

Contents

1	Current Issues	1
1.1	Introduction	1
1.2	Recruitment Practices Changing	1
1.3	Patient-Centred Communications	8
1.4	Assistive Communications Technology	9
1.5	Conclusion	12
	References	13
2	Information Technology Challenges and Opportunities	17
2.1	Introduction	17
2.2	Interdisciplinary Research	18
2.3	Semantic Web and Linked Data	18
2.3.1	Semantic Web	18
2.3.2	Linked Data	19
2.3.3	Challenges and Opportunities	19
2.4	Ontologies as Building Blocks for the Semantic Web	20
2.5	Agent-Based Technology	22
2.6	Conclusion	24
	References	24
3	Ontology Engineering	27
3.1	Introduction	27
3.2	Ontology Engineering Methodologies	27
3.2.1	Knowledge Engineering Methodology	28
3.2.2	DOGMA Methodology	29
3.2.3	TOVE Methodology	29
3.2.4	Methontology	30
3.2.5	SENSUS Methodology	31
3.2.6	DILIGENT Methodology	31
3.2.7	Discussion	32

3.3	Ontology Design.	34
3.3.1	Clarity.	34
3.3.2	Coherence.	34
3.3.3	Extendibility.	34
3.3.4	Minimal Encoding Bias.	35
3.3.5	Minimal Ontological Commitment.	35
3.4	Logical Consistency Verification of Ontology.	35
3.5	Ontology Editor Tool—Protégé.	35
3.6	Ontology Notations.	37
3.7	Conclusion.	38
	References.	39
4	Patient Practitioner Assistive Communications Ontology.	41
4.1	Introduction.	41
4.2	Overview of PPAC Ontology.	41
4.3	Aboriginal English Home Talk Ontology Classes.	43
4.4	Type 2 Diabetes Ontology Classes.	43
4.5	Object and Data Properties.	43
4.6	Instance Populations.	49
4.7	Case Study.	49
4.8	Conclusion.	51
	References.	52
5	Cross-Cultural Healthcare Communication System.	53
5.1	Introduction.	53
5.2	System Architecture.	53
5.2.1	Knowledge Assimilation.	53
5.2.2	Knowledge Dissimilation.	54
5.3	System Components.	55
5.3.1	Data and Knowledge Capture.	55
5.3.2	Knowledge Linking and Integration.	56
5.3.3	Refinement and Quality Assurance.	56
5.3.4	Knowledge Exposure.	57
5.4	Applications for Cross-Cultural Healthcare Communications System.	57
5.4.1	Patient Scenario.	57
5.4.2	GP Scenario.	59
5.5	Conclusion.	60
	References.	60
6	Employer Demand Ontology.	61
6.1	Introduction.	61
6.2	Overview of Employer Demand Ontology.	61
6.3	EDO Classes.	63
6.4	Object and Data Properties.	64

6.5	Instance Populations	65
6.6	Applications for Employer Demand Ontology	66
6.6.1	Government Official Developing Policy and Funding Protocols	66
6.6.2	Prospective Student Choosing Course of Study.	70
6.6.3	Human Resource Manager at a Company	72
6.6.4	Curriculum and Career Developer at a Tertiary Institution	74
6.7	Conclusion	77
	Reference	77
7	Employer Demand Intelligence.	79
7.1	Introduction	79
7.2	Introduction of Employer Demand Intelligence Tool	79
7.3	System Architecture	80
7.4	Case Study	81
7.4.1	Data Collection	81
7.4.2	Loading the Advertisement as a Corpus	81
7.4.3	EDIT Pipeline	81
7.5	Conclusion	86
	Reference	86
8	Intelligent System	87
8.1	Introduction	87
8.2	Ontology-based Multi-agent Systems	87
8.3	The Integration of Ontologies and Software Agents	89
8.3.1	Facilitating Agents' Communication	90
8.3.2	Representing Domain Knowledge and Helping to Locate and Retrieve Information.	90
8.3.3	Reasoning the Knowledge.	90
8.4	Employment Demands and Healthcare Service Delivery Management Systems	91
8.4.1	Uncertainty Affecting Physicians' Perspectives and Confidence	91
8.4.2	A Study of the Implications for Culturally Competent Critical Healthcare Staffing	91
8.4.3	Cognitive Computing and the Ontology Contributions	94
8.5	Conclusion	95
	References.	96
9	Open Issue and Concluding Remarks	99
9.1	Introduction	99
9.2	Employment and Service Communications.	99
9.3	Concluding Commentary	101
	References.	102

Ontology Engineering Applications in Healthcare and
Workforce Management Systems

Forbes, D.E.; Wongthongtham, P.; Terblanche, C.;
Pakdeetrakulwong, U.

2018, XIII, 103 p. 44 illus., 41 illus. in color., Hardcover

ISBN: 978-3-319-65011-1
