

Contents

1	The Industry of Honey. An Introduction	1
1.1	Honey. Definition and Simplified Chemical Composition	1
1.2	Honey. Chemical Composition and Criteria According to the Council Directive 2001/110/EC	2
1.2.1	Honey Composition. Carbohydrates	7
1.2.2	Honey Composition. Water	8
1.2.3	Honey Composition. Nitrogenous Substances	8
1.2.4	Honey Composition. Mineral Substances	8
1.2.5	Minor Honey Components. Vitamins	9
1.2.6	Minor Honey Components. Organic Acids	9
1.2.7	Minor Honey Components. Aroma Compounds	9
1.2.8	Minor Honey Components. Polyphenols	9
1.3	Physical Properties of Honeys	10
1.3.1	Colour	10
1.3.2	Density	11
1.3.3	Viscosity	11
1.3.4	Refraction Index	11
1.4	Biological and Nutritional Features of Honeys	12
	References	12
2	Honey: Processing Techniques and Treatments	15
2.1	The Industry of Honey. Description of Processing Steps	15
2.2	Initial Extraction	16
2.3	Dehumidification	17
2.4	Liquefaction and Mixture	17
2.5	Heating	18
2.6	Pasteurisation	19
2.7	Crystallisation	19
2.8	Final Packaging	21
	References	21

3 Overheating Indexes and Honey Quality 23

3.1 Honey Processing Modifications. An Introduction 23

3.2 Honey Heating and Storage Indexes. 5-Hydroxymethylfurfural . . . 24

3.3 Honey Heating and Storage Indexes. Diastase and Invertase 28

3.4 Honey Heating and Storage Indexes. Alternative Approaches 30
