

Contents

1	Introduction	1
	References.	10
2	Spin Dynamics	13
2.1	Phenomenological Description	13
2.1.1	Magnetization Dynamics at Various Time Scales	18
2.1.2	Optically Induced Ultrafast Spin Dynamics.	19
2.1.3	Landau–Lifshitz–Gilbert (LLG) Equation	22
	References.	24
3	Magnetic Damping	27
3.1	Intrinsic Contribution	28
3.1.1	Spin–Orbit Coupling	29
3.1.2	Phonon-Drag Mechanism	29
3.1.3	Eddy-Current Mechanism	30
3.2	Extrinsic Contribution.	31
3.2.1	Two-Magnon Scattering	32
3.2.2	Magnetic Inhomogeneity.	38
3.3	Theoretical Model for Damping	38
3.3.1	s - d -Exchange Relaxation.	38
3.3.2	Fermi Surface Breathing	43
	References.	44
4	Experimental Techniques to Investigate Spin Dynamics	47
4.1	Time-Resolved Magneto-Optical Kerr Effect (TR-MOKE).	48
4.1.1	Basics and Background.	48
4.1.2	All-Optical TR-MOKE Microscope.	52
4.1.3	Benchtop TR-MOKE Setup	53
4.1.4	Time-Resolved Scanning Kerr Microscope	55

4.2	Brillouin Light Scattering (BLS)	56
4.2.1	Principle	57
4.2.2	Experimental Setup	60
4.2.3	BLS Microscopy	66
4.3	Ferromagnetic Resonance (FMR)	68
4.3.1	Basics	69
4.3.2	Cavity-Based Ferromagnetic Resonance	70
4.3.3	Broadband Ferromagnetic Resonance	72
4.4	Advantage and Disadvantage of Various Methods	77
	References.	78
5	Factors Affecting Spin Dynamics	83
5.1	Material Properties	84
5.2	Interfacial Condition	90
5.3	Shape, Size, and Pattern	92
5.4	Multilayer.	96
	References.	97
6	Electrical and Optical Control of Spin Dynamics	101
6.1	Spin Dynamics Triggered by Electrical Current	102
6.2	Spin-Transfer Torque	103
6.3	Current-Induced Spin–Orbit Torque	109
6.4	Optical Control of Spin Dynamics	112
6.4.1	Coherent Control of Precessional Dynamics by Magnetic Field Pulse Shaping	112
6.4.2	Non-Thermal Excitation and Coherent Control of the Spin Dynamics in Magnets by Inverse Faraday Effect	114
6.4.3	All-Optical Control of Ferromagnetic Thin Films and Nanostructures.	118
	References.	121
7	Tunable Magnetic Damping in Ferromagnetic/Non-magnetic Bilayer Films	127
7.1	Static Control of Damping	127
7.1.1	Spin Pumping	128
7.1.2	Interfacial <i>d-d</i> Hybridization	130
7.1.3	Exemplary Description of Damping Studies in Co and NiFe Layer with Pt or Au Overlayer.	132
7.1.4	Local Modification of Interface Using Focused Ion Beam in NiFe/Pt, NiFe/Cr, and NiFe/Au.	137

7.2	Dynamic Control of Damping	146
7.2.1	Spin Hall Effect Induced Modulation of Damping in Pt/NiFe and W/CoFeB	147
7.2.2	Spin Hall Angle Estimation of Pt and W	149
	References.	150
8	Summary and Future Direction	153
	References.	155

Spin Dynamics and Damping in Ferromagnetic Thin
Films and Nanostructures

Barman, A.; Sinha, J.

2018, XI, 156 p. 53 illus., 35 illus. in color., Hardcover

ISBN: 978-3-319-66295-4
