-Order Discontinuous Galerkin Solver for DNS and LES of Turbulent Incompressible Flow . . . . .</b>	<b>467</b>
Martin Kronbichler, Benjamin Krank, Niklas Fehn, Stefan Legat and Wolfgang A. Wall	
<b>Bayesian Calibration of Volume Averaged RANS Model Parameters for Turbulent Flow Simulations Over Porous Materials . . . . .</b>	<b>479</b>
Pradeep Kumar, Noémi Friedman, Elmar Zander and Rolf Radespiel	
<b>Scale-Resolving Simulations on Unstructured Meshes with a Low-Dissipation Low-Dispersion Scheme. . . . .</b>	<b>489</b>
Axel Probst	
<b>Subgrid Scale Modelling of Relaminarization Effects in a Differentially Heated Channel. . . . .</b>	<b>499</b>
Tim Wetzel and Claus Wagner	
 <b>Part IX Experimental Aerodynamics/Experimental Simulation and Test Techniques</b>	
<b>High Speed Visualization of Droplets Impacting with a Dry Surface at High Weber Numbers . . . . .</b>	<b>511</b>
David A. Burzynski and Stephan E. Bansmer	
<b>Full-Scale In-Flight Flow Investigation of a High-Lift Vortex System by Means of Particle Image Velocimetry . . . . .</b>	<b>523</b>
Christina Dunker and Reinhard Geisler	
<b>Challenges in the Experimental Quantification of the Momentum Coefficient of Circulation Controlled Wings . . . . .</b>	<b>533</b>
Yosef El Sayed M., N. Beck, P. Kumar, R. Semaan and R. Radespiel	
<b>PIV Measurements of Buffet with Artificial Noise . . . . .</b>	<b>545</b>
Antje Feldhusen-Hoffmann, Michael Klaas and Wolfgang Schröder	
<b>A New Type of Line-Array for Acoustic Source Localization at Drive-By Tests of Trains . . . . .</b>	<b>557</b>
Arne Henning, Andreas Lauterbach, Maik Bode, Roland Schuster and Klaus Ehrenfried	
<b>Skin Friction Measurements in Three-Dimensional Flows by White-Light Oil-Film Interferometry . . . . .</b>	<b>567</b>
Jens Lunte and Erich Schüle	

<b>Experimental Investigation of the In-Flight Shape and Deformation of a Full-Scale Airliner Wing in the High-Lift and Low Speed Regime</b> .....	577
Ralf Meyer	

<b>Recent Advances in Volumetric Flow Measurements: High-Density Particle Tracking (‘Shake-The-Box’) with Navier-Stokes Regularized Interpolation (‘FlowFit’)</b> .....	587
Daniel Schanz, Andreas Schröder, Sebastian Gesemann, Florian Huhn, Matteo Novara, Reinhard Geisler, Peter Manovski and Karthik Depuru-Mohan	

## **Part X Aeroacoustics**

<b>Overset-LES with Stochastic Forcing for Sound Source Simulation</b> .....	601
P. Bernicke, R.A.D. Akkermans, R. Ewert and J. Dierke	

<b>Noise Reduction Technologies for Wind Turbines</b> .....	611
Michaela Herr, Roland Ewert, Benjamin Faßmann, Christof Rautmann, Susanne Martens, Claas-Hinrik Rohardt and Alexandre Suryadi	

<b>Numerical Simulation of the Sound Generation and the Sound Propagation from Air Intakes in an Aircraft Cabin</b> .....	623
Mikhail Konstantinov and Claus Wagner	

<b>CAA Prediction of Jet-Wing Interaction Noise Using an Eddy Relaxation Source Model</b> .....	635
Andrej Neifeld, Christina Appel, Jürgen Dierke, Roland Ewert and Jan W. Delfs	

<b>Prediction of Airfoil Trailing Edge Noise Reduction by Application of Complex Porous Material</b> .....	647
Lennart Rossian, Roland Ewert and Jan W. Delfs	

<b>Towards the Prediction of Flow and Acoustic Fields of a Jet-Wing-Flap Configuration</b> .....	659
Daniel Schütz and Holger Foysi	

<b>Numerical Simulation of a Resonant Cavity: Acoustical Response Under Grazing Turbulent Flow</b> .....	671
Lewin Stein, Julius Reiss and Jörn Sesterhenn	

## **Part XI Vehicle Aerodynamics**

<b>Wall Shear Stress Measurements on a Double-Decker Train</b> .....	685
Johannes Haff, Erich Schüle, Arne Henning, Steve Cochard and Sigfried Loose	

<b>Aerodynamic Investigations of the Effects of Virtual Coupling on Two Next Generation Trains</b> . . . . .	695
Henning Wilhelmi, Thomas Thieme, Arne Henning and Claus Wagner	
 <b>Part XII Wind Energy</b>	
<b>Hybrid RANS/LES Simulations of the Three-Dimensional Flow at Root Region of a 10 MW Wind Turbine Rotor</b> . . . . .	707
Galih Bangga, Pascal Weihing, Thorsten Lutz and Ewald Krämer	
<b>Numerical Investigation of a Model Wind Turbine</b> . . . . .	717
Annette Fischer, Amélie Flamm, Eva Jost, Thorsten Lutz and Ewald Krämer	
<b>RANS Simulation of the New MEXICO Rotor Experiment Including Laminar-Turbulent Transition</b> . . . . .	729
C.C. Heister	
<b>CFD Study of Trailing Edge Flaps for Load Control on Wind Turbines</b> . . . . .	741
Eva Jost, Mário Firnhaber Beckers, Thorsten Lutz and Ewald Krämer	
<b>Aerodynamic Response of Wind Turbines in Complex Terrain to Atmospheric Boundary Layer Flows</b> . . . . .	753
Christoph Schulz, Thorsten Lutz and Ewald Krämer	
<b>Author Index</b> . . . . .	765

New Results in Numerical and Experimental Fluid  
Mechanics XI

Contributions to the 20th STAB/DGLR Symposium  
Braunschweig, Germany, 2016

Dillmann, A.; Heller, G.; Krämer, E.; Wagner, C.;  
Bansmer, S.; Radespiel, R.; Semaan, R. (Eds.)  
2018, XV, 767 p. 465 illus., 360 illus. in color.,  
Hardcover
