

Contents

1	Key Competencies for Teaching Mathematical Modeling	1
1.1	Research in Teacher Education on Mathematical Modeling: Short Background	1
1.2	Mathematical Modeling Course for Educating the Educators: An Evaluated Module	3
1.2.1	Guiding Principle and “Pedagogical Double-Decker”	4
1.2.2	Structure of a Modeling Course for Teacher Education: Theory-Practice-Balance	4
1.2.3	Mathematical Modeling and Cooperative Learning	6
2	Theoretical Competency: For Your Practical Work	13
2.1	What Does Mathematical Modeling Mean?: Goals and Aims	13
2.1.1	Real Situation (RS)	15
2.1.2	Mental Representation of the Situation (MRS)	15
2.1.3	Real Model (RM)	15
2.1.4	Extra-Mathematical Knowledge (EMK)	16
2.1.5	Mathematical Model (MM)	16
2.1.6	Mathematical Results (MR)	16
2.1.7	Real Results (RR)	17
2.1.8	Goals and Justifications for the Inclusion Mathematical Modeling in Everyday Teaching	17
2.1.9	International Perspectives on Mathematical Modeling	18
2.2	Modeling Cycle(s): A Multi-faceted Learning Instrument	20
2.2.1	Modeling Cycle from Applied Mathematics	21
2.2.2	Didactical or Pedagogical Modeling Cycle	22
2.2.3	Psychological Modeling Cycle	23
2.2.4	Diagnostic Modeling Cycle/Modeling Cycle from a Cognitive Perspective	24

2.2.5	Modeling Cycles Presented in Mathematics Standards: Exemplified Along the Common Core State Standards Mathematics of the United States of America	25
2.2.6	Mathematical Modeling Cycle as a Multi-purpose (and Metacognitive) Learning Instrument	27
2.3	Far from Linearity: Individual Modeling Routes.	30
2.3.1	Visible Modeling Routes and the Influence of Extra- Mathematical Experience.	31
2.3.2	Mathematical Thinking Styles and Modeling Routes of Learners and Teachers	34
2.3.3	Teachers' Behavior While Modeling Activities in the Classroom	36
2.3.4	Mr. P.: The "Retrospective Formalizer".	37
2.3.5	Mrs. R.: The "Realistic Validator"	38
3	Task Competency: For Your Instructional Flexibility.	41
3.1	Criteria of (Good) Modeling Problems	43
3.1.1	What Characterizes a Modeling Problem?	43
3.1.2	Criteria of Modeling Problems	46
3.1.3	Developing a Modeling Problem: From Brainstorming to a Challenge for Students in School	47
3.1.4	Ready for a Change?: From a Problem to a Modeling Problem.	56
3.1.5	The Potential of Modeling Problems: One for All and All for One.	58
3.2	Mathematical Modeling Competencies: Fostering and Eliciting.	65
3.2.1	Fostering and Eliciting Modeling Competencies.	67
3.3	Influence of the Real Context of the Task on an Individual's Modeling Processes	70
4	Instructional Competency: For Effective and Quality Lessons	77
4.1	Quality Criteria for Good Lessons.	77
4.1.1	Effective and Learner-Oriented Classroom Management.	78
4.1.2	Cognitive Activation of Learners	78
4.1.3	Meta-Cognitive Activation of Learners	79
4.1.4	Encouraging Multiple Solutions	79
4.1.5	Mathematical Modeling as a Long-Term Learning Process	79
4.2	Planning and Executing Mathematical Modeling Lessons	80
4.2.1	First Part: 8 Principles for Planning and Executing Mathematical Modeling Lessons.	80
4.2.2	Second Part: Lesson Plan for the Modeling Problem "Moving House"	83
4.3	Interventions During Modeling Activities	86

4.4	Ways of Accustoming Students to Modeling Problems and the Role of Technology	94
4.4.1	First Aspect: Introducing Modeling Problems to Students	94
4.4.2	Second Aspect: The Role of Technologies	100
5	Diagnostic Competency: Basis for Your Assessment and Grading.	103
5.1	From Recognizing Progress and Difficulties to the Right Feedback (and Intervention)	104
5.1.1	Diagnose: Definitions and Theoretical Background	104
5.1.2	Diagnostic Sheet as a Tool for Diagnosing Modeling Competency During the Solving Process	105
5.1.3	Written Feedback for Written Solutions of Modeling Problems	109
5.2	Assessing Modeling Through Tests	111
6	Mathematical Modeling Days and Projects: Go for More	121
6.1	How to Plan Mathematical Modeling Days.	121
6.1.1	Structure of the Modeling Days.	122
6.1.2	Which Spacing of Bus Stops Along a Bus Route Is Optimal?.	124
6.1.3	Students' Solution	127
6.2	Building Bridges Between University and School	128
6.2.1	Pre-service Teachers' Reflections After Students' Modeling Activities	129
7	Reflections and Outlook	135
	Appendix	139
	References	141
	Index.	149

Learning How to Teach Mathematical Modeling in
School and Teacher Education

Borromeo Ferri, R.

2018, XVII, 153 p. 43 illus., 23 illus. in color., Hardcover

ISBN: 978-3-319-68071-2
