Part I General

1 Geographic Regions of Egypt	3
1.1 Introduction	3
1.2 The Nile Valley and the Nile Delta	4
1.3 The Western Desert	6
1.4 The Eastern Desert.	9
1.5 The Sinai Peninsula	10
1.6 The Mediterranean Sea.	12
1.7 The Red Sea	12
References	13
2 The Geologic Setting	15
2.1 Rock Formations	15
2.1.1 The Basement Complex (Precambrian).	15
2.1.2 The Sedimentary Cover (Palaeozoic, Mesozoic, Cenozoic)	15
2.2 Tectonic Framework.	19
2.2.1 The Arabo-Nubian Shield.	19
2.2.2 The Stable Shelf	20
2.2.3 The Unstable Shelf	20
2.2.4 The Gulf of Suez—Red Sea Graben	21
2.2.5 Volcanicity.	21
2.3 Conclusion	22
References	22
3 Climatic Conditions: Present and Past.	25
3.1 Present-Day Climatic Conditions	25
3.1.1 Degree of Aridity	25
3.1.2 Temperature	26
3.1.3 Rainfall	27
3.1.4 Wind	31
3.2 Past Climatic Conditions.	31
3.2.1 Climate During the Paleogene.	32
3.2.2 Climate During the Neogene.	32
3.2.3 Climate During the Quaternary	33
3.3 Conclusion	34
References	35

Part II The Nile

4 Remarkable Events in the Life of the River Nile	39
4.1 Introduction	39
4.2 Geologic and Geomorphologic Development of the Nile.	40
4.3 Remarkable Event I: The Messinian Crisis	40
4.4 Remarkable Event II: The Pliocene Gulf.	41
4.5 Remarkable Event III: The African Prenile	43
4.6 Other Events in the Life of the River Nile	44
4.7 Conclusion	44
References	45
5 Lake Nasser Region	47
5.1 General Features of the Lake Region	47
5.2 Morphometry of Lake Nasser	49
5.3 Local Forms of Lake Nasser	49
5.3.1 The Nubian Delta	50
5.3.2 Embayments (Khors)	51
5.3.3 Headlands and Peninsulas.	52
5.3.4 Islands.	53
5.4 Geomorphological Impacts of Lake Nasser	53
5.5 Hazards Threatening Lake Nasser	53
5.5.1 The Nile Silt.	54
5.5.2 Aeolian Sand Drift	54
5.5.3 Present-Day Climatic Change	54
5.5.4 Construction of New Dams on the Nile Reaches	54
5.6 Conclusion	55
References	55
6 The Nile Delta	57
6.1 General Morphologic Characteristics	57
6.2 Geology and Evolution of the Nile Delta	58
6.3 The Nile Delta Branches.	60
6.3.1 Ancient Branches	60
6.3.2 Present-Day Branches	61
6.4 Turtle-Back Mounds	62
6.5 Coastal Forms	62
6.5.1 The Coastal Plain	63
6.5.2 Coastal Dunes.	63
6.5.3 Coastal Lagoons	64
6.5.4 The Barari (Wasteland) Salt Marshes Flats	65
6.5.5 Interaction Between the Coastal Fringe and the Mediterranean Sea	66
6.6 Conclusion	67
References	67

Part III The Plateaus

7 The Sandstone Plateaus, SW Western Desert.	71
7.1 Location and Exploration	71
7.2 Geology	72
7.3 The Gilf Kebir Plateau	74
7.3.1 General Characteristics.	74

7.3.2	Drainage Networks and Basins	74
7.3.3	Local Landforms	76
7.3.4	The Playas	76
7.3.5	The Outlier Remnants	79
7.3.6	The Basaltic Hills	80
7.4	The Abu Ras Plateau	80
7.4.1	General Characteristics	80
7.4.2	The Escarpments of the Plateau and the Outlier Hills	81
7.4.3	The Wadi Morphology	81
7.4.4	Characteristics of the Wadis	81
7.5	The Gap Between Abu Ras and Gilf Kebir Plateaus	82
7.6	Evolution of Gilf Kebir	82
7.7	Conclusion	83
	References	83
8	The Karstified Carbonate Platforms in the Western Desert	85
8.1	Introduction	85
8.2	General Characteristics	86
8.3	Karst Forms	86
8.3.1	Solution Depressions	87
8.3.2	Residual Karst Forms and Residues	88
8.4	Structural Forms	90
8.5	Eolian Forms	93
8.5.1	Kharafish Forms	94
8.5.2	Sand Dunes	99
8.6	Fluvial Forms	100
8.6.1	Drainage Lines	100
8.6.2	Wadis	100
8.6.3	Giant Flutes	101
8.6.4	Playas	102
8.6.5	Consolidated Fluvial Gravel	103
8.7	Conclusion	103
	References	103
9	The Region of El-Galalah Plateaus NE The Eastern Desert	105
9.1	Introduction	105
9.2	Geological Background	107
9.2.1	Stratigraphy	107
9.2.2	Structure and Tectonics	107
9.3	Cuesta Topography	108
9.4	The Fluvial Forms System	110
9.5	Wadi Araba	113
9.6	Karst Forms	114
9.7	Other Minor Forms	117
9.8	Conclusion	117
	References	118
Part IV The Mega Depressions		
10	The Qattara Depression	121
10.1	Introduction	121
10.2	General Characteristics	122
10.3	The Qattara Escarpments	123

10.4 The Depression Floor	124
10.4.1 Sabkhas and Associated Forms	124
10.4.2 Sand Dunes	127
10.4.3 Closed Basins	130
10.4.4 The Wadi-Fan System	130
10.5 Origin of the Depression	130
10.6 Utilization of the Depression for Power Production	131
10.7 Conclusion	132
References	132
11 The Kharga-Dakhla Depression	133
11.1 Introduction	133
11.2 General Characteristics	133
11.3 The Surrounding Plateaus	134
11.4 The Escarpments	134
11.4.1 Alignment and Slope Form	134
11.4.2 Superficial Sediments and Associated Landforms	138
11.5 The Depression Floor	140
11.5.1 Playas	141
11.5.2 Sand Dunes	147
11.5.3 Spring Mounds	147
11.5.4 Hills and Mesas	148
11.6 Conclusion	149
References	150
12 The Fayum Depression	153
12.1 Introduction	153
12.2 Geology	154
12.3 The Hawara Channel	155
12.4 Bounding Escarpments	156
12.5 Inverted Wadis	157
12.6 Lake Beaches and Ancient Lakes	157
12.7 Lake (Birket) Qarun	158
12.8 The Fayum Delta	159
12.9 Canyon-like Wadis	159
12.10 Development of the Depression	161
12.10.1 The First Stage	161
12.10.2 The Second Stage	161
12.11 Conclusion	161
References	162
Part V Sand Seas and Dune Fields	
13 The Great Sand Sea	165
13.1 Introduction	165
13.2 General Characteristics of the Great Sand Sea	166
13.3 Dune Forms and Patterns	167
13.3.1 Dune Forms	167
13.3.2 Dune Pattern	170
13.4 Sand Properties	171
13.4.1 Grain Size	172
13.4.2 Surface Texture	173

13.4.3	Reddened Sand	175
13.4.4	Minerals	175
13.5	Source of Sand	175
13.6	Age and Development	176
13.6.1	Age	176
13.6.2	Development of the Great Sand Sea	177
13.7	Conclusion	177
	References	178
14	Ghard Abu Moharik Sand Sea	181
14.1	Location and Dimensions	181
14.2	Geology and Topography	181
14.3	Climatic Conditions	182
14.4	Previous Investigations	183
14.5	Dune Forms of GAM	184
14.5.1	The Northern Section (Fore-Erg)	184
14.5.2	The Central Section 'Erg Body'	184
14.5.3	The Southern Section 'Back-Erg'	186
14.6	Barchan Dune Displacement	186
14.7	Sand Properties	188
14.7.1	Grain Size	188
14.7.2	Surface Texture	188
14.7.3	Mineralogical Composition	188
14.8	Conclusion	190
14.8.1	Forms and Pattern of Sand Dunes	190
14.8.2	Source of Sand	190
14.8.3	Mode of Development of GAM	191
14.8.4	Age of GAM	191
	References	192
15	North Sinai Sand Sea	195
15.1	Location and Dimensions	195
15.2	Previous Studies	196
15.3	Dune Types, Forms, and Patterns	197
15.3.1	Types of Dunes	197
15.3.2	Dune Forms and Morphometric Characteristics	200
15.3.3	Dune Patterns	201
15.4	Dune Dynamics	203
15.4.1	Sand Removal and Deposition on Linear Dunes	203
15.4.2	Dynamics of Crescent Dunes	204
15.5	Physical and Mineralogical Aspects of Dune Sands	206
15.5.1	Physical Aspects	206
15.5.2	Mineralogical Composition	207
15.6	Factors Affecting the Development of the North Sinai Sand Sea	207
15.6.1	Wind System	207
15.6.2	Coastal Offshore Current	208
15.6.3	Climatic Changes	208
15.6.4	Sea Level Changes	209
15.6.5	Sand Availability	209
15.7	Source of Sand and the Geologic Age of Dunes	209
15.7.1	Source of Sand	209
15.7.2	Age of Dunes	209

15.8 Conclusion	209
References	210
16 Dune Fields of SE Eastern Desert of Egypt	211
16.1 Introduction	211
16.2 El-Hebal Dune Field	213
16.2.1 General Characteristics.	213
16.2.2 Dune Forms	213
16.3 West El-Hebal Dune Field	216
16.4 Delta Wadi Kraf Dune Field	217
16.5 El-Allaqi Dune Field	218
16.6 Sand Properties	220
16.6.1 Grain Size	220
16.6.2 Mineral Composition	220
16.7 Conclusion	221
References	221
Part VI Mountains and Drainage Systems	
17 The Red Sea and Sinai Mountains	225
17.1 Introduction	225
17.2 Dyke Swarms	226
17.3 Intermountain Basins	227
17.4 Ring Complexes Circular Mounts	229
17.4.1 Geological Aspects	229
17.4.2 Morphological Characteristics	229
17.5 Old Erosion Surfaces/Planation Surfaces/Etchplains	232
17.5.1 Introduction	232
17.5.2 Planation Surfaces in the Red Sea and Sinai Mountains	232
17.6 The Terraces of the Lacustrine Sediments in Wadi Feiran in Sinai Mountains.	233
17.6.1 Sediment Properties.	233
17.6.2 Age.	236
17.6.3 Origin and Mode of Development.	236
17.7 Conclusion	238
References	238
18 The Drainage System of the Eastern Desert (With a Special Reference to Wadi Qena Basin)	241
18.1 Introduction	241
18.2 Regional Drainage System	241
18.3 Drainage Basins.	242
18.4 Drainage Patterns.	242
18.5 Some Characteristics of Geomorphic Significance	242
18.6 Wadi Qena Basin.	246
18.6.1 Geomorphologic Characteristics of Wadi Qena	246
18.6.2 Features and Forms of Wadi Qena.	248
18.7 Conclusion	250
References	251
19 The Drainage System in Sinai (With a Special Reference to Wadi El Arish)	253
19.1 Introduction	253

19.2 Regional Drainage Systems	253
19.3 Drainage Basins	254
19.4 Drainage Patterns	255
19.5 Wadi El Arish	256
19.5.1 General Characteristics	256
19.5.2 Geomorphologic Aspects	256
19.6 Conclusion	259
References	259

Part VII Coastal Forms

20 Ridge-Depression Landscape Along the Mediterranean NW Coast of the Western Desert	263
20.1 Introduction	263
20.2 Distribution of the Ridges in the System	264
20.2.1 The Continental Ridges	264
20.2.2 The Submarine Ridges	266
20.3 Sedimentological Composition of the Ridges	267
20.3.1 The Coastal (First) Ridge	269
20.3.2 The El-Max-Abu Sir (Second) Ridge	269
20.3.3 The Gabal Maryut (Third) Ridge	270
20.3.4 The Fourth (Khashm El-Aish) Ridge	271
20.3.5 The Fifth, Sixth, Seventh, and Eighth Ridges	271
20.4 Inter-ridges Depressions	271
20.4.1 The Geomorphologic Characteristics of the Depressions	271
20.4.2 Sabkhas and Salt Marshes	272
20.4.3 Lagoons and Salt Lakes	272
20.5 Origin and Mode of Development of the Ridge-Depression System	274
20.6 Age	275
20.7 Climatic Significance	276
20.8 Environmental Conditions of Ridge-Depression Development	276
References	277
21 Red Sea Coastal Forms	279
21.1 Regional Setting	279
21.2 Fluvial Forms	279
21.2.1 Deltas	279
21.2.2 Bahadas	282
21.3 Aeolian Forms	283
21.4 Marine Forms	283
21.4.1 Coral Reefs	284
21.4.2 Coastal Cliffs and Marine Platforms	284
21.4.3 Sand and Gravel Beaches	285
21.4.4 Sand Barriers	285
21.5 Forms Resulting from Sea Level Changes	286
21.5.1 Submerged Forms	286
21.5.2 Reef Terraces	289
21.6 Conclusion	289
References	290
22 Bardawil Lake and the Surrounding Sabkhas	291
22.1 General Characteristics of Bardawil Lake	291
22.2 Tectonic Framework	293

22.3 Local Sediments	293
22.4 Coastal Processes and Hydrodynamics	294
22.5 Geomorphology of the Lake	295
22.5.1 Basins of the Lake	295
22.5.2 The Coastal Barriers	296
22.5.3 Tidal Forms	298
22.5.4 Submerged Forms	299
22.6 Sabkhas Surrounding Bardawil Lake	300
22.6.1 General Aspects	300
22.6.2 Surface Features	300
22.6.3 Sediments and Stratigraphy	301
22.7 Conclusion	301
References	302

Part VIII Applied Geomorphology

23 Geo-Parks and Features of Geomorphic and Geologic Significance	307
23.1 Introduction	307
23.2 The Igneous and Metamorphic Peneplained Plateau	307
23.2.1 Geology	308
23.2.2 Geomorphology	309
23.3 Buried Wadis and Channels	309
23.3.1 Wide Wadis	310
23.3.2 Anastomosing Channels	310
23.3.3 Regional Reconstruction of Palaeo-Drainage System	310
23.4 The White Desert of Farafra Geo-Park: Product of Karst, Fluvial, and Aeolian Processes	311
23.4.1 Introduction	311
23.4.2 Forms	312
23.5 Domes of Northern Sinai	312
23.5.1 Introduction	312
23.5.2 Structural Forms	313
23.5.3 Fluvial Forms	314
23.6 Inverted Wadis	315
23.7 Djara and Sannur Caves Geo-Parks	318
References	318
24 Geomorphologic Hazards in Egypt	321
24.1 Introduction	321
24.2 Fluvial Hazards	322
24.2.1 Nile Discharge Fluctuations	322
24.2.2 Flash Floods	323
24.3 Sand Drift and Dune Encroachment	325
24.3.1 Sand Drift Hazards	325
24.3.2 Hazards of Moving Dunes	326
24.4 Erosion Along the Coasts of the Nile Delta	326
24.5 Earthquakes	327
24.6 Conclusion	328
References	329
Index	331

Landscapes and Landforms of Egypt

Landforms and Evolution

Embabi, N.S.

2018, XXII, 336 p. 181 illus., 122 illus. in color.,

Hardcover

ISBN: 978-3-319-65659-5
