

Contents

1	Introduction to Laser Metal Deposition Process	1
1.1	Additive Manufacturing Technology	1
1.2	Brief Background of Laser Metal Deposition Process	4
1.3	Summary	5
	References	6
2	Laser Basics and Laser Material Interactions	11
2.1	Introduction	11
2.2	History and Development of Laser	12
2.3	Types of Lasers	14
2.3.1	Solid State Laser	14
2.3.2	Gaseous State Laser	15
2.3.3	Liquid State Laser	15
2.3.4	Chemical Lasers	16
2.3.5	Semiconductor Lasers	16
2.4	Properties of Lasers	16
2.4.1	Monochromaticity	17
2.4.2	Coherency	19
2.4.3	Directionality	21
2.5	Principles of Laser	23
2.5.1	Amplifying or Gain Medium	23
2.5.2	Pumping System	26
2.5.3	Optical Resonance System	27
2.6	Laser Safety	28
2.7	Areas of Application of Laser	29
2.8	Laser Material Interaction	31
2.9	Summary	33
	References	33

3	Laser Metal Deposition Process, Solidification Mechanism and Microstructure Formation	37
3.1	Introduction	37
3.2	Laser Metal Deposition Process Description	39
3.3	The Advantages and Limitations of Laser Metal Deposition	42
3.4	Solidification and Microstructural Evolution During the LMD Process	43
3.5	Properties Resulting from LMD Process	46
3.6	Summary	56
	References.	57
4	Processing Parameters in Laser Metal Deposition Process	61
4.1	Introduction	61
4.2	Processing Parameter in Laser Metal Deposition Process	62
4.2.1	Laser Power	62
4.2.2	Effect of Laser Power on the Surface Finish	63
4.2.3	Effect of Laser Power on the Microstructure	68
4.2.4	Effect of Laser Power on the Mechanical and Tribological Properties.	75
4.3	Scanning Velocity.	77
4.3.1	Effect of Scanning Speed on the Surface Finish	78
4.3.2	Effect of Scanning Speed on the Microstructure	81
4.3.3	Effect of Scanning Speed on the Mechanical and Tribological Properties	86
4.4	Powder or Wire Flow Rate and Gas Flow Rate	88
4.5	Laser Beam Diameter and Overlap Percentage	89
4.6	Summary	90
	References.	90
5	Laser Metal Deposition of Metals and Alloys	93
5.1	Introduction	93
5.2	Laser Metal Deposition of Metal-Alloys.	94
5.3	Summary	116
	References.	116
6	Laser Metal Deposition of Composites and Functionally Graded Materials	119
6.1	Introduction	119
6.2	Laser Metal Deposition of Composite Materials	120
6.3	Laser Metal Deposition of Functionally Graded Composite Materials.	129
6.4	Summary	139
	References.	139

7	Areas of Application of Laser Metal Deposition Process–Part	
	Repair and Remanufacturing	143
7.1	Introduction	143
7.2	Laser Metal Deposition Process in Repair	144
7.3	Laser Metal Deposition Process in Remanufacturing	153
7.4	Laser Metal Deposition in Surface Modification.	156
7.5	Summary	161
	References.	161
8	Laser Metal Deposition of Titanium Alloy and Titanium Alloy	
	Composite: Case Studies	165
8.1	Introduction	165
8.2	Case Study 1: Scanning Velocity Effect on Properties of Titanium Alloy Produced by Laser Metal Deposition Process	167
8.2.1	Introduction	167
8.2.2	Experimental Procedure.	168
8.2.3	Results and Discussion	170
8.2.4	Conclusion	174
8.3	Case Study 2: Effect of Laser Power on Laser Metal Deposited Ti6Al4V/TiC Composite.	175
8.3.1	Introduction	175
8.3.2	Wear Performance Behaviour of Ti6Al4V.	176
8.3.3	Experimental Method	178
8.3.4	Results and Discussion	184
8.4	Summary	191
	References.	192
9	Research Advancements in Laser Metal Deposition Process	197
9.1	Introduction	197
9.2	Additive Manufacturing	199
9.3	Laser Metal Deposition Process	201
9.4	Research Progress in Laser Metal Deposition Process	202
9.5	Summary	203
	References.	204
10	Future Research Need and in Laser Metal Deposition Process	
	and Summary	211
10.1	Introduction	211
10.2	Future Research Need in Laser Metal Deposition Process	213
10.3	Summary	213
	References.	214

Laser Metal Deposition Process of Metals, Alloys, and
Composite Materials

Mahamood, R.M.

2018, XVII, 215 p. 121 illus., 81 illus. in color.,

Hardcover

ISBN: 978-3-319-64984-9
