

Acknowledgements

We would like to take this opportunity to thank the Griffith Centre for Sustainable Enterprise (GCSE) located under the Griffith Business School at Griffith University, Australia, for its generous support for organising the international conference “Pathways to a Sustainable Economy: Bridging the Gap between Paris Agreement Commitments and 2030 Targets in Brisbane in November 2016”. Selected papers out of this conference have been included in this volume. Vanessa Taveras Dalmau of the GCSE has been providing all-out support for successful completion of the volume. Despite the challenges of communicating with the contributors based in different parts of Australasia, she put all-out efforts to meet the deadlines in preparing the manuscript. We also acknowledge the time and skill of our in-house editor Malini Devadas in making a multidisciplinary manuscript presentable to the readers.

We must appreciate the time and efforts of all the contributors for committing their time to the project and for sharing their research outcome and knowledge in this volume.

The Editors
Brisbane, July 2017

Pathways to a Sustainable Economy
Bridging the Gap between Paris Climate Change
Commitments and Net Zero Emissions
