

Contents

1	Introduction	1
1.1	Ecological and Economic Challenges and the Built Environment	1
1.2	Research Aim and Audience	3
1.3	Research Question	4
	References	5
2	Modern History of Sustainable Architecture	7
2.1	Historical Background	7
2.2	Towards a New Architectural Design Paradigm	9
	References	10
3	Definitions and Paradigm Shift	13
3.1	Negative Impact Reduction via Increased Efficiency	13
3.2	Positive Impact via Increased Regenerative Effectiveness	15
	References	17
4	Design Principles of Regenerative Design	19
4.1	Introduction	19
4.2	Guiding Principles	20
4.3	Framework for Regenerative Building Design	21
4.3.1	Regenerative Construction Systems	22
4.3.2	Regenerative Design Elements	24
4.3.3	Regenerative Building Materials and Products	24
4.4	Design Strategies for Regenerative Building Design	26
4.4.1	Design Strategy 1: Selection of a Construction System	26
4.4.2	Design Strategy 2: Defining of Design Elements and Their Performance	27
4.4.3	Enhance Air Quality and Human Health	27
4.4.4	Energy Saving	28
4.4.5	Renewable Energy Production	28

4.4.6	Water Management	29
4.4.7	Design with Nature	29
4.4.8	Design Strategy 3: Choice of Regenerative Materials	30
	References.	32
5	Indicators and Metrics of Regenerative Design.	33
5.1	Introduction	33
5.2	Life Cycle Standards and System Boundary	35
5.3	Functional Unit, Year, Tools and Indicators	39
5.4	Life Cycle Inventory.	41
5.5	Limitations	44
	References.	44
6	Case Studies: Energy Efficiency Versus Regenerative Paradigm	47
6.1	Introduction	47
6.2	Case Study 1: Efficiency Paradigm (Office Building)	48
6.3	Case Study 2: Regenerative Paradigm (Office Building).	51
6.4	Case Study 3: Regenerative Paradigm (Office Building).	53
6.5	Case Study 4: Regenerative Paradigm (Residential Building).	56
	References.	59
7	Performance Comparison and Quantification	61
7.1	Introduction	61
7.2	Case Study 1: Efficiency Paradigm.	62
7.3	Case Study 2: Regenerative Paradigm	66
7.4	Case Study 3: Regenerative Paradigm	68
7.5	Case Study 4: Regenerative Paradigm	71
7.6	Case Studies Comparison	73
	References.	79
8	Regenerative and Positive Impact Architecture Roadmap	81
8.1	Introduction	81
8.2	Research Findings.	82
8.3	A Novel Framework for Regenerative Building Design	83
8.4	Lessons Learned	84
8.5	Implications for Research and Architectural Design Practice	90
	References.	93

Regenerative and Positive Impact Architecture
Learning from Case Studies

Attia, S.

2018, XIX, 94 p. 29 illus., 26 illus. in color., Softcover

ISBN: 978-3-319-66717-1
