

Contents

1	Introduction	1
1.1	Nanotechnology in Medical Science	1
1.2	Carbon Nanotubes	2
1.2.1	Synthesis of Carbon Nanotubes	3
1.2.2	Carbon Nanotubes: Surface Modification	3
1.2.3	Optimization of the Growth Condition: Response Surface Methodology	4
1.2.4	Purification of Carbon Nanotubes	4
1.2.5	Functionalization of Carbon Nanotubes	4
1.3	Chemically Modified Electrodes	5
1.4	Glucose Biosensors	5
1.5	Application of Carbon Nanotubes in the Glucose Biosensor	6
1.6	World Demand of the Electrochemical Glucose Biosensor	6
1.7	Aim and Objectives of the Book	7
1.8	Research Scope	7
1.9	Significance of Research on Electrochemical Glucose Biosensors	8
1.10	Organization of the Book	8
	References	9
2	Background of the Study	13
2.1	Structures of Carbon Nanotubes	13
2.2	Generation of Carbon Nanotubes	14
2.2.1	The Arc Discharge Method	14
2.2.2	The Laser Vaporization Method	14
2.2.3	The Chemical Vapor Deposition Method	15
2.3	Fabrication of Glucose Biosensor: The First, Second, and Third Generation	19
2.3.1	Carbon Nanotube-Based Biosensors	20
2.3.2	Functionalization of Carbon Nanotubes	20

2.3.3	Functionalized Carbon Nanotubes to Enhance Electron Transfer Mechanism in Glucose Biosensor	21
2.4	Carbon Nanotube-Based Composites in Glucose Biosensors	25
2.5	Functionalization of Carbon Nanotubes for Other Applications	25
2.5.1	Thermal Applications of Carbon Nanotubes	26
2.5.2	Medical Applications of Carbon Nanotubes	28
2.5.3	Antimicrobial Activity of Carbon Nanotubes.	29
2.5.4	Drug Delivery Applications of Carbon Nanotubes.	30
2.5.5	Electro-optical Properties of Carbon Nanotubes	30
2.5.6	Mechanical Properties of Carbon Nanotubes	30
2.5.7	Gas Sensors Based on Carbon Nanotubes	31
	References.	31
3	Experimental Procedures and Materials	39
3.1	Introduction	39
3.2	Materials.	39
3.3	Synthesis of Multilayer Carbon Nanotubes from Camphor Oil by Chemical Vapor Deposition Method	41
3.4	Synthesis of Well-Crystalline Carbon Nanotubes Via Neutralized Cooling Technique by Carbon Vapor Deposition Method.	42
3.5	Synthesis of Highly Oriented Vertically Aligned Carbon Nanotubes Via Chemical Vapor Deposition Method.	42
3.6	Synthesis of Selective Aspect Ratio Vertically Aligned Carbon Nanotubes Via Carbon Vapor Deposition Method	43
3.7	Optimization of Highly Oriented Vertically Aligned Carbon Nanotubes' Growth Conditions Using Response Surface Methodology: Design of Experimental Matrix and Experimental Procedure	43
3.8	Characterization of Synthesized Carbon Nanotubes	46
3.8.1	Raman Spectroscopy: Measurement Conditions.	47
3.8.2	Thermogravimetric Analysis: Measurement Conditions.	47
3.8.3	Field Emission Scanning Electron Microscopy: Measurement Conditions	49
3.8.4	High Resolution Transmission Electron Microscopy: Measurement Conditions	49
3.8.5	Fourier Transform Infrared Spectroscopy: Measurement Conditions	51
3.9	Chemically Modified Electrodes	52
3.9.1	Pretreatment of the Electrodes	52
3.9.2	Preparation of Phosphate Buffer	53
3.9.3	Preparation of Serum Samples and Real Sample Analysis	53

3.9.4	Fabrication of Chemically Modified Electrodes	53
3.10	Fabrication of Glucose Biosensor Based on Vertically Aligned Carbon Nanotubes Composite: GOx/MWCNTs/GI/GCE	54
3.10.1	Synthesis, Purification, and Optimization of Multi-walled Carbon Nanotubes	54
3.10.2	Fabrication of GOx/MWCNTs/GI/GCE.	54
3.11	Electrochemical Measurements of Modified Electrodes	55
3.11.1	Electrochemical Setup	55
3.11.2	Cyclic Voltammetry	56
3.11.3	Chronoamperometric Response	57
3.12	Integration of Electronic Tongue Based on Frequency Response of GOx/MWCNTs/GI/GCE Biosensor	57
3.12.1	Square Wave Frequency Measurements of the Electrical Circuit Attached to the Modified Electrodes	58
	References.	59
4	Results and Discussions.	63
4.1	Fast Synthesis of Multilayer Multi-walled Carbon Nanotubes from Camphor Oil	63
4.2	Synthesis of Well-Crystalline Carbon Nanotubes Via Neutralized Cooling Method.	66
4.3	Highly Oriented Vertically Aligned Carbon Nanotubes Via Carbon Vapor Deposition Method	69
4.4	Synthesis of Selective Aspect Ratio Vertically Aligned Carbon Nanotubes Via Carbon Vapor Deposition Method	74
4.5	Optimization of the Growth Condition Using Response Surface Methodology	76
4.5.1	Crystallinity Model: I_G/I_D -Single-Response Optimization	76
4.5.2	Effect of Deposition Temperature and Concentration of Camphor Oil on Carbon Nanotubes' Crystallinity.	80
4.6	Constant Glucose Biosensor Based on Vertically Aligned Carbon Nanotubes Composites.	81
4.6.1	Raman Spectroscopy	81
4.6.2	Field Emission Scanning Electron Microscopy	82
4.6.3	Direct Electron Transfer of GOx/MWCNTs/GI/GCE.	83
4.6.4	Biocatalytic Activity of GOx/MWCNTs/GI/GC Electrode.	84
4.6.5	Amperometric Determination of Glucose on GOx/MWCNTs/GI/GC Electrode	86
4.6.6	Reproducibility and Stability of the GOx/MWCNTs/GI/GC Electrode	86

4.6.7	Determination of Glucose in Human Blood Serum and Analytical Recovery of Glucose	87
4.7	Brain-Like Taste Bud Circuit Using the GOx/MWCNTs/GI/ GCE Glucose Biosensor	87
4.7.1	Electrical Circuit of a Taste Bud Inspired Network: Single Membrane	88
	References.	90
5	Conclusion	93
5.1	Introduction	93
5.2	Morphology Optimization of Synthesized Carbon Nanotubes.	93
5.3	Fast Synthesizing of the Multilayer Carbon Nanotubes	94
5.4	Well-Crystalline Multi-walled Carbon Nanotubes.	94
5.5	Highly Oriented Carbon Nanotubes	94
5.6	Selective Aspect Ratio of Carbon Nanotubes	94
5.7	Vectorial Crystal Growth of Oriented Vertically Aligned Carbon Nanotubes	95
5.8	Constant Glucose Biosensor Based on Vertically Aligned Carbon Nanotubes Composites.	95
5.9	Brain-Like Taste Bud Circuit Using the GOx/MWCNTs/GI/ GCE Glucose Biosensor.	96
5.10	Research Contribution	96
5.11	Recommendations and Future Work.	97
	Index	99

Nanocomposite-Based Electronic Tongue
Carbon Nanotube Growth by Chemical Vapor Deposition
and Its Application

TermehYousefi, A.

2018, XIII, 101 p. 45 illus., 35 illus. in color., Hardcover

ISBN: 978-3-319-66847-5
