## Synthesis of Mechanisms and Robots

<b>Synthesis of Precision Flexible Mechanisms Using Screw Theory with a Finite Elements Validation</b> . . . . .	3
Martín A. Pucheta and Alejandro G. Gallardo	
<b>Enumeration of Kinematic Chains with Zero Variety for Epicyclic Gear Trains with One and Two Degrees of Freedom</b> . . . . .	15
Marina Baldissera de Souza, Rodrigo de Souza Vieira, and Daniel Martins	
<b>Mechanism Design and Kinematics Analysis of a Bat Robot</b> . . . . .	25
Deming Kong, Jing-Shan Zhao, and Yaser Saffer Tollori	
<b>Vector Analysis of the Cable Tension Conditions</b> . . . . .	39
T. Muraro, D. Martins, and L.K. Sacht	
<b>Actuated Degree-of-Control: A New Approach for Mechanisms Design</b> . . . . .	49
Estevan Hideki Murai, Roberto Simoni, and Daniel Martins	
<b>Analysis of Self-aligning Mechanisms by Means of Matroid Theory</b> . . .	61
Andrea Piga Carboni, Henrique Simas, and Daniel Martins	
<b>Review and Classification of Workpiece Toggle Clamping Devices</b> . . . .	74
Mateus Viana de Oliveira e Costa, Estevan Hideki Murai, Fabiola da Silva Rosa, and Daniel Martins	
<b>Supporting the Laminated Ferromagnetic Pole Pieces in a Magnetic Gear: A Structure Behaviour Analysis from a Multibody Model</b> . . . . .	85
M. Desvaux, B. Multon, H. Ben Ahmed, and S. Sire	

## Kinematic Analysis

<b>Kinematic Analysis for a Planar Redundant Serial Manipulator . . . . .</b>	<b>97</b>
Zijia Li, Mathias Brandstötter, and Michael Hofbaur	

<b>Workspace Analysis of a Parallel Manipulator Using Multi-objective Optimization and Bio-inspired Methods . . . . .</b>	<b>107</b>
R.S. Gonçalves, J.C.M. Carvalho, and F.S. Lobato	

<b>Modeling of a Four-Legged Robot with Variable Center of Mass as a Cooperative Multirobot System . . . . .</b>	<b>116</b>
Cristiane P. Tonetto, Antônio Bento Filho, and Altamir Dias	

<b>Assembly Sequence Planning for Shape Heterogeneous Modular Robot Systems . . . . .</b>	<b>128</b>
Anelize Zomkowski Salvi, Roberto Simoni, and Henrique Simas	

## Static Analysis

<b>Kinetostatics and Optimal Design of a 2PRPU Shoenflies-Motion Generator . . . . .</b>	<b>141</b>
H. Simas and R. Di Gregorio	

<b>Influence of the Working Mode on the Maximum Isotropic Force Capability Maps for a 3RRR Planar Parallel Manipulator . . . . .</b>	<b>151</b>
L. Mejia, D. Ponce, J.C. Herrera, H. Simas, and D. Martins	

<b>Maximum Isotropic Force Capability Maps in Planar Cooperative Systems: A Practical Case Study . . . . .</b>	<b>160</b>
Juan Camilo Herrera Pineda, Leonardo Mejia Rincon, Roberto Simoni, and Henrique Simas	

<b>Balancing Conditions of the RSS'R, Spatial Mechanism . . . . .</b>	<b>171</b>
Mario Acevedo	

## Dynamic Analysis

<b>Elastodynamic Performance of a Planar Parallel Mechanism Under Uncertainties . . . . .</b>	<b>183</b>
Fabian Andres Lara-Molina, Edson Hideki Koroishi, and Thamiris Lima Costa	

<b>Complex Modelling and Dynamical Analysis of Parallel Cable Mechanisms . . . . .</b>	<b>193</b>
Radek Bulín, Michal Hajžman, and Pavel Polach	

<b>A New Methodology for the Balancing of Mechanisms Using the Davies' Method . . . . .</b>	<b>203</b>
Julio Cesar Frantz, Leonardo Mejia Rincon, Henrique Simas, and Daniel Martins	

<b>The Dynamic Synthesis of an Energy-Efficient Watt-II-Mechanism . . . .</b>	<b>213</b>
F. Schwarzfischer, M. Hüsing, and B. Corves	

<b>Multibody Dynamic Analysis of a High-Altitude Long-Endurance Aircraft Concept . . . . .</b>	<b>223</b>
L.M. Nitardi, B.A. Roccia, S. Preidikman, and F.G. Flores	

## **Control of Mechatronic Systems**

<b>High-Order Sliding Mode Control for Solar Tracker Manipulator . . . .</b>	<b>235</b>
I. Gutierrez, E. Hernandez-Martinez, A. Oropeza, and Sajjad Keshtkar	

<b>Towards a Servovision Based Control for a Planar Parallel Manipulator . . . . .</b>	<b>244</b>
Fernanda Thaís Colombo and Maíra Martins da Silva	

<b>Multibody Model of the VVER 1000 Nuclear Reactor Control Assembly and Simulation of Its Moving Parts Drop . . . . .</b>	<b>254</b>
P. Polach and M. Hajžman	

<b>Single-State Friction Model for Control Purposes . . . . .</b>	<b>264</b>
Fernando J. Villegas, Rogelio L. Hecker, and Gustavo M. Flores	

<b>Design of a Robotic Speech-to-Sign Language Transliterating System . . .</b>	<b>274</b>
E. López-Zapata, M. Campos-Trinidad, R. Salazar-Arévalo, and J. Acostupa-Del Carpio	

## **Modelling and Simulation**

<b>Robust Critical Inverse Condition Number for a 3RRR Robot Using Failure Maps . . . . .</b>	<b>285</b>
Hiparco Lins Vieira, João Vitor de Carvalho Fontes, Andre Teófilo Beck, and Maíra Martins da Silva	

<b>Simulation of a Serial Robot Calibration Through Screw Theory . . . . .</b>	<b>295</b>
L.K. Kato, T.L.F.C. Pinto, H. Simas, and D. Martins	

<b>Comparative Study of Autonomous Aerial Navigation Methods Oriented to Environmental Monitoring . . . . .</b>	<b>305</b>
J. López, A. Mauricio, A. Rojas, E. Dianderas, J. Vargas-Machuca, and R. Rodríguez	

<b>Simulation and Experimental Verification of a Global Redundancy Resolution for a 3PRRR Prototype . . . . .</b>	<b>315</b>
João Vitor de Carvalho Fontes and Maíra Martins da Silva	

<b>A Computational Aeroelastic Framework for Studying Non-conventional Aeronautical Systems . . . . .</b>	<b>325</b>
S. Preidikman, B.A. Roccia, M.L. Verstraete, L.R. Ceballos, and B. Balachandran	

<b>ILQG Planner Applied to Dynamic Systems with Intermittent Contact</b> . . . . .	335
Henrique B. Garcia, Leonardo S. Luna, Gustavo Jose Giardini Lahr, and Glauco A.P. Caurin	
<b>Cost Effective Provisioning of Electricity in Smart Nano-grid Using GA and Optimized Heuristic Algorithm</b> . . . . .	344
Nabila Ahmad, Rabiya Bibi, and Shoab Ahmed Khan	
<b>Prototypes and Experimental Validations</b>	
<b>Mathematical Modeling and Prototype Development of a Pneumatically-Actuated Bench for Sloping Terrain Simulation</b> . . .	357
M.R.M.H. Porsch, N. Kinalski, R. Goergen, A. Fiegenbaum, L.A. Rasia, and A.C. Valdiero	
<b>An Experimental Characterization of Roll Hemming Process</b> . . . . .	367
Eduardo Esquivel, Giuseppe Carbone, Marco Ceccarelli, and Carlos Jáuregui	
<b>Experimental Characterization of a Feedforward Control for the Replication of Moving Resistances on a Chassis Dynamometer</b> . . . . .	379
E. Bertoti, J.J. Eckert, R.Y. Yamashita, L.C.A. Silva, and F.G. Dedini	
<b>Experimental Setup of a Novel 4 DoF Parallel Manipulator</b> . . . . .	389
Marina Valles, Pedro Araujo-Gomez, Vicente Mata, Angel Valera, Miguel Diaz-Rodriguez, Alvaro Page, and Nidal M. Farhat	
<b>Behaviour Comparison Between Mechanical Epicyclic Gears and Magnetic Gears</b> . . . . .	401
M. Desvaux, B. Multon, H. Ben Ahmed, and S. Sire	
<b>Mechatronic Systems for Assistive Technology</b>	
<b>Design Optimization of a Cable-Driven Parallel Robot in Upper Arm Training-Rehabilitation Processes</b> . . . . .	413
Eusebio Hernandez, S. Ivvan Valdez, Giuseppe Carbone, and Marco Ceccarelli	
<b>Kinematic Analysis of an Exoskeleton-Based Robot for Elbow and Wrist Rehabilitation</b> . . . . .	424
N. Plitea, B. Gherman, G. Carbone, M. Ceccarelli, C. Vaida, A. Banica, D. Pisla, and A. Pisla	
<b>Experimental Evaluation of Artificial Human Ribs</b> . . . . .	434
L.A. Aguilar, M. Ceccarelli, Ch.R. Torres-San-Miguel, G. Urriolagoitia-Sosa, and G. Urriolagoitia-Calderón	

<b>Kinetostatic Model of the Human Knee for Preoperative Planning: Part A</b> .....	444
D. Ponce, L. Mejia, E. Ponce, D. Martins, C.R.M. Roesler, and J.F. Golin	
<b>Kinetostatic Model of the Human Knee for Preoperative Planning: Part B</b> .....	455
D. Ponce, J.F. Golin, E. Ponce, D. Martins, C.R.M. Roesler, and L. Mejia	
<b>On the Kinematics of an Innovative Spherical Parallel Robot for Shoulder Rehabilitation</b> .....	464
N. Plitea, C. Vaida, G. Carbone, A. Pisla, I. Ulinici, and D. Pisla	
<b>Automatic Elevation System of a Wheelchair</b> .....	474
Sergio Yoshinobu Araki, Pâmela Florentino, Eduardo Bock, Michele Saito, Mariana Hernandez, Luciano Fuentes, Isac Fujita, Rodrigo Stoeterau, Daniel Martins, and Antônio Celso Fonseca de Arruda	
<b>An Initial Assessment of Mechanisms for the Development of New Hospital Beds</b> .....	485
R.L.P. Barreto, R. Simoni, and D. Martins	
<b>Vehicle Dynamics</b>	
<b>Rollover of Long Combination Vehicles: Effect of Overweight</b> .....	497
Gonzalo Moreno, Vangelo Manenti, Lauro Nicolazzi, Rodrigo Vieira, and Daniel Martins	
<b>Development of a Robust Integrated Control System to Improve the Stability of Road Vehicles</b> .....	506
Abel Castro, Georg Rill, and Hans I. Weber	
<b>Powertrain Optimization to Improve Vehicle Performance and Fuel Consumption</b> .....	517
Jony J. Eckert, Fernanda C. Corrêa, Elvis Bertoti, Rodrigo Y. Yamashita, Ludmila C.A. Silva, and Franco G. Dedini	
<b>Design and Analysis of a Wheel with Flexible Spokes</b> .....	528
Shuaisong Hou, Jing-Shan Zhao, and Misyurin Sergey Yurevich	
<b>Multibody Model of a Small Tire Test Bench</b> .....	549
Fabio Mazzariol Santiciolli, Ludmila Corrêa de Alkmin e Silva, Elvis Bertoti, Jony Javorski Eckert, Rodrigo Yassuda Yamashita, and Franco Giuseppe Dedini	
<b>Maneuverability Study of a Vehicle with Rear Wheel Steering</b> .....	559
Silva Jhino, Vargas Lincol, Liberato Josue, Quispe Junior, and Munares Carlos	

Multibody Mechatronic Systems

Proceedings of the MUSME Conference held in

Florianópolis, Brazil, October 24-28, 2017

Carvalho, J.C.M.; Martins, D.; Simoni, R.; Simas, H. (Eds.)

2018, XI, 567 p. 327 illus., Hardcover

ISBN: 978-3-319-67566-4
