<b>1 Osteocardiology Risk Factors</b>	<b>1</b>
Introduction	1
Framingham Risk Factor Database	2
Multi-Ethnic Study Atherosclerosis (MESA)	3
Cardiovascular Health Study	4
Osteoporosis-Cardiovascular Risk Factors	4
American Heart Association Annual Statistics	5
Summary	6
References	6
<b>2 Coronary Artery Calcification</b>	<b>9</b>
Introduction	9
Subclinical Atherosclerosis	9
The Agatston Score	10
Method of Calculation Agatston Score	11
Density Factor	11
Grading of Coronary Artery Disease (Based on Total Calcium Score)	11
Guidelines for Coronary Calcium Scoring by 2010 Task Force	11
Prevalence of Coronary Artery Calcification	12
MESA Defines CAC Profiles	12
MESA in Coronary Artery Calcification Versus Calcific Aortic Valve Disease: The Role of Lp(a)	14
MESA Defines Gene Expression Profiles	14
Atherogenesis	15
The Molecular Biology of Vascular Calcification	15
Interventional Therapy for CAC	16
Summary	17
References	17

<b>3</b>	<b>Osteocardiology: Calcific Aortic Valve Disease</b>	21
	Introduction	21
	Three Stages of Calcific Aortic Valve Disease	22
	The Role of CHS and MESA in Calcific Aortic Valve Disease (CAVD)	22
	Lipoproteins as Novel Risk Factors in Calcific Aortic Valve Disease	24
	Lp(a) in Calcific Aortic Valve Disease	24
	Bicuspid Aortic Valve Disease	26
	Mitral Annular Calcification (MAC)	26
	Overview of the NHLBI Working Group Consensus Panel	27
	Normal Aortic Valve Function and Anatomy	27
	Cardiac Valve Cell Types: Valvular Interstitial Cells	28
	Valvular Endothelial Cells	28
	Osteogenic Phenotype	29
	Initiating Events: Oxidative Stress	29
	Calcifying Phenotype: Myofibroblast Differentiation to Bone	29
	Cell-Cell Signaling in Calcific Aortic Valve Disease	30
	Mouse Models of CAVD	32
	Clinical Trials: HMG CoA-Reductase Pathway	33
	NHLBI Recommendations for CAVD	34
	Summary	35
	References	35
<b>4</b>	<b>Osteocardiology: Calcific Aortic Disease</b>	39
	Introduction	39
	MESA and Calcific Aortic Disease (CAD)	39
	MESA Defines Calcific Aortic Disease and Bone Disease	41
	Familial Hypercholesterolemia and Calcific Aortic Disease	41
	Defining Aorta Calcification in Familial Hypercholesterolemia	41
	Summary	43
	References	43
<b>5</b>	<b>Osteocardiology: Endochondral Bone Formation</b>	45
	Introduction	45
	The Molecular Regulation of Mesenchymal Chondrogenesis to Osteogenesis	46
	The Stages of Bone Formation	46
	The Osteoblast Cell	46
	The Molecular Basis of Bone Formation in the Heart	48
	Aortic Valve Bone Phenotype	49
	Coronary Artery Bone Phenotype	50
	Calcific Aortic Bone Phenotype	50
	The Bone-Heart Paradox: Atherosclerosis in the Heart and in the Bone	51
	Summary	53
	References	53

<b>6</b>	<b>Osteocardiology: The Atherosclerotic Bone Paradox</b>	57
	Introduction	57
	The Role of TIEG1 in Wnt Signaling in Bone	58
	The Role of TIEG1 in Wnt Signaling in the Heart	58
	Wnt Signaling in Atherosclerosis	59
	In Summary	61
	References	62
<b>7</b>	<b>Osteocardiology: Cellular Origins of Cardiac Calcification</b>	65
	Introduction	65
	Embryonic Implications of Cellular Origin of Precursor Cells	67
	Stem Cell Hypothesis in Bioprosthetic Valve Calcification	70
	In Summary	71
	References	71
<b>8</b>	<b>Osteocardiology: LDL-Density-Gene Theory</b>	73
	Introduction	73
	Familial Hypercholesterolemia Genetics and Cholesterol Metabolism	73
	Familial Hypercholesterolemia as a Genetic Model for CAC, CAVD, CAD	74
	FH and CAVD in MESA	74
	Familial Hypercholesterolemia and Calcific Aortic Disease	75
	Phenotypic Expression of Calcification in the Heart: The Bernoulli Equation	76
	Summary	77
	References	77
<b>9</b>	<b>Osteocardiology: The LDL-Density-Mechanostat Theory</b>	79
	Introduction	79
	Osteocardiology Risk Factors	79
	Cellular Mechanisms of Left-Sided Valve Disease: The Osteogenic Phenotype	80
	Experimental Mouse Model of Aortic Valve Calcification and Femur Osteoporosis	80
	Experimental Model of Mitral Valve Cartilage Formation and Regurgitation	80
	Lrp5 Mechanostat Theory: The Role of Lrp5 in the Bone and Heart	81
	Phenotypic Expression of Calcification in the Heart: The Bernoulli Equation	81
	Role of Oxidative Stress in Left Sided Heart Valve Disease	82
	LDL-Density-Pressure Theory: The Role of Oxidative Stress in the Left Sided Valve Lesions	84
	Summary	85
	References	85
