

Contents

1	Unconscious, Helpless, and Orchestrated Financial Crises	1
1.1	Introduction	2
1.2	A Systemic Association	3
1.3	Currency Wars	6
1.4	Self-Defense	8
1.4.1	The Problem of Economic Security	8
1.4.2	Evaluate the State of Economic Performance	9
1.4.3	Introduce Policy Responses	10
1.5	How This Special Volume Is Organized	12
2	Systems Research and the Systemic Yoyo Model	15
2.1	Systems Science and the Second Dimension of Knowledge	16
2.1.1	Systems Science and Its Importance	16
2.1.2	A Two-Dimensional Spectrum of Knowledge	16
2.1.3	The Systemic Yoyo Model	17
2.2	Properties of Systemic Yoyos	21
2.2.1	The Field Structure	21
2.2.2	The Quark Structure of Systemic Yoyos	23
2.3	Laws on State of Motion	26
2.3.1	The First Law on State of Motion	27
2.3.2	The Second Law on State of Motion	28
2.3.3	The 3rd and 4th Laws on State of Motion	30
2.3.4	Validity of Figurative Analysis	32
2.4	Theoretical Justifications	35
2.4.1	Blown-Ups: Moments of Transition in Evolutions	35
2.4.2	Mathematical Properties of Blown-Ups	36
2.4.3	The Problem of Quantitative Infinity	36
2.4.4	Equal Quantitative Effects	38

2.5	Empirical Justifications	40
2.5.1	Bjerknes' Circulation Theorem	41
2.5.2	Conservation of Informational Infrastructure	42
2.5.3	Silent Human Communications	46

Part I Systemic Modeling of Economic Entities and Processes

3	Systemic Representation of Economic Organizations	51
3.1	Introduction	52
3.2	The Relevant Systemic Intuition	53
3.3	Investments in Innovative Competitiveness	58
3.4	The Development Problem of an Economy	62
3.5	Consistency Between Fiscal/Monetary Policies and the Performance of the Economy	64
3.6	The Storage System of Manufactured Products	69
3.7	Changes in the State of an Economic System	70
3.8	Some Concluding Remarks	72
4	Order Reduction of Dynamic Monetary Systems	73
4.1	Introduction	74
4.2	The Control-Theory Model for Money Movement	76
4.3	Needs for Reducing the Dimensionality of the Capital Movement Model	80
4.4	Existence of Reduced Order Systems for Currency Movement	83
4.5	Method for Order Reduction of Currency Movement Systems	86
4.6	Error Analysis for Reduced Order Currency Movement Model	89
4.7	Relationship Between the Transfer Functions of the Original and Reduced Order Models	91
4.8	Observability and Controllability of Reduced Order Systems	93
4.9	Selecting the Order Reduction Vector q	98
4.10	An Example of Application	102
4.11	Conclusions	107
5	Estimating the State of Economy Through Observers	109
5.1	Introduction	110
5.2	Design of Observers	114
5.3	The Problem and a Fundamental Theorem	116
5.4	Method of Observer Design	119
5.5	Observers of Lower Order	122
5.6	Location Determination of Observer's Poles	127
5.7	Some Concluding Remarks	127

6	Estimating the State of Economy Through Controllers	129
6.1	Introduction	130
6.2	State Feedback Controllers with Observers Attached	130
6.2.1	Separation of State Feedback Controller's Poles	130
6.2.2	Transfer Function Matrix of State Feedback Controller with an Observer Attached	132
6.2.3	Joint Design of a Feedback Controller and Observer	133
6.3	Design of Dynamic Compensators	134
6.4	Design of Multiple Variable PD Controllers	139
6.5	Conclusion	146

Part II Instability: The Brewing of Currency Wars

7	Some Major Financial Crises in History: 1929–2008	151
7.1	The Credit Crunch of 1966	152
7.2	The Year 1970: Penn Central	154
7.3	The Year 1974: Franklin National	157
7.4	The Silver Crisis of 1980	160
7.5	The 1982 Crisis	163
7.5.1	Thrift Institutions	164
7.5.2	Drysdale Government Securities, Inc.	165
7.5.3	Penn Square Bank	166
7.5.4	Mexico	167
7.6	The 1980s: Emerging Markets Debt Default Crises	168
7.7	Early 1990s: Advanced Countries Crises	170
7.8	The Mid-1990s: Mexican Crisis and Asian Financial Crisis	173
7.9	Late 2000s: The Great Recession of 2008	176
7.10	Some Remarks	179
8	Effects of Foreign Capital on Economic Security	181
8.1	Introduction	182
8.2	Positive Effects of Foreign Capital on Economic Security	184
8.3	Negative Effects of Foreign Capital on Economic Security	189
8.4	Conclusion	195
9	Economic Security Under Disturbances of Foreign Capital	197
9.1	Introduction	198
9.2	A Model for Monitoring Dynamic Foreign Capital Within an Economic System	198
9.3	Estimate the State of Motion of Foreign Capital	205
9.4	Estimate the Initial State of Foreign Capital's Movement	208
9.5	How Disturbances of Foreign Capital Affect Economic Security	210
9.6	Concluding Remarks	215

Part III Observability: Initiating Currency Wars

10 Inevitability of Currency Wars	219
10.1 Interactions of Currency in the Globalizing Economy	220
10.2 Controllability and Observability of Economic Systems	221
10.2.1 The Controllability of an Economic System	222
10.2.2 The Observability of an Economic System	225
10.2.3 Duality Between Controllability and Observability	228
10.3 Structural Forms of Economic Systems' Controllability and Observability	229
10.3.1 Controllable Subspaces	230
10.3.2 Separation of the Controllable Part	233
10.3.3 The Not-Observable Subspace	237
10.3.4 Separation of the Observable Part	238
10.4 Decomposition of Constant Coefficient Linear Economic Systems	240
10.5 Some Final Remarks	243
11 Flashing with Swords: How Currency Wars Take Place	245
11.1 Introduction	245
11.2 The Basic Concepts and Systemic Intuition	247
11.3 Recent Speculative Attacks and Currency Crises	250
11.4 One Possible Form of Currency Wars	258
11.5 Some Final Remarks	263

Part IV Strategies of Self Defense

12 Self-Defense Through Manipulating Exchange Rate	267
12.1 Introduction	267
12.2 A Model for Categorized Purchasing Power	268
12.3 The Functional Relationship Between P and $(D-S)$	270
12.4 Separating Economic Categories Using Feedback Component Systems	276
12.5 A Strategy for National Defense	280
12.6 A Few Final Words	283
13 Self-Defense Based on Feedback Mechanism	285
13.1 Introduction	286
13.2 Formulation of the Problem	289
13.3 Design of Feedback Control with Pure Gain	290
13.4 The Lemma	292
13.5 Design of Linear Multivariable Regulator	294
13.5.1 Design of Pure Gain Feedback Controllers	294
13.5.2 Design of Linear Multivariable Regulator	295

13.6	Application in the Control of Production Inventory System	299
13.6.1	The Problem	299
13.6.2	The Solution	301
13.6.3	Solving the Control Problem of Production Inventory System	302
13.7	Conclusion	305
14	Another Plan of Self-Protection	307
14.1	Introduction	308
14.1.1	Currency War	308
14.1.2	Literature Review	309
14.2	The Main Result	314
14.3	A Case Analysis	316
14.4	Implications of the Established Theory	319
14.5	Some Final Remarks	324
 Part V Clean Up Disastrous Aftermath Through Policies and Reforms		
15	Design Economic Policies Based on Various Performance Indicators	327
15.1	Introduction	328
15.2	Economic Indicator Feedback and Performance Feedback	330
15.2.1	Formulation of the Feedback Problem	330
15.2.2	Classification of Feedbacks	331
15.3	Design Feedback Control by Using Lyapunov Method	337
15.3.1	Lyapunov Stability	340
15.3.2	Feedback Design Based on Lyapunov Second Method	343
15.3.3	An Iterative Method for Solving Lyapunov Equations	345
15.4	Corresponding Results for Economies Measured with Discrete Time	345
15.5	Conclusion	347
16	Design Economic Policies that Do Not Create Bumpy Recovery	349
16.1	Introduction	350
16.2	Pole Placement	354
16.2.1	Pole Placement by Using State Feedback	354
16.2.2	An Improvement on How to Place Poles	364
16.2.3	Pole Placement Through Output Feedback	365
16.2.4	Determination of Pole Locations	367
16.3	The Problem of Eigenstructure Assignment	370
16.4	Conclusion	371

17	The Problem of Optimal Macroeconomic Regulations	373
17.1	Introduction	374
17.2	The Problem of Optimal Regulation	375
17.3	Several Typical Forms of Optimal Regulation of Economic Systems	377
17.4	Empirical Cases of Optimal Regulation Problems	382
17.5	Some Final Words	388
18	Steepest Optimal Policies for Regulating Capital Flows and Exchange Rates	389
18.1	Introduction	390
18.2	Three Different Combinations of the Impossible Trinity	391
18.2.1	The British Pound Crisis in 1992	393
18.2.2	Asian Financial Crises in 1997	394
18.2.3	Russia's "Foreign Exchange Corridor" of 1998	395
18.3	An Elementary Steepest Optimal Regulation Model	396
18.4	Solving the Optimal Regulation Model	398
18.5	A Symbolic Expression for the Steepest Reform Path	401
18.6	Systemically Understanding the Solution of the Steepest Optimal Regulation Problem	404
18.7	Some Final Words	405
19	The Problem of Optimal Path for Financial Reform	409
19.1	Introduction	410
19.2	The Problem to Be Addressed	410
19.3	The Model and Solution	421
19.4	The Problem of Fixed Amount of Money	426
19.4.1	The Model	430
19.4.2	The Solution	431
19.4.3	A Revisit to the Problem of Maximum Area	433
19.5	Some Final Words	436
 Part VI Specific Case Analyses		
20	Renminbi: A New Reserve Currency	439
20.1	Strongly Fortified: Strengthen RMB Onshore Market	440
20.2	Going Abroad: Expand the RMB Offshore Market	448
20.3	Island Hopping Campaign: Currencies Swaps	458
20.4	Without Match in Asia: Regionalization and Internationalization	462
20.4.1	Internationalization of RMB, Why?	463
20.4.2	Implementation in the Short Run	463
20.4.3	A Long-Term Outlook	465
20.4.4	RMB Undervaluation and China's Growth	466
20.4.5	Who Will Gain from an RMB Revaluation?	467

20.4.6	Will Other Asian Currencies Follow China's RMB Revaluation?	469
20.4.7	RMB's Increasing Influence in Asia	470
20.5	Some Final Words	473
21	A General Theory of International Money	475
21.1	The Theory	479
21.1.1	A Descriptive Presentation of the Theory	480
21.1.2	Consequences of the Theory	485
21.2	Where Will Euro Go?	485
21.2.1	An Offspring of Noble Ancestors: Franc and Mark	486
21.2.2	Born in a Wrong Time: The European Sovereign Debt Crisis	493
21.2.3	The Sun Sets: Flowers Fall Off Helplessly	497
21.3	Some Concluding Remarks	499
22	Where Will the US Dollar Go?	501
22.1	Globalization and Need for International Currency	503
22.2	The Data Employed	506
22.3	New Insights Revealed	508
22.4	Empirical Results Implied by the Data	515
22.5	Robustness of the Results	518
22.6	How the Dollar Became the Leading International Currency	522
22.7	Where Will the US Dollar Go?	523
22.8	Some Final Remarks	525
23	Where Will Chinese Yuan Go?	527
23.1	The Growth of Renminbi from a Humble Beginning	528
23.2	Evolution and Development of Renminbi	529
23.3	Offshore Financial Centers of Renminbi	536
23.3.1	Debates on Emerging Financial Centers in China	538
23.3.2	Beijing, Shanghai, and Shenzhen in the Global Arena	540
23.3.3	In Summary	551
23.4	The Pace of Regionalizing Renminbi	552
23.4.1	Preface	553
23.4.2	The Background	554
23.4.3	Principles	555
23.4.4	Framework	555
23.4.5	Cooperation Priorities	556
23.4.6	Cooperation Mechanisms	561
23.4.7	China's Regions in Pursuing Opening-Up	562

23.4.8	China in Action	564
23.4.9	Embracing a Brighter Future Together	565
23.5	Some Final Words	566
24	Avoiding Currency Wars with a Single World Currency?	567
24.1	A Systemic Evolutionary Model of World Currencies	567
24.2	Is a Unified World Currency Possible?	569
24.3	Regional Single Currencies	570
24.4	Some Final Remarks	571
	Bibliography	573
	Index	599

Currency Wars

Offense and Defense through Systemic Thinking

Forrest, J.Y.-L.; Ying, Y.; Gong, Z.

2018, XXIII, 607 p. 114 illus., 22 illus. in color.,

Hardcover

ISBN: 978-3-319-67764-4
